The cash receipts and expenditure estimates on this page represent the most likely fiscal impact. Factors impacting the precision of these estimates, and alternate ranges (if appropriate), are explained in Part II.

Check applicable boxes and follow corresponding instructions:

- ☒ If fiscal impact is greater than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete entire fiscal note form Parts I-V.
- ☐ If fiscal impact is less than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete this page only (Part I).
- ☐ Capital budget impact, complete Part IV.
- ☒ Requires new rule making, complete Part V.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1(6)(e): Grants authority to the Department of Social and Health Services (DSHS) to adjust case mix calculation if the Centers for Medicare and Medicaid Services changes the data they provide.

Section 2(3): Increases the direct care minimum from 100 to 111 percent of the median.

Section 2(4): The minimum occupancy for indirect care is 105 percent of the statewide average occupancy of the calendar year prior to the new fiscal year. Only facilities used to calculate the median will be used to calculate the statewide average occupancy. Increases the indirect care minimum from 90 to 92 percent.

Section 2(8)(a): Adjusts the direct and indirect care rebase to occur annually, beginning July 1, 2023.

Section 2(8)(b): Costs must be adjusted for inflation by the skilled nursing facility four quarter moving average percent change for the most recent quarter from the annual market basket index. Old language relating to past years is removed.

Section 2(10)(a): DSHS shall annually review the direct care rates on June 30 and July 1 to calculate the difference. Beginning July 1, 2023, 29 percent of a facility's direct care increase shall be allocated solely for low-wage direct care workers.

Section 2(11)(a): DSHS shall annually review the indirect care rates on June 30 and July 1 to calculate difference. Beginning July 1, 2023, 10 percent of a facility's indirect care increase shall be allocated solely for low-wage indirect care workers.

Section 2(12)(a): Requires DSHS to verify and recover as necessary spending on low-wage workers based upon reports from facilities on the average wage and the hourly wage range for low-wage direct and indirect care workers, which is a separate process from the settlement process in RCW 74.46.022.

Section 2(12)(b): Funds recovered this way are reinvested into the quality incentive component.

Section 2(12)(c): Establishes the data collection, analysis, and use requirements.

Section 3: Requires DSHS to convene a stakeholder workgroup to study the impacts of low-wage funding and report to the legislature by December 1, 2025, on the results and recommendations for expanding the use of low-wage funding or applying new funds to support the provision of benefits to affected workers.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

A portion of the costs incurred to implement this legislation will be funded with federal Title XIX - Medicaid funds.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The direct care minimum is increased from 100 to 111 percent of the median and the rebase now occurs annually. This

results in an increase per year as shown below.

- FY24: \$126,791,000
- FY25: \$67,663,000
- FY26: \$197,533,000
- FY27: \$179,072,000
- FY28: \$369,399,000
- FY29: \$378,604,000

The indirect care minimum is increased from 90 to 92 percent of the median and the rebase now occurs annually. The minimum occupancy for indirect care is 105 percent of the statewide average occupancy of the calendar year prior to the new fiscal year. This results in an increase per year as shown below.

- FY24: \$70,436,000
- FY25: \$56,307,000
- FY26: \$68,996,000
- FY27: \$60,462,000
- FY28: \$77,741,000
- FY29: \$68,266,000

The current skilled nursing facility rate includes a fixed inflation add-on. With the proposed component that inflates the medians annually in this bill, the previous inflation add-on is dropped off. This results in the below reductions.

- FY24: (\$11,858,000)
- FY25: (\$12,181,000)
- FY26: (\$12,181,000)
- FY27: (\$12,181,000)
- FY28: (\$12,215,000)
- FY29: (\$12,181,000)

One FTE is needed to:

- Develop and coordinate work associated with the ongoing review of funds distributed to low-wage workers.
- Assist in the tracking, verification, and recovery process of funds allocated to low-wage workers.
- Participate in the new workgroup and assist with recommendations to the legislature.

The FTE would start October 2023, which results in the below annual costs.

- FY24: 0.8 FTE - \$107,000
- FY25 and beyond: 1.0 FTE - \$134,000

These estimates assume that the wage equity funding and direct care and indirect care median adjustments from the 2022 supplemental budget continue. See attached "5526 SB SNF Rates Model" for more details.
