Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

HB 1529 creates the Washington equine industry reinvestment account, coupled with the general fund as the recipient of the earnings from investments under RCW 43.84.092(4).

In addition, the state treasurer must transfer from the general fund to the Washington equine industry reinvestment account, an amount not to exceed six million dollars, based on information provided by the department of revenue.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

The department of revenue included the transfer estimates in their fiscal note.

Projected cash flows are currently unavailable; therefore, estimated earnings from investments are indeterminable.

There may be an impact on the debt service limitation calculation. Changes to the earnings credited to the general fund impacts, by an equal amount, general state revenues.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Request # 1529-1-1

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This fiscal note only addresses those sections of the bill that impact the Department of Revenue (department).

CURRENT LAW:

The state retail sales and use tax rate is 6.5% on taxable items. The tax applies to the selling price or use of tangible personal property and certain services, including horse-related items and services. With certain exceptions, the revenue is deposited into the general fund.

PROPOSAL:

This legislation creates the Washington Equine Industry Reinvestment account.

Beginning July 1, 2023, and by July 1st of each year thereafter, the State Treasurer must transfer an amount not to exceed \$6 million per fiscal year from revenues deposited into the general fund for the previous fiscal year derived from the imposition of state sales and use taxes on certain equine-related products.

The following products are specifically listed:

- Equines
- Equine feed
- Prescription drugs, over-the-counter drugs, or dietary supplements dispensed or to be dispensed to equines
- Equine tack which includes, but is not limited to, equipment used to ride or care for an equine such as saddles, driving harnesses, girths, cinches, bridles, martingales, halters, lead ropes, whips, long reins, wraps, and other items used in handling and caring for equines
- Horse bedding and grooming supplies
- Other taxable sales directly related to equine ownership, riding, or boarding; and
- Sales of horses including equines claimed at class 1 and class C regulated race meets.

"Equine" means a horse, pony, mule, donkey, or hinny (RCW 4.24.530).

After each biennium, the department may review the transfer amount and may increase based on inflationary calculations.

EFFECTIVE DATE:

This bill contains an emergency clause and takes effect immediately upon the governor's approval.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

ASSUMPTIONS

- Washington state residents own 197,200 horses.
- Average annual cost to own a recreational horse is \$7,896 with an estimated 80% being subject to retail sales tax.
- Horse expenses include feed (hay and grain), pasture maintenance, veterinary care and medicines, farrier services, bedding, building maintenance, training, tack, and other miscellaneous expenses.
- 2017 Census of Agriculture reflects 204 horse sales in Washington with a value of \$92,000.
- Purchases of horses are not considered in this estimate since most sales occur between private parties.
- Horse and non-horse purchases will be difficult to differentiate.
- The \$6 million cap amount will be reached each fiscal year.

Request # 1529-1-1

- Due to the ambiguous language regarding inflationary calculations, this revenue estimate assumes there will be no adjustment to the cap amount in future years.
- The performance audits of government account receives a 0.16% share of the state sales tax (RCW 82.08020(5)). These amounts are excluded from the transfer from the general fund to the new account.
- Currently, tribes with compacts under SHB 2803 (2020) receive a share of state sales tax from compact-covered areas. Under this proposal, it is assumed that compacting tribes will continue receiving the full distribution amounts as described in their revenue sharing compacts.

DATA SOURCES

- Data Paddock, Horse data
- Horses Only, Horse Industry Statistics
- The Farmhouse Tack, "How much does it cost to how a horse overall?"
- Economic and Revenue Forecast Council, November 2022 forecast
- United States Department of Agriculture, 2017 Census of Agriculture

REVENUE ESTIMATES

This legislation decreases the general fund by redirecting certain state retail sales and use tax revenue from equine related sales to the Washington Equine Industry Reinvestment account.

TOTAL REVENUE IMPACT:

State Government (cash basis, \$000):

- FY 2024 - \$ 0
- FY 2025 - \$ 0
- FY 2026 - \$ 0
- FY 2027 - \$ 0
- FY 2028 - \$ 0
- FY 2029 - \$ 0

Local Government, if applicable (cash basis, \$000): None.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

ASSUMPTIONS:

The department will work with interested parties to determine an agreed upon process to estimate the state sales tax collections occurring within the equine industry.

FIRST YEAR COSTS:

The department will incur total costs of \$74,000 in fiscal year 2024. These costs include:

Labor Costs – Time and effort equate to 0.5 FTE.

- Work with interested parties to determine an agreed upon process to estimate the state sales tax collections within the equine industry.
- Estimate the yearly impact on state retail sales tax collections occurring within the equine industry.

Object Costs - \$6,200.

- Acquire additional software licenses and computer support services.
- Training and travel.

SECOND YEAR COSTS:

The department will incur total costs of \$42,000 in fiscal year 2025. These costs include:

Labor Costs - Time and effort equate to 0.3 FTEs.

- Work with interested parties to determine an agreed upon process to estimate the state sales tax collections within the equine industry.
- Estimate the yearly impact on state retail sales tax collections occurring within the equine industry.

Object Costs - \$4,000.

- Renew software licenses and computer support services.
- Training and travel.

ONGOING COSTS:

Ongoing costs for the 2025-27 biennium equal \$84,000 and include similar activities described in the second-year costs. Time and effort equate to 0.3 FTE.

OFM Review: Gwen Stamey	Phone: (360) 790-1166	Date: 01/30/2023

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

House Bill 1529 seeks to provide supplementary funding to support horse racing and the recreational use of horses in Washington by amending RCW 67.16.050 and 67.16.280, adding a new section to chapter 4 82.08 RCW, adding a new section to chapter 67.16 RCW, and repealing RCW 67.16.105

Section 1 authorizes transfers of up to \$6 million each fiscal year of specified Sales and Use taxes for equine-related products to the "Washington Equine Industry Reinvestment Account" created in Section 2.

Section 2 creates the Washington Equine Industry Reinvestment Account. Beginning with the 2024 fiscal year, the legislature intends to annually appropriate an amount up to \$6 million from the Washington equine industry reinvestment account as follows:

- a. An amount sufficient to cover the Commission's operating costs.
- b. Remaining appropriation will be used for the following purposes:
 - i. 10% to support nonprofit Class C race meets.
 - ii. 10% to supplement Washington-bred horses and breeders.
 - iii. 10% to be granted in support of equine activities.
 - iv. 65% to support Class 1 racing associations. With 25% designated for recruitment and shipping of horses to WA from outside the state. The remainder to be used for equine health and safety programs, research, racetrack surface improvements, and long-term maintenance of the racing surface. Additional allocations may be made for veterinary staff, racetrack security, on-duty paramedics, emergency medical technicians, starting gate personnel, race day outriders, purchase of track surface materials, and track safety equipment.
 - v. 5% to the local affiliate and representative of horsemen and women in WA state.

Section 3 amends RCW 67.16.050 reducing daily live racing licensing fees from \$500 to \$200.

Section 4 strikes the repealed RCW 67.16.105 as a provision for funding the Horse Racing Commission Operating Account (169). Additionally, this section strikes language superseded by Section 2 (2) (b) (iii) which authorizes the Commission to grant up to \$300,000 in support of equine activities.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Section 3 amends RCW 67.16.050 reducing the daily live racing licensing fees from \$500 to \$200. This is expected to reduce Operating Account (169) revenue by \$15,000/yr.

Section 4 strikes the repealed RCW 67.16.105 as a source of funding for the Horse Racing Commission Operating Account (169). This is expected to reduce Operating Account (169) revenue by \$734,000/yr.

Combined this legislation would reduce The Horse Racing Commission's receipts by an estimated \$749,000 annually.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

There is an indeterminate element to the fiscal impact of this legislation. Without serious deliberation between the Commission and industry stakeholders, it is difficult to know how much funding is needed to achieve the intended

reinvestment goals outlined in Section 2 (2) (b). After operating costs are covered, up to \$5 million could be utilized for reinvestment.

As Sections 3 & 4 will reduce cash receipts into the Horse Racing Operating Account (169) by \$749,000 annually, the newly created Equine Industry Reinvestment Account will have to pick up at least \$749,000 in existing operating costs each year.

As this legislation encourages growth in equine related activities the Horse Racing Commission will need to grow in response. The Commission will need to expand their operations as follows:

- 1) To manage the reinvestment goals detailed in Section 2 (2) (b), the Commission will hire a Grants & Contracts Supervisor. This Position will be responsible for developing and running a grant program. The program will coordinate reinvestment grants from beginning to end, which includes vetting grant requests, packaging requests for deliberation by the Commissioners, coordinating distribution of granted reinvestment funds, and verifying funds are used appropriately. Salary, Benefits and associated overhead costs for this position are calculated at \$97,976 in the first year.
- 2) With the grants and purse support provided by this legislation, there will be an increase in Class 1 Racing days. The Commissions estimates an 8% increase in Class 1 racing staff hours will be needed to facilitate the expanded racing schedule. Salary and benefits for this expansion are estimated at \$59,040 annually.
- 3) The grants and purse support provided are likely to see the revival of Class C racing at facilities around the state. The Commission will need to regulatory racing staff for these Class C racing events. The Salary, benefits, and travel costs for Class C racing staff is estimated at \$54,948 in the first year.
- 4) With an increase in both Class 1 and Class C racing events the Commission will have to increase the number of samples sent to the lab for testing. Up to 100 additional samples could be sent out for testing with a \$75 per sample price tag. The total cost for increased testing could reach \$7500 annually.

Note: To better understand how these estimates were reached, please see the appended Fiscal Impact Analysis.

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

Account	Account Title	Type	FY 2024	FY 2025	2023-25	2025-27	2027-29
