Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1(1)(a): There is levied and collected a cannabis excise tax equal to:

- (i) 37 percent of the selling price on each retail sale in this state of cannabis-infused products, useable cannabis with a THC concentration less than 35 percent, and cannabis concentrates with a THC concentration less than 35 percent;
- (ii) 50 percent of the selling price on each retail sale in this state of cannabis concentrates and useable cannabis with a THC concentration of 35 percent or greater but less than 60 percent; and
- (iii) 65 percent of the selling price on each retail sale in this state of cannabis concentrates and useable cannabis with a THC concentration greater than 60 percent.

Section 2(1)(b):

- (i) No person including, but not limited to, a cannabis producer, processor, researcher, transporter, or retailer may place, maintain, or distribute, or cause to be placed, maintained, or distributed, any advertisement or marketing material, in any form or through any medium whatsoever, for a product that contains greater than 35 percent total tetrahydrocannabinol.
- (ii) The prohibition in this subsection (1)(b) applies to all forms of marketing and advertising including but not limited to marketing or advertising on web pages, social media, point-of-sale materials in retail outlets, radio, television, email, text messages, flyers, event promotion signs, mail, signs, billboards, and all other forms of advertising or marketing.

Section 3(1)(c):

- (i) Retail outlets may not sell a cannabis product with greater than 35 percent total tetrahydrocannabinol to a person who is under age 25 who is not a qualifying patient or designated provider.
 - (iii) Violations of this subsection (1)(c) are subject to the following penalties:
 - (A) A five-day suspension or \$500 penalty for a first violation;
 - (B) A seven-day suspension for a second violation during a two-year period;
 - (C) A 30-day suspension for a third violation in a two-year period; and
 - (D) Cancellation of license for a fourth violation in a two-year period.

Section 3(5):

- (a) Cannabis retailers must provide point-of-sale information to consumers who purchase any cannabis products, except for useable cannabis, that must include accurate information about the potential harms of consuming high-THC products, including cannabis use disorder, psychotic disorders, and cannabinoid hyperemesis syndrome, populations at elevated risk of experiencing such potential harms, comparative dosing, how to read a label on a cannabis product, where to find help if the consumer feels negative effects, and resources for quitting or reducing cannabis consumption.
- (b) The board must develop optional training for cannabis retail staff who want to better understand the point-of-sale information required to be provided to consumers by this subsection (5). In developing the optional training, the board must consult with cannabis retail staff, consumers, persons who have been harmed from high-THC products, prevention professionals, behavioral health treatment providers, and youth advocates.

Section 4(7):

- (a) A cannabis product that contains greater than 35 percent total tetrahydrocannabinol must include a mandatory health warning label on the product container, in addition to other label information required under this chapter. The mandatory health warning label must be in a font size no smaller than 10-point font, use contrasting colors, and be placed in a prominent location that occupies at least 40 percent of the product container.
- (b) The University of Washington's addictions, drug and alcohol institute in consultation with the board and persons with expertise in public health must develop the content of the mandatory health warning label required under this subsection (7). The content must be tested for comprehension and clarity among persons between the ages of 21 and 24 years old, persons reporting mental health challenges, and persons who identify with historically marginalized groups. The content must include language enumerating the risks associated with the use of high-THC cannabis products such as acute psychotic symptoms,

development of psychotic disorders, cannabinoid hyperemesis syndrome, and cannabis use disorder.

- (8) All cannabis products offered or sold to a consumer must be labeled with the number of serving units of tetrahydrocannabinol included in the package. A single serving unit of tetrahydrocannabinol is 10 milligrams of total tetrahydrocannabinol for purposes of this section. A cannabis product offered or sold in a package that contains more than a single serving unit of tetrahydrocannabinol must be labeled with text stating "CONTAINS MULTIPLE SERVINGS" and identify the number of total serving units in the container. Label information required by this subsection must be displayed on the cannabis product container in black ink with a white background and in a minimum font size of 10-point font.
- (9) In addition to other labeling requirements in this chapter, all cannabis products offered or sold to a consumer must be labeled with an expression of a standard tetrahydrocannabinol unit in volume or amount of product to help a consumer understand or visualize how much of the product to consume for a single serving unit of tetrahydrocannabinol. The board must establish permissible text or images that cannabis licensees may include on product packages to comply with this subsection. By way of example, a permissible expression of a standard tetrahydrocannabinol unit in volume or amount of product for a cannabis product intended to be consumed by inhalation could specify that a serving size should not exceed one inhalation lasting two seconds per serving.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Section 1(1)(a): There is levied and collected a cannabis excise tax equal to:

- (i) 37 percent of the selling price on each retail sale in this state of cannabis-infused products, useable cannabis with a THC concentration less than 35 percent, and cannabis concentrates with a THC concentration less than 35 percent;
- (ii) 50 percent of the selling price on each retail sale in this state of cannabis concentrates and useable cannabis with a THC concentration of 35 percent or greater but less than 60 percent; and
- (iii) 65 percent of the selling price on each retail sale in this state of cannabis concentrates and useable cannabis with a THC concentration greater than 60 percent.

The agency's Cannabis Central Reporting System (CCRS) has the capability for cannabis retailers to report THC percentages on sales to consumers, however, licensees are not required to utilize this functionality and it appears it is used less than 1/10th of the time. Thus, the agency does not have enough data to make an analysis regarding the impact of changing the cannabis excise tax structure would have, so the impact is indeterminate.

Section 3(1)(c):

(i) Retail outlets may not sell a cannabis product with greater than 35 percent total tetrahydrocannabinol to a person who is under age 25 who is not a qualifying patient or designated provider. Violations of subsection (1)(c) are subject to penalties. The agency makes no assumptions regarding increase in penalty revenue.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

FINANCE DIVISION:

Ongoing impact estimate 0.4 FTE Fiscal Analyst 2 (FA2) for additional processing.

- Tax unit will continue to enter sales and tax as we are now in Great Plains (accounting system)- one line for monthly sales and one for total collected excise tax to track receivables.
 - Calculating the separate tax rates in current monthly verification excel spreadsheet.

- Assumption of separate revenue codes for breakdown of taxes collected by tier.

0.4 FTE Fiscal Analyst 2 - \$33,766/yr (\$32,658 salary/benefits, \$1,108 in associated costs).

LICENSING DIVISION:

The agency anticipates needing 1 Program Specialist 4 for 2 years (FY24/25) to support the Package and Labeling Unit with the following:

- Agency rulemaking efforts
- Significant updates to external training materials and agency website information
- Internal training
- Expected significant increase in package and label approval requests. Approximately 4,000 existing products that would need to make changes to be compliant.
- New requirements added to the review process (warning labels, font sizes, etc.) and will likely add to additional back and forth discussion with the licensee.

1.0 FTE Program Specialist 4 - \$107,704/yr (\$104,934 salary/benefits, \$2,770 in associated costs). Onetime costs in FY24 of \$6,105 for equipment purchases.

ENFORCEMENT DIVISION:

The Washington State Liquor and Cannabis Board ("Board") keeps detailed statistics on all of its enforcement activities and tracks this activity using a unit of measure called a Field Increment (FI). All direct enforcement activities such as premise checks, inspections and investigations are tracked to determine how many FI's are needed to accomplish each activity. Each FI is equivalent to 1/10th of an hour (6 minutes). For example, if a tavern premise check takes 2 FI's and two officers, it is anticipated that one check will consume 4 FI's. Using historical data to factor out indirect activities such as driving time, training, office time and leave, it has been determined that officers are available for an average of 4,220 FI's each year.

The anticipated workload impacts of this bill are from complaint investigations, compliance checks & failures, and support and education. Please see the attached "1641 HB High potency cannabis - Enforcement Field Increment Calculator.pdf" for the workload calculations.

0.3 FTE LCB Enforcement Officer 2 - \$36,856/yr (\$32,098 salary/benefits, \$4,758 in associated costs).

0.2 FTE Administrative Regulations Analyst 3 - \$22,147/yr (\$18,975 salary/benefits, \$3,172 in associated costs).

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 5(1): 1,000,000 annually to the Department of Health to issue request for proposals and contract for targeted public health messages and social marketing campaigns directed toward individuals most likely to suffer negative impacts of high-THC products including persons under 25 years of age, persons reporting poor mental health, and persons living with mental health disorders.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

NONE.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

\$1,000,000 annually via bid request for approval for one vendor to implement the full \$1M of work as outlined in the bill.

Messages and media campaigns, and public health messages funded utilizing the \$1,000,000 will include information about risks, comparative dosing of cannabis products, and resources for persons seeking support for quitting or decreasing their intake of tetrahydrocannabinol.

The public health messages and social media marketing campaigns will be developed in partnership with persons targeted by the messages and campaigns, and consultations with professionals proficient in public health communication and in cannabis research.

The department assumes program staff needed to support this will be minimal and in short durations, therefore can be managed within existing resources.

Part III: Expenditure Detail

Biennial Totals

Narrative Explanation (Required for Indeterminate Cash Receipts)

Total

Section 1(1)(a): There is levied and collected a cannabis excise tax equal to:

- (i) 37 percent of the selling price on each retail sale in this state of cannabis-infused products, useable cannabis with a THC concentration less than 35 percent, and cannabis concentrates with a THC concentration less than 35 percent;
- (ii) 50 percent of the selling price on each retail sale in this state of cannabis concentrates and useable cannabis with a THC concentration of 35 percent or greater bulless than 60 percent; and
 - (iii) 65 percent of the selling price on each retail sale in this state of cannabis concentrates and useable cannabis with a THC concentration greater than 60 percent.

The agency's Cannabis Central Reporting System (CCRS) has the capability for cannabis retailers to report THC percentages on sales to consumers, however, licensees are not required to utilize this functionality and it appears it is used less than 1/10th of the time. Thus, the agency does not have enough data to make an analysis regarding the cannabis excise tax structure would have, so the impact is indeterminate.

Section 3(1)(c):

(i) Retail outlets may not sell a cannabis product with greater than 35 percent total tetrahydrocannabinol to a person who is under age 25 who is not a qualifying patier or designated provider. Violations of subsection (1)(c) are subject to penalties. The agency makes no assumptions regarding increase in penalty revenue.
