## Part II: Narrative Explanation

### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

*Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.*

Section 1 amends RCW 43.88C.010 by requiring the Caseload Forecast Council (CFC) to provide the number of people eligible for the Working Families' Tax Credit beginning with the first official forecast after the bill's effective date. It additionally states the total number of people eligible should include:

1. the number of eligible people with no qualifying children;
2. the number of eligible people with one qualifying child;
3. the number of eligible people with two qualifying children; and
4. the number of eligible people with three or more qualifying children.

The CFC interprets the bill as follows:

The CFC's duties would be expanded to produce Working Families' Tax Credit eligible forecasts, which could comprise of four sub-forecasts as called out in the bill and specified above.

To satisfy the requirements of this bill, the CFC would need to:

1. Forecast the above-listed caseloads;
2. Establish, maintain, and expand the appropriate technological interface to access the data necessary to complete the forecasts, including a new data sharing agreement with the Department of Revenue (DOR);
3. Establish, maintain, and expand the processes/systems necessary to organize/manipulate the data into a format that is usable for forecasting purposes;
4. Create a new DOR Working Families' Tax Credit Caseload Forecast Technical Workgroup.

The CFC estimates that these new duties will require 1.0 FTE and related ongoing expenditures to perform approximately 0.5 FTE of work, as current staff have no additional capacity to assume additional workload.

The workload associated with this bill will involve the following:

- Identifying data available to inform the most accurate forecasts, which may range from raw data requiring significant manipulation to well-established data, and likely a combination of both;
- Gaining and maintaining the necessary programmatic expertise for these new caseloads;
- Exploring independent variables to improve explanatory power and accuracy of the forecasts;
- Producing forecasts three times a year and monthly tracking reports of the forecasts;
- Producing any sub-forecasts that are necessary to complete the forecasts;
- Creating a new forecast technical workgroup;
- Providing forecast summary materials, tracking updates, and briefings to stakeholders, including the technical workgroup, formal workgroup, and Council;
- Maintaining the forecast updates on the CFC website to ensure timely and public access to forecast data and tracking;
- Evaluating the accuracy of the forecasts over time using established performance measures;
- Expanding the information systems interface to ensure timely, accurate, and confidential receipt of data utilized in forecast production; and
- Expanding the data infrastructure necessary to organize and manipulate the data into a format suitable for forecasting purposes.

### II. B - Cash receipts Impact

*Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.*

**II. C - Expenditures**

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

There is no additional capacity among current staff to assume the additional workload associated with this bill. The CFC estimates that it will need one full FTE to perform approximately 0.5 FTE of work, for a cost of \$196,000 per year, and \$392,000 for the 2023-25 Biennium and subsequent biennia.

While the analysis indicates a need for 0.5 FTE, the CFC would need one full FTE to complete the work. The CFC is a small agency with 11 employees. There are four forecasters, and the Director and Deputy Director have part-time forecasting duties. Unlike larger agencies, the CFC does not have the economies of scale required to spread the workload of a partial FTE across employees. We are rounding up to one FTE to account for that challenge because we are evaluating this proposal in isolation. The CFC’s actual need should be evaluated in the context of any other legislation impacting the CFC that passes during this session.

The annual cost for 0.5 FTE is \$98,000 per year or \$196,000 for the 2023-25 Biennium, and the breakout by object is provided in the attached document.

Salary, benefits, goods and services, and travel are based on per FTE FY2022 expenditures and FY2023 allotments.

## Part II: Narrative Explanation

### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

*Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.*

#### CURRENT LAW:

The caseload forecast council oversees the preparation of the official state caseload forecasts (RCW 43.88C.020).

#### PROPOSAL:

Beginning with the first official forecast after the effective date of this section, the caseload forecast council will oversee the forecast for the number of people eligible for the working families' tax credit (WFTC). The total number of people eligible for the WFTC should include:

- The number of eligible people with no qualifying children,
- The number of eligible people with one qualifying child,
- The number of eligible people with two qualifying children, and
- The number of eligible people with three or more qualifying children.

#### EFFECTIVE DATE:

The bill takes effect 90 days after final adjournment of the session.

### II. B - Cash receipts Impact

*Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.*

This legislation results in no revenue impact to taxes administered by the Department of Revenue (department).

### II. C - Expenditures

*Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.*

#### FIRST YEAR COSTS:

The department will incur total costs of \$27,200 in fiscal year 2024. These costs include:

Labor Costs - Time and effort equate to 0.2 FTE.

- Respond to questions, compile statistics, and create and maintain tax system models.

#### SECOND YEAR COSTS:

The department will incur total costs of \$25,500 in fiscal year 2025. These costs include:

Labor Costs - Time and effort equate to 0.2 FTE.

- Respond to questions, compile statistics, and create and maintain tax system models.

#### ONGOING COSTS:

Ongoing costs for the 2025-2027 biennium equal \$51,000 and include similar activities described in the second-year costs. Time and effort equate to 0.2 FTE each year.
