Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1 is a new section stating the legislature's intent to expand the residential building code to include residential treatment facilities, which is currently classified under the institutional building code, in order to reduce costs associated with building these facilities.

Section 2 is a new section added to RCW 19.27 that requires the State Building Code Council (SBCC) to immediately adopt the R-4 classification code as detailed under chapter 3, section 310.5 of the 2021 international building code. SBCC will need to adopt this with an emergency rule that would be effective for 120 days. After 120 days, this emergency rule will expire or the SBCC would need to adopt an off-cycle rule permanently. SBCC has already begun work on creating this off-cycle rule; therefore, there is no fiscal impact to the Department of Enterprise Services.

Section 3 is a new section that states this act takes effect immediately.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.
