Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Changes from prior version: Substitute Senate Bill 5102 replaces the previous versions subsection 3(4) with new subsections 3(4)(a) and 3(4)(b).

Section 1 (New)

Describes the beneficial outcomes associated with access to technology programs staffed by qualified teacher-librarians. Lack of access disproportionately affects low-income families and families of color. Despite support from the Legislature, there is still a lack of access to these technology programs run by qualified teacher-librarians. This legislation attempts to improve access to such programs while allowing local school boards flexibility in deciding how to implement them most effectively.

Section 2 (New)

Adds a new section to RCW 28A.320 outlining that

- (1) access to school library information and technology programs are required and
- (2) that procedures must exist that describe how students can access these programs.

Section 3

Amends RCW 28A.320.240 and 2015 c 27

- (1) changes "essential academic learning requirements" to "state learning standards".
- (2) replaces permissive language with an explicit requirement that every student in the school district has access to a school library information and technology program.
- (4)(a) Defines "school library info and technology program" as a program that is staffed by a certificated teacher-librarian except as provide under subsection (4)(b) and changes "essential academic learning requirements" to "state learning standards".
- (4)(b) if a school district of the second class has made all reasonable efforts to staff their library information and technology with a certificated teacher-librarian and failed, they may staff it with a noncertificated staff member instead. The legislature encourages any school in this circumstance to partner with a nonprofit or government partner entity to meet this need.

Section 4 (New)

Adds a new section to RCW 28A.320 which requires OSPI to provide data, information, best practices, and other assistance to help facilitate school district implementation of this act.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

No impact to cash receipts.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Section 4 requires OSPI to provide data, information, best practices, and other assistance to help facilitate school district implementation of the act. This will require 1.0 FTE Program Supervisor to implement. The cost is \$167,000 in FY24, and \$152,000 annually thereafter. OSPI assumes the data support component will utilize existing data.

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Changes from prior version: Substitute Senate Bill 5102 replaces the original subsection 3(4) with subsections 3(4)(a) and 3(4)(b).

Section 1 (New)

Describes the beneficial outcomes associated with access to technology programs staffed by qualified teacher-librarians. Despite support from the Legislature, there is still a lack of access to these technology programs run by qualified teacher-librarians. Section 2 (New)

Adds a new section to RCW 28A.320 outlining that

- (1) access to school library information and technology programs are required and
- (2) that procedures must exist that describe how students can access these programs.

Section 3

Amends RCW 28A.320.240 and 2015 c 27

- (1) changes "essential academic learning requirements" to "state learning standards".
- (2) replaces permissive language with an explicit requirement that every student in the school district has access to a school library information and technology program.
- (4)(a) Defines "school library info and technology program" as a program that is staffed by a certificated teacher-librarian except as provide under subsection (4)(b) and changes "essential academic learning requirements" to "state learning standards".

Section 4 (New)

Adds a new section to RCW 28A.320 which requires OSPI to provide data, information, best practices, and other assistance to help facilitate school district implementation of this act.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

There is no impact to cash receipts.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Section 2 requires districts to provide access to a school library and technology programs run by a certificated teacher-librarian. The cost of implementing this section is indeterminate. If districts do not currently have a teacher-librarian and need to hire one at a local school, districts are funded at an average of \$79,623 per certificated staff and the average

district certificated librarian makes \$111,297. Therefore, it could potentially cost districts approximately \$31,674 per staff out of local funds. Districts may also incur additional costs to pay for memberships and PD.

Section 3 requires districts to adopt new policy or amend existing policy to reflect that (1) access to school library information and technology programs are required and that (2) describes how students can access these programs. The cost of implementing this section is indeterminate. Developing a policy could take an estimated 8 to 40 hours to complete. At \$150 per hour, it is estimated to cost between \$1,200 and \$6,000 per school district to implement section 2.

Section 3(4)(b) allows schools to staff their library and technology programs with non-certificated staff if they have been unable to meet this requirement after making all reasonable effort. The language permissively suggests that the school seek a contract with a local partner who could provide certificated teacher-librarians to staff the programs. The cost of doing this is indeterminate as each district has unique local circumstances that would affect the cost and the availability of such contracts.
