# **Part II: Narrative Explanation**

## II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

There is no fiscal impact to the Washington State Patrol (WSP).

Section 1 allows a pedestrian to cross a roadway at any point unless a reasonably careful person would realize an immediate danger of collision.

### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

**NONE** 

### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

If the proposed legislation leads to an increase in collisions on state highways, WSP will be called to respond. Since the legislation only applies to areas on a roadway which a reasonable person would not deem as dangerous, we do not expect this to happen.

# **Part II: Narrative Explanation**

### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This bill does not assign any specific responsibility to the Washington Traffic Safety Commission, therefore we project no fiscal impact.

- Sec. 1 Pedestrians can cross any roadway at any point unless they realize there is an immediate danger of a collision.
- Sec. 2 Creates exceptions to directions for pedestrians to obey traffic control devices or police or traffic officers based upon the exceptions in Section 1.
- Sec. 3 Creates exceptions for pedestrians to obey pedestrian control signals based upon exceptions in Section 1.
- Sec. 4 Removes directions for pedestrians not to enter roadway on red/Do Not Walk signal based upon criteria in Section 1.
- Sec 5 Creates a new legal standard that drivers stop for pedestrians at any place and time that they choose to enter a roadway.
- Sec. 6 Removes requirements that pedestrians yield to motorists when they are not in a marked or unmarked crosswalk.
- Sec. 7 Removes the direction to pedestrians to walk facing traffic when they are walking on a shoulder or in a roadway.

### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

No impact.

## II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

No impact

Bill #	5383 SB

## Part 2 – Explanation

This bill relates to pedestrians crossing and moving along roadways:

- Enables a pedestrian to cross a roadway at any point (except as specified throughout this
  act) unless a reasonably careful person would realize immediate danger of a collision –
  either with a moving vehicle, person operating a bicycle, or delivery service.
- Repeals RCW 46.61.230 (Pedestrians subject to traffic regulations).

Implementation of this bill will not have operations or information technology systems impacts. The department will review the driver's guide and website and update as needed. These tasks are typical, routine, and managed within existing resources.

Toutine, and managed within existing resources.

# **Part II: Narrative Explanation**

## II. A - Brief description of what the measure does that has fiscal impact

Briefly describe <u>by section number</u> (sections that will change WSDOT costs or revenue), the significant provisions of the bill, and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency.

Section 1 (1) allows pedestrians to cross a roadway at any point unless a reasonably careful person would realize there is an immediate danger of collision with a moving vehicle, person operating a bicycle, or personal delivery device. (2) supersedes all local rules, regulations, codes, statutes, and ordinances.

Section 2 adds the exception of section 1 to RCW 46.61.050

Section 3 adds the exception of section 1 to RCW 46.61.055

Section 4 adds the exception of section 1 to RCW46.61.060

Section 5 adds language requiring an approaching vehicle to stop and remain stopped to allow the pedestrian to cross the roadway at any point subject to section 1.

Section 6 updates RCW 46.61.240 removing the language of pedestrian changing the RCW to only apply to personal delivery devices crossing a roadway.

Section 7 modifies RCW 46.61.250 removing the requirement of pedestrians walking facing traffic when walking along roadways.

This is different than the currently assumed requirements for the design and operation for a state highway, where typically crossing was assumed to legally occur at intersections only. Because this change is not consistent with state, nor federal design and operational requirements it is not possible to determine what might be required to address, to prevent, guide, or allow for a facility that is reasonably safe for "ordinary travel" when crossing is assumed to be legal at any location and manner.

### Estimates of signage are:

- Installation on an existing pole or post, accessible from the ground (ladder): \$500
- Installation on an existing pole or post, requires a bucket truck: \$750
- Installation on a new ground post: \$1,000
- Installation required on overhead signal pole, requires new signal pole: \$10,000
- Installation required on overhead signal pole, requires new signal pole and foundation: \$50,000

The agency also assumes an increased risk in tort claims due to legal crossing now being able to occur at any location. It is assumed that these crashes will likely increase tort claims against the state for issues of maintenance, design, or operational reasons.

## II. B – Cash Receipts Impact

N/A

### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

This bill allows for pedestrian crossing at any location and on any highway as outlined in Section 1. This proposal is significantly different than is currently assumed for the design and operation for a state highway, where typically crossing was assumed to legally occur at intersections only. Since this proposed change is not consistent with state, nor federal design and operational requirements; it is not possible to determine what might be required to address to prevent, guide, direct or provide for the allow for a facility that reasonably safe for "ordinary travel" when crossing is assumed to be legal at any location and manner. The cost to design and operate the facilities in this manner is also indeterminate.

FNS060 Local Government Fiscal Note

# Part IV: Analysis A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

The proposed legislation would concern pedestrians crossing and walking on roadways.

Subsection 1 (1) would add a new section to chapter 46.61 RCW, specifying that "a pedestrian may cross a roadway at any point unless a reasonably careful person would realize there is an immediate danger of a collision with a moving vehicle, a person operating a bicycle, or personal delivery device." This subsection would also specify that it does not relieve a pedestrian of their duty of exercising due care for their safety, nor does it relieve a road user from exercising due care for the safety of pedestrians in the roadway.

This section would supersede and preempt "all local rules, regulations, codes, statutes, and ordinances to the contrary and in conflict with" the proposed legislation.

Sections 2 through 5 would amend several sections of chapter 46.61 RCW to include exceptions to current rules of the road in order to be consistent with subsection 1 (1) of the bill.

Section 6 would amend RCW 46.61.240, removing pedestrian requirements related to crossing roadways where curb ramps are available, or where a pedestrian tunnel or overhead pedestrian crossing has been providing.

Section 7 would amend RCW 46.61.250, removing requirements for pedestrians to face the direction of traffic when walking or otherwise moving along a roadway under certain circumstances.

Section 8 would repeal RCW 46.61.230, which specifies that "pedestrians shall be subject to traffic-control signals at intersections as provided in RCW 46.61.060."

### B. SUMMARY OF EXPENDITURE IMPACTS

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

The proposed legislation would result in one-time costs to local governments of approximately \$144,315, in addition to some potential indeterminate expenditure imapacts.

According to the Washington Association of Sheriffs and Police Chiefs (WASPC), all local law enforcement officers would need to go through training regarding the modifications this bill would make to existing traffic infractions. WASPC estimates that approximately 15 minutes of training would be required per law enforcement officer. This training would require a one-time cost of \$110,715 for cities and \$33,600 for counties, for a total one-time cost to local governments of \$144,315.

The 2021 Crime in Washington Report conducted by WASPC states that there are 6,710 commissioned officers in police departments and 2,240 commissioned officers in sheriff's departments, for a total of 8,950 commissioned law enforcement employees that would require training. The 2023 Local Government Fiscal Note Program Criminal Justice Cost Model estimates the average hourly salary (including benefits and overhead) for an officer employed by a city to be \$66, and the same figure for an officer employed by a county to be \$60. If every officer in Washington had to complete approximately 15 minutes of training, the cost to local governments would be:

Cities:

6,710 officers X 0.25 hours X \$66 = \$110,715

Counties:

2,240 officers X 0.25 hours X \$60 = \$33,600

Page 2 of 3 Bill Number: 5383 SB

Total:

\$110,715 + \$33,600 = \$144,315

Training materials and time required may differ among different departments, however.

The Association of Washington Cities indicates that cities could potentially face increased liability exposure in cases where pedestrians entering a roadway as would be permitted under section 1 of the proposed legislation were struck and injured or killed. It is unknown what the extent of this liability exposure could be, however, so any resulting expenditure impact is indeterminate.

### C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

The proposed legislation would result in an indeterminate, but likely minimal decrease in local government revenues.

This bill would legalize jaywalking, which is a traffic infraction, a non-criminal violation punishable by a fine of not more than \$250. The fine amounts for jaywalking, as well as the number of tickets issued for jaywalking annually, vary by jurisdiction. While this variability means the revenue loss for local governments statewide is indeterminate, the Association of Washington Cities indicates that this loss would likely be minimal.
