Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The bill requires the Office of the Secretary of State (OSOS) to contract with individuals for the purposes of a security test of the voter registration system. Test parameters are delineated.

Prior to initiating the test, the Secretary of State shall seek and receive a waiver from federal authorities to conduct the test.

The OSOS must issue a report on the findings of the test, including recommendations to eliminate the potential for fraudulent voting, by January 1, 2025.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The costs of this bill are indeterminate. The bill requires multiple contracts to conduct a single test. The timing of that test is not identified. although a report with recommendations is due January 1, 2025. At a minimum OSOS will incur costs in FY25 to prepare the report. Previous professional security tests that the Office of the Secretary of State have engaged in were approximately \$100,000 each. To conduct the security test of the system outlined in this bill will likely include similar costs for legitimate tests to be completed and documented.
