## **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Sec 3. The legislature finds that ongoing coordination between state agencies, the counties, and the behavioral health administrative services organizations is necessary to coordinate the behavioral health system. To this end, the authority shall establish a committee to meet quarterly to address systemic issues, including but not limited to the data-sharing needs of behavioral health system partners.

The committee must meet quarterly and include a representative from the Office of the Governor.

The Office of the Governor estimates that participation on this committee can be accomplished within current resources and therefore doesn't have a fiscal impact.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

## Part III: Expenditure Detail

III. A - Operating Budget Expenditures

## **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

See attached.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

See attached.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

# Part V: New Rule Making Required

Provisions of the bill that require the agency to adopt new administrative rules or repeal/revise existing rules.

Bill Number: S HB-1515 HCA Request #: 23-160

#### **Part II: Narrative Explanation**

AN ACT Relating to contracting and procurement requirements for behavioral health services in medical assistance programs.

# II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

\*

The proposed substitute makes the following changes:

- Section 2 (2) Adjusts and specifies the timeframe in which the Health Care Authority (HCA) must adopt network adequacy standards from July 1, 2024, to January 1, 2025.
- Section 2 (2) Modifies the list of covered services the standards must address to reflect updated references to service types.
- Section 2 (2) Adds additional considerations to be incorporated in the standards, including how statewide services are utilized cross-regionally and how standards would impact requirements for behavioral health administrative service organizations.
- Section 2 (3) Modifies the requirement that HCA evaluate whether provider administrative burden would be reduced by limiting the number of managed care organizations (MCOs) operating in a region by instead requiring the HCA to identify options that would limit provider administrative burden, including the potential to limit the number of MCOs in a region.
- Section 2 (4)(h) Modifies and consolidates some provisions from the original (7) and removes that previous subsection. Adds comprehensive population-based payment arrangements to the types of value-based purchasing option payment structures.
- Removes Section 2 (6)
- Section 2 (8) (formerly 9) Removes HCA requirement to seek approval from the Centers for Medicare
  and Medicaid services for amendments to expand Medicaid for long-term involuntary inpatient
  treatment, and instead authorizes HCA to explore opportunities to maximize Medicaid funding as
  appropriate.
- Section 2 (9) (formerly 10) Removes county and behavioral provider representation from the scoring phase of a procurement.
- Adds new Section 3 and reference to RCW 71.24.861 in the title to amend provisions related to the Behavioral Health System Coordination Committee by highlighting that the group address data sharing needs of behavioral health system partners.

\*

Section (1) established an intent to ensure robust new standards defining the levels of Medicaid-funded behavioral health service capacity and resources that are adequate to meet the needs, while providing value-based structures that improve equitable access, promote integration of care, and deliver outcomes.

Section 2 (2) (a) Includes a process for regular updates (from MCOs) at least once per year.

Section 2 (2) (b) Includes a process to involve participation from counties and providers for both the development and ongoing updates.

Prepared by: Catherine Rice Page 1 8:58 AM 02/24/23

Bill Number: S HB-1515 HCA Request #: 23-160

Section 2 (2) (c-d) Establishes factors for regional service assessments and monitoring compliance of provider network standards.

Section 2 (3), (4)(d) and (4)(h) Establishes procurement goals related to: evaluating administrative simplification for providers and the number of managed care plans; assessment of 24 hour/7 days a week (24/7) crisis service needs; delegated arrangements in a manner that supports integration; and supporting value-based and capacity based payment models for 24/7 crisis services (and see subsection 8 for related use of directed payments to achieve such goals).

Section 2 (5) Requires the HCA to determine whether the value-based or capacity-based payment models referenced in (4) are more effective than a fee-for-service model.

Section 2 (6) Requires a number of behavioral health network and performance conditions for successful MCO bidders for the future procurement of managed care.

Section 2 (7) HCA shall expand the types of behavioral health crisis services that can be funded with Medicaid to the maximum extent allowable under federal law, including seeking approval from the Centers for Medicare and Medicaid (CMS) services for amendments to the Medicaid state plan or Medicaid state directed payments, especially for 24/7 crisis services model.

#### II. B - Cash Receipts Impact

HCA estimates that the federal split will be different by year, depending on if there are startup costs included, which will change the rates.

II. B - Estimated Cash Rece	ipts to:										
ACCOUNT			FY-2024	FY-2025	FY-2026	FY-2027	FY-2028	FY-2029	2023-25	2025-27	2027-29
General Fund-Medicaid	001-C		384,000	439,000	439,000	324,000	324,000	324,000	823,000	763,000	648,000
		Totals	\$ 384,000	\$ 439,000	\$ 439,000	\$ 324,000	\$ 324,000	\$ 324,000	\$ 823,000	\$ 763,000	\$ 648,000

#### II. C – Expenditures

As the following describes, HCA requires administrative and contract resources, but cannot estimate determinative service cost at this time:

#### I. Administrative costs:

To comply with the bill, HCA requests \$860,000 in Fiscal Year (FY) 2024, \$983,000 in FY 2025, \$983,000 in FY 2026, then \$724,000 each year thereafter.

		Totals	\$ 860,000	\$ 983,000	\$ 983,000	\$ 724,000	\$ 724,000	\$ 724,000	\$ 1,843,000	\$ 1,707,000	\$ 1,448,000

Administrative Costs – HCA requires a total of 4.0 FTE for Fiscal Year (FY) 2024, 5.0 FTE for FY 2025, 5.0 FTE in FY 2026, and 3.0 FTE thereafter as the following describes.

Medicare Programs Division (MPD) requires 1.5 FTE MAPS3 starting in FY 2024, and 2.0 FTE MAPS3 thereafter for ongoing development and maintenance of regional measures and monitoring compliance of these standards, and to work with community providers and partners named in Section 2(2), and other oversight and accountability measures required in other sections of the bill.

MPD requires Network Reporting System (NRS) updates and ongoing licensure fees to carry out the requirements of these new regional behavioral health measures. HCA's current software does not have the capability to meet the new behavioral health service level/regional variance that this bill requires (for example, it currently only supports GPS distance measurement, not road-based geographic measurement to determine actual time and distance for location of Medicaid members and providers networks). In addition, while HCA acknowledges that CMS has discussed changing and improving network requirements, CMS has yet to publish those changes; however, HCA believes any new CMS requirements will not eliminate the need for ongoing support of an NRS, but in fact probably further supports this new system need. HCA has been in contact with a few new system contractors, and estimates costs at \$400,000 for the first year (including startup fees) starting in October 2023, and \$300,000 annually thereafter.

To accomplish the various procurement related requirements, assessment and evaluation noted in Section 2(2), (3), (4), (5), (6), (7), and (9); and the capacity driven funding model and a directed payment application and evaluation under both Section 2(4)(h) and Section2(7), HCA/MPD requires:

- 1) 1.0 FTE Medical Program Specialist 3 (MPS3) through FY 2026 to manage the procurement related activities and policy implementation, such as delegation agreement standards;
- 0.5 FTE WMS1 Contracts Consultant, starting January 2024, and 1.0 FTE WMS1 in FY 2025 and FY 2026, to support the contract related provisions of this bill and conflict of interest requirements in Section 2(10);

Bill Number: S HB-1515 HCA Request #: 23-160

3) \$200,000 in contract resources for FY 2025 and FY 2026 the VBP/capacity purchasing model, including potential directed payment preparation and evaluation for potentially EQRO, actuarial, or other external contractor; and \$100,000 ongoing resources thereafter to accomplish annual evaluation as required by CMS for a Directed Payment. These ongoing resources will support the likely required actuarial and external quality review contractual work orders for the CMS authorized Directed Payment; and HCA will require ongoing funding for 1.0 FTE of a Financial Analyst 3 to assist with financial tracking, journal vouchers, and additional payable work that will be associated with this bill. This position will also focus on reprocurement, value-based purchasing, directed payment, as well as rate design and related work.

HCA will require ongoing funding for 1.0 FTE of a Financial Analyst 3 to assist with financial tracking, journal vouchers, and additional payable work that will be associated with this bill.

Goods and services, travel, and equipment are calculated on actual program averages per FTE.

#### II. <u>Services costs are indeterminate:</u>

Portions of the fiscal note with regard to service costs are indeterminate. The following represents HCA's estimates based on the agency's interpretation of the bill, but estimates of the services are only a proxy for what may result for actual service costs in the future, because actual costs or offsetting costs cannot be determined until the proper analysis and CMS approval has been achieved.

HCA interprets Section 2(7) as requiring the agency to:

- 1) Identify any gaps between what the state currently covers in the Medicaid state plan and what crisis services are eligible for Medicaid under federal rule and submit a state plan amendment if any are identified. HCA anticipates that there are not likely many crisis services not covered today that are Medicaid eligible. If gaps are identified, this could lead to additional services being provided and a fiscal impact to the state. HCA would need to do a comprehensive review before being able to quantify any fiscal impact.
- 2) HCA has determined that crisis services will need to be expanded in order to support 24/7 crisis delivery system; however, as stated, this results in an indeterminate cost at this time. If this section is intended to expand crisis services to ensure needed capacity is met, HCA could estimate as a proxy for needed services, additional children and adult mobile crisis teams 10 children's teams and 5 adult teams would be required based on the SAMSHA Crisis Now Calculator. Each adult team is estimated to cost approximately \$1.27 million per year (including \$111K in startup costs) and each child team is estimated to cost \$1.3M per year (including \$133K in startup costs). In total, HCA estimates \$22.9M in Year 1, and \$20.7M for each year for Year 2 and onwards for mobile crisis teams. This would include the 10 new youth/child teams, 5 new adult teams, enhancement to 10 youth/child teams, and enhancement to 53 adult teams.

HCA will need to explore any rate or rate structure implications of a 24/7 crisis model, including the best method to implement a potential new rate structure, however, HCA is not able to quantify the impact at this time.

HCA is unable to estimate any services impacts that may be driven by the requirements in Section 2(8) to increase MCO accountability for clients who require long-term involuntary behavioral health treatment. Any internal administrative impacts could be accomplished within the resources already noted above.

## **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Passage of this legislation will not impact the Department of Social and Health Services (DSHS) workload or client benefits. Therefore, there is no fiscal impact to DSHS from this bill.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

## **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This bill establishes new standards for Medicaid-funded behavioral health service capacity and resources for Medicaid enrollee treatment needs.

Section 3: Amends RCW 71.24.861 (Behavioral Health System Coordination Committee) to include addressing data-sharing needs of behavioral health partners as part of the work done by the behavioral health system coordination committee. This bill does not create any new work for the Department of Health (department) as it already participates on this committee and therefore expects no fiscal impact.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

FNS060 Local Government Fiscal Note

## Part IV: Analysis

#### A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

Overview: This bill requires that least six months prior to releasing a Medicaid integrated managed care procurement and no later than January 1, 2025, the Health Care Authority (HCA) to adopt regional standards for behavioral health networks managed by managed care organizations (MCO). The standards would ensure access to appropriate and timely behavioral health services for the enrollees of the MCOs within the regional service area. These standards must address each behavioral health services type covered by the Medicaid integrated managed care contract.

Minimum behavioral health services types:

- Outpatient, inpatient, and residential levels of care for adults
- Youth with a mental health disorder
- Outpatient, inpatient, and residential levels of care for adults and youth with a substance use disorder
- Crisis and stabilization services
- Providers of medication for opioid use disorders
- Specialty care
- Facility-based services
- Other providers as determined by the authority through this process

The authority would apply the standards regionally and shall incorporate behavioral health system needs and considerations as follows:

- Include a process for regular updates no less than once per calendar year.
- Provide for participation from counties and behavioral health providers in both initial development and subsequent updates.
- Establishes factors for regional service assessments and monitoring compliance of provider network standards.
- Consider how statewide services are utilized cross-regionally.
- Consider how the standards would impact requirements for behavioral health administrative service organizations (BHASO).

Sec. 1: established an intent to ensure robust new standards defining the levels of Medicaid-funded behavioral health service capacity and resources that are adequate to meet the needs, while providing value- based structures that improve equitable access, promote integration of care, and deliver outcomes.

- Sec. 2: (2) (a) Includes a process for regular updates (from MCOs) at least once per year.
- (2) (b) Includes a process to involve participation from counties and providers for both the development and ongoing updates.
- (2) (c-d) Establishes factors for regional service assessments and monitoring compliance of provider network standards.
- (2) (f) Mandates the consideration of how the standards would impact requirements for BHASOs.
- (3), (4) (d) and (4) (h) Establishes procurement goals related to: evaluating administrative simplification for providers and the number of managed care plans; assessment of 24 hour/7 days a week (24/7) crisis service needs; delegated arrangements in a manner that supports integration; and supporting value-based and capacity based payment models for 24/7 crisis services (and see subsection 8 for related use of directed payments to achieve such goals).
- (4) (j) Directs HCA to take into consideration the demonstrated commitment of MCOs to the use of alternative pricing and payment structures between MCOs and BHASOs during the Medicaid integrated managed care procurement process
- (5) Requires the HCA to determine whether the value-based or capacity-based payment models referenced in (4) are more effective than a fee-for-service model.

Page 2 of 3 Bill Number: 1515 S HB

- (6) Requires a number of behavioral health network and performance conditions for successful MCO bidders for the future procurement of managed care.
- (7) HCA shall expand the types of behavioral health crisis services that can be funded with Medicaid to the maximum extent allowable under federal law, including seeking approval from the Centers for Medicare and Medicaid (CMS) services for amendments to the Medicaid state plan or Medicaid state directed payments, especially for 24/7 crisis services model.

#### **B. SUMMARY OF EXPENDITURE IMPACTS**

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

This legislation would have an indeterminate expenditure impact on behavioral health administrative service organizations (BHASO). BHASOs would be able to provided more behavioral health crisis services to individuals within their regional service areas because this legislation would authorize the Health Care Authority (HCA) to better facilitate the contracting of BHASOs behavioral health services to managed care organizations (MCO) by implementing standards which would ensure MCO enrollees have access to behavioral health services provided by BHASOs within their regional service area. This increase in expenditures for BHASOs is indeterminate because the standards and demand for behavioral health service vary between regional service areas.

BHASOs would also see an increase in expenditures due to the legislations direction of the HCA to expand the types of behavioral health crisis services that can be funded with Medicaid to the maximum extent allowable under federal law. This increase in BHASOs expenditures would be indeterminate due to not knowing how the funds will be dispersed among behavioral health service providers and regional service areas.

#### C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

This legislation would have an indeterminate revenue impact on behavioral health administrative service organizations (BHASO). BHASOs revenue would increase because the legislation requires the Health Care Authority (HCA) to implement standards which ensure the enrollees of MCOs have appropriate and timely access to behavioral health services provided by BHASOs within the regional service area before the HCA can release a Medicaid integrated managed care procurement. However, there is no reliable way to project the increase in revenue for BHASOs because the standards set by the HCA will vary between each regional service area.

Additionally, BHASOs would see an increase in revenue due to the legislations direction of the HCA to expand the types of behavioral health crisis services that can be funded with Medicaid to the maximum extent allowable under federal law. This increase in revenue would be indeterminate due to not knowing how the funds will be dispersed among behavioral health service providers and regional service areas.
