Total \$	1,111,778	1,074,345	2,186,123	835,335	461,980

In addition to the estimates above, there are additional indeterminate costs and/or savings. Please see discussion.

Estimated Capital Budget Impact:

NONE

The cash receipts and expenditure estimates on this page represent the most likely fiscal impact. Factors impacting the precision of these estimates, and alternate ranges (if appropriate), are explained in Part II.

Check applicable boxes and follow corresponding instructions:

- If fiscal impact is greater than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete entire fiscal note form Parts I-V.
- If fiscal impact is less than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete this page only (Part I).
- Capital budget impact, complete Part IV.
- Requires new rule making, complete Part V.

OFM Review: Gwen Stamey	Phone: (360) 790-1166	Date: 03/14/2023

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Differences between ESHB 1282 and original bill:

Section 3(4) is new, that if a supply chain specific environmental product declaration is not available, a product and facility specific report may be submitted and renumbering subsections 4-7 to 5-8.

Section 5(1) removes the language that the Department of Commerce (department) may consult with the University of Washington college of built environments.

Section 6 clarifies the requirements for industry professionals that comprise the technical work group as well as the recommendations the group will provide, including: a low carbon materials manufacturing plan; consistent treatment in reporting for covered products; consideration of product life-cycle assessments incorporated into future reporting; evaluating options for collecting reported working condition information; and approaches to designing lower embodied carbon state building reports.

There are no differences between the ESHB 1282 and the original bill that affect the fiscal impact to the Department of Commerce (department).

Summary of ESHB 1282:

This bill relates to improving environmental and social outcomes with the production of building materials.

Section 3(7) of this bill may require the development of a financial assistance program, subject to available funding. This would create a new funding program with administrative and workload impacts that would depend on the amount of funding provided.

Section 5 of this bill requires the department to develop and maintain a publicly accessible database for covered projects to submit environmental and labor conditions data, by July 1, 2024. The bill also requires the department to further elaborate on covered product definitions, develop clear measurement and reporting standards, create model language for specifications and contracts, and to develop and educational brief. The department may contract for the use of nationally or internationally recognized databases of Environmental Product Declarations (EPDs).

Section 6 of this bill requires the department to convene a technical work group by December 1, 2023. This work group is to include industry professional representatives from design, structural design, and the construction industry, manufacturers of covered projects, environmental groups, a labor union, the minority and women-owned business community, University of Washington College of Built Environments (UWCBE), and state agencies including Department of Enterprise of Services (DES), Washington State Department of Transportation (WSDOT), and Department of Ecology (Ecology).

Section 6(3) of this bill requires the department and the technical work group to submit a report to the legislature and the Governor with a low carbon materials manufacturing plan that includes recommendations on policies to preserve and grow the in-state manufacturing of low carbon materials. This report must also include recommendations for consistent treatment in reporting for covered products and consideration of how product life-cycle assessments conducted by project designers could be integrated into future reporting. This report must be completed and submitted by September 1, 2024.

Section 6(4) of this bill requires the department and the technical work group to submit a report to the legislature and the Governor with recommendations considering policies to leverage public procurement to expand the use and production of

low-carbon materials, to promote high labor standards in manufacturing, and to expand low-carbon materials manufacturing in Washington; for this report the work group must review and summarize data collected pursuant to section 3 of this bill. This report must also include an evaluation of options for collecting working condition information from product suppliers, identify barriers and opportunities to the effective use of the database in Section 5, identify trends in embodied carbon policy and procurement, and recommend approaches to designing lower embodied carbon state building projects. This report must be completed and submitted by September 1, 2025.

Effective date is assumed to be 90 days after adjournment of the session in which this bill is passed.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

General Assumptions:

Section 3—Financial assistance to small businesses for EPDs.

Costs are indeterminate and will depend on the level of funding provided.

Section 5 – Database Development and Supporting Tasks.

The department is required to develop and maintain a publicly accessible database for covered projects to submit environmental and labor conditions data, by July 1, 2024. In addition, the department must further elaborate on covered product definitions, develop clear measurement and reporting standards, create model language for specifications and contracts, and to develop an educational brief.

The department assumes development of a publicly available electronic database will require department staff to participate in the development of the system. After implementation, staff will provide technical assistance, be responsible for user management, system help desk, and be the subject matter expert working with IT staff for maintenance and enhancements.

To accomplish this work the department estimates:

0.10 FTE EMS 3 SEEP Director (208 hours) in FY24 to oversee development of the database and coordinate work with consultants, IT and SEEP Office Staff.

0.70 FTE Management Analyst 5 (1,400 hours) in FY24 and 0.50 FTE (1,044 hours) in FY25-FY29 to participate in the development of the database, provide input on user management, establish the system help desk and be the subject matter expert. This position will also elaborate on covered product definitions, develop clear measurement and reporting standards, create model language for specifications and contracts, and to work with communications staff to develop an educational brief. FY25-FY29 to provide technical assistance to state agencies and consultant teams, support user management, provide expertise, and work with IT on system maintenance and enhancements.

0.10 FTE Communications Consultant 3 (208 hours) in FY24, to support the development of communications materials including the required educational brief, to prepare guidance materials related to reporting standards, to edit materials and ensure that all communications materials meet department standards and guidelines including those related to accessibility.

Database Development:

To complete this work the department assumes the development of the database will require information technology staff to provide oversight on the development, project management, annual maintenance.

In addition to work done by the department, the department assumes that a consultant would be hired to develop the database. The consultant will provide a business analyst, applications developer, and project manager. For a 12-month project, the department estimates the cost of this professional services contract at \$540,000 (2,160 hours) in FY24 and \$470,000 (1,880 hours) in FY25. The department assumes a rate of \$250 per hour for the professional services contracts.

The database will also need to establish a connection and interoperability with the EC3 database operated by Building Transparency. To facilitate this, the department estimates annual costs of \$25,000 starting in FY 24.

To accomplish this work the department estimates:

0.20 FTE Information Technology Business Analyst 3 (416 hours) over 12 months in FY24-FY29 to provide project management and technical advice on development of the electronic database.

0.30 FTE Information Technology Application Developer 5 (550 hours) over 12 months in FY24-FY29 to assist with system development, perform data development, align system with state and agency standards, develop system updates to keep system updated to current business needs, and perform annual system maintenance.

Salaries and Benefits:

FY24: \$ 195,645

FY25-FY29: \$ 147,731 per fiscal year

Goods and Services:

FY24: \$ 13,497

FY25-29: \$ 9,656 per fiscal year

Professional Service Contracts:

Professional services contracts for database development, project management and maintenance costs, these costs include \$25,000 in annual costs to establish a connection and interoperability with the EC3 database.

FY24: \$ 565,000

FY25: \$ 495,000

FY26-FY29: \$ 25,000 per fiscal year

Intra-agency Reimbursement:

FY24: \$ 64,367

FY25-FY29: \$ 48,603

Section 6– Technical Work Group and Legislative Reports

The department is required to submit two legislative reports in consultation with the technical work group.

The report required by Section 6(3) includes a low carbon materials manufacturing plan and must be submitted by September 1, 2024. The report required by Section 6(4) includes recommendations considering policies to leverage public procurement to expand the use and production of low-carbon materials, to promote high labor standards in manufacturing, and to expand low-carbon materials manufacturing in Washington; for this report the work group must review and summarize data collected pursuant to section 3 of this bill. This report must be completed and submitted by September 1, 2025.

These reports will add to the workload of existing staff to convene the work group, develop the low carbon materials manufacturing plan, review data, develop policy recommendations, and to prepare the reports for submittal to the legislature.

To accomplish this work the department estimates:

Meetings:

The technical work group will be convened in December 2023. The department assumes this work group will meet for two hours once a month starting in FY 24 and continuing through FY 25 and part of FY 26. The department assumes meetings will be virtual but could transition to in-person or hybrid meetings.

0.80 FTE Management Analyst 4 (1,600 hours) in FY24-FY26 to convene work group participants, manage meeting logistics, assist with the development of a low carbon materials manufacturing plan and policy recommendations, conduct data analysis and research needed to support working group objectives related to procurement standards, low-carbon construction materials, growth of low-carbon manufacturing, and to analyze and present data collected pursuant to Buy Clean and Buy Fair requirements.

Legislative Report:

0.80 FTE Management Analyst 5 (1,600 hours) in FY24-FY26 to perform research, data analysis, and to complete and submit the report.

0.40 FTE EMS 2 (416 hours) in FY25-FY26 to provide expert policy level consultation on policy recommendations and report development.

Salaries and Benefits:

FY24: \$ 194,060

FY25-FY26: \$ 266,444 per fiscal year

Goods and Services:

FY24: \$ 15,363

FY25-FY26: \$ 19,251 per fiscal year

Intra-Agency Reimbursements

FY24: \$ 63,846

FY25-FY26: \$ 87,660 per fiscal year

Note: Standard goods and services costs include supplies and materials, employee development and training, Attorney General costs, central services charges and agency administration. Agency administration costs (e.g., payroll, HR, IT) are funded under a federally approved cost allocation plan.

Total Costs:

FY24: \$ 1,111,778

FY25: \$ 1,074,345

FY26: \$ 604,345

FY27-FY29: \$ 230,990 per fiscal year

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

Account	Account Title	Type	FY 2024	FY 2025	2023-25	2025-27	2027-29
001-1	General Fund	State	1,111,778	1,074,345	2,186,123	835,335	461,980
Total \$			1,111,778	1,074,345	2,186,123	835,335	461,980

In addition to the estimates above, there are additional indeterminate costs and/or savings. Please see discussion.

III. B - Expenditures by Object Or Purpose

	FY 2024	FY 2025	2023-25	2025-27	2027-29

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

There were no changes in this engrossed substitute version that affected OFM's fiscal impact assumptions from the previous version.

Engrossed Substitute:

Section 7 requires the Office of Financial Management to include in its capital budget instructions, beginning with the instructions for the 2025-2027 biennium, information informing awarding authorities of the requirements of the bill, including the data and information requirements.

The Office of Financial Management updates the capital budget instructions every biennium. The requirements of this bill, if it becomes law, would be incorporated into these updates as part of the agency's regular workflow.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

ES HB 1282 - Public Building Materials relates to environmental and labor reporting for public building construction and renovation material.

Section 3 (1)(a) would require firms that have successfully bid on construction projects to submit environmental product declarations by the following dates:

Beginning July 1, 2024, an awarding authority shall require the selected firm for a contract for a covered project to submit the data required by (a) of this subsection for each covered product used before substantial completion.

Beginning July 1, 2026, an awarding authority shall require the selected firm for a contract for a covered project to submit the data required by (a) of this subsection for each covered product used before the product is installed in the project.

Washington State University expects some minimal costs to communicate the reporting requirements and collect the reports from contractors. It also assumes contractors may pass some of the reporting costs onto WSU. Those amounts are indeterminate but expected to be less than \$50,000.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

ES HB 1282 relates to environmental and labor reporting for public building construction and renovation material.

Section 1 (2) is revised to remove the language stating that Washington’s high environmental standards and procurement practices put manufacturers at a competitive disadvantage and replaces it with “procurement practices should encourage manufacturers and others to meet high environmental and labor standards and reduce their environmental footprint.”

Section 1 (11) is revised to remove the language “ensure that small manufacturers are not put at a competitive disadvantage,” and replaces it with “providing financial assistance to small manufacturers to support the production of environmental product declarations” will help offset costs they might incur when pursuing state contracts.

Section 2 (3) (c) is revised to add “metal deck” to the list of structural steel products.

Section 2 (3) (d) (i) is revised to add a number of engineered wood products to the list.

Section 2 (7) (a) revises the definition of “environmental product declaration” to include that, to the extent feasible, the declarations must be supply chain specific.

Section 2 (11) defines “product and facility specific report.”

Section 2 (15) is revised to remove the definition of wood sourcing information.

Section 2 (16) is revised to remove most of the definition of “working conditions.”

Section 3 (1) (ii) (B) removes the requirement that engineered wood suppliers must report wood sourcing information.

Section 6 lays out the membership and of the technical work group and assigned work of the technical work group. (Formerly referred to as the “buy clean and buy fair” work group.)

Evergreen does not currently have any projects in the works that would be affected by this bill, so there is no fiscal impact.

HB 1282 relates to environmental and labor reporting for public building construction and renovation material.

Section 2 provides definitions of “actual production facility,” “awarding authority,” “covered product,” “covered project,” “department,” “employee,” “environmental product declaration,” “supply chain specific,” “health product declaration,” “Scope 2 greenhouse gas emissions,” “supplier code of conduct” and “working conditions.”

Section 3 (1) states that beginning July 1, 2024, an awarding authority must require the submission of the following data from the contractor for a covered project larger than 100,000 gross square feet: Product quantity; a current environmental product declaration; health product declaration, if any; manufacturer name and location; supplier code of conduct, if any, and office of minority and women-owned business enterprises certification.

Section 3 (1) (b) states that beginning July 1, 2026, an awarding authority shall require in all newly executed construction contracts that the selected firm will submit the data listed in 3 (1) (a).

Section 4 states that by July 1, 2024, and to the extent possible, specifications for a bid or proposal may only include performance-based specifications for concrete used as a structural material. Awarding authorities may continue to use prescriptive specifications on structural elements to support special designs and emerging technology implementation.

Evergreen does not have any planned projects meeting the criteria in this bill. We estimate construction costs will increase as this requirement will create a scarcity of resources and, therefore, an increase in cost. But we do not have any projects affected by it at this time.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

WWU will remain with the same fiscal impact.

Because of the extensive list of requirements under Sec. 3 (1)(a) of this legislation, WWU anticipates additional work will be needed to ensure contractors are in compliance and a likely fiscal impact on qualifying capital projects due to the additional reporting requirements for contractors.

This could result in slightly higher bids based on the additional reporting requirements (~1% of the total construction cost), although the additional costs to capital projects are indeterminate at this time.

WWU anticipates needing an additional .1 FTE for a Project Manager and .1 FTE for a Budget Analyst would be required in order to ensure the reporting and documentation component of this Bill is adhered to as described Section 3(a), 4, and 5.

New Requirements:

Section (3)a states beginning July 1, 2024, an awarding authority must require in all newly executed construction contracts that the selected firm for a construction contract for a covered project larger than 100,000 gross square feet to ask their suppliers to report for each covered product used before substantial completion:

(i) Names and locations, including state or province and country, of the actual production facilities; and
(ii) Working conditions at the actual production facilities for all employees. In cases in which the supplier does not have this information, the selected firm for a contract for a covered project must ask suppliers to provide a report on steps taken to reasonably obtain the data and provide suppliers' self-reports to the awarding authority.

(b) Beginning July 1, 2026, an awarding authority must require in all newly executed construction contracts that the successful bidder for a construction contract for a covered project to meet the requirements of
(a) of this subsection for each covered product used before substantial completion.

(c) The selected firm is not required to verify the information reported by product suppliers pursuant to this subsection.

(d) The selected firm for a contract for a covered project shall meet the requirement in

(a) of this subsection for at least 90 percent of the cost of each of the covered products used in the project.

Sec. 4. By July 1, 2024, and to the extent practicable, specifications for a bid or proposal for a project contract by an awarding authority may only include performance-based specifications for concrete used as a structural material. Awarding authorities may continue to use prescriptive specifications on structural elements to support special designs and emerging technology implementation.

Sec. 5. (1) The department must continue to develop and maintain the publicly accessible database funded by the 2021-2023 omnibus operating appropriations act and created by the department in conjunction with the University of Washington college of built environments for selected firms for contracts for covered projects to submit the data required in section 3 of this act to the department and to promote transparency. The department may consult with the University of Washington college of built environments.

(2) The database maintained pursuant to subsection (1) of this section must publish global warming potential as reported in the environmental product declarations.

3) By July 1, 2024, the department must:

(a) Further elaborate covered product definitions using applicable material industry standards;

(b) Develop measurement and reporting standards to ensure that data is consistent and comparable, including standards for reporting product quantities;

(c) Create model language for specifications, bid documents, and contracts to support the implementation of section 3 of this act.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The additional FTEs (.1 Project Manager and .1 Budget Analyst) are required in order to ensure the reporting and documentation component of this Bill is adhered to Section 3(a) and Section 5. This includes reviewing the project specifications and contract documents to include these reporting provisions. Additionally, the submitted documentation would either be part of the pay app or project close-out, which is extensively reviewed by the Project Manager and Budget Analyst.

The estimated costs for the Project Manager was based on an annual salary of \$102,384 and the Budget Analyst was estimated for a \$76,401 annual salary with benefits estimated at 31%.

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

Account	Account Title	Type	FY 2024	FY 2025	2023-25	2025-27	2027-29
001-1	General Fund	State	23,420	23,420	46,840	46,840	46,840
Total \$			23,420	23,420	46,840	46,840	46,840

III. B - Expenditures by Object Or Purpose

III. C - Operating FTE Detail: List FTEs by classification and corresponding annual compensation. Totals need to agree with total FTEs in Part I and Part IIIA

Job Classification	Salary	FY 2024	FY 2025	2023-25	2025-27	2027-29
Budget Analyst	76,401	0.1	0.1	0.1	0.1	0.1
Project Manager	102,384	0.1	0.1	0.1	0.1	0.1
Total FTEs		0.2	0.2	0.2	0.2	0.2

III. D - Expenditures By Program (optional)

NONE

Part IV: Capital Budget Impact

IV. A - Capital Budget Expenditures

Non-zero but indeterminate cost and/or savings. Please see discussion.

IV. B - Expenditures by Object Or Purpose

Non-zero but indeterminate cost and/or savings. Please see discussion.

IV. C - Capital Budget Breakout

Acquisition and construction costs not reflected elsewhere on the fiscal note and description of potential financing methods.

Non-zero but indeterminate cost and/or savings. Please see discussion.

IV. D - Capital FTE Detail: *FTEs listed by classification and corresponding annual compensation. Totals agree with total FTEs in Part IVB.*

NONE

We anticipate some impacts to capital expenditures based on the additional reporting requirements for contractors that could result in slightly higher bids based on the additional reporting requirements (~1% of the total construction cost).

Note: This is only for projects greater than 100,000 square feet and possibly includes renovations, but that is not specifically mentioned in the bill. Based on this, the number of projects will be small on our campus, but the fiscal impacts are indeterminate at this time.

Part V: New Rule Making Required

Provisions of the bill that require the agency to adopt new administrative rules or repeal/revise existing rules.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The proposed legislation concerns labor and environmental reporting for public construction and renovation materials.

Sec 2(4)(a) - Construction project larger than 50,000 gross square feet as defined in the Washington state building code, chapter 51-50 WAC; or in the Washington state building code, chapter 51-50 WAC.

Sec 2(4)(b) - Building renovation project where the cost is greater than 50 percent of the assessed value and the project is larger than 50,000 gross square feet of occupied or conditioned space as defined in the Washington state building code, chapter 51-50 WAC.

The proposed legislation has no fiscal impact to State Parks. Parks has no currently funded projects or a proposed project in the agency's 10-year capital plan larger than 50,000 gross square feet.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

None.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

None.

OFM Review: Jennifer Masterson	Phone: (360) 810-0117	Date: 03/09/2023

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

No change on fiscal impact between ESHB 1282 and SHB 1282.

This bill is relating to environmental and labor reporting for public building construction and renovation material. Buildings over 50,000 square feet will require contractors to submit extra documentation for the materials provided. Construction or renovations of buildings over 50,000 square feet will require contractors to submit environmental and health product declarations. DNR is not planning any construction of that size in the next six years.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

OFM Review: Kelsey Rote	Phone: (360) 000-0000	Date: 03/10/2023

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The engrossed substitute differs from the substitute in several ways, including:

- Changes the definition of “covered product” and “working conditions”
- Adds a definition for “product and facility specific report”
- Removes definitions for “wood sourcing information”

States that if a supply chain specific environmental product declaration is not available, a product and facility specific report may be submitted.

These changes would not change the fiscal impact when compared to the prior bill.

This bill seeks to reduce embodied carbon in the built environment by tracking climate and other types of pollution impacts into the procurement process for certain construction materials and projects.

Awarding authorities are directed to ask for information on certain construction materials from the selected bidder for a contract.

Section 2

Includes definitions for:

- “Awarding Authorities” – including the Department of Enterprise Services (DES) and Institutions of Higher Education
- “Covered Product” – including structural concrete products, reinforcing and structural steel products and engineered wood products.
- “Covered Project” – construction projects larger than 50,000 gross square feet and building renovation larger than 50,000 gross square feet and the project costs are greater than 50% of assessed value

Section 3

Beginning July 1, 2024, awarding authorities must require the selected bidder for a contract to submit a current environment product declaration (EPD) and other information for covered projects larger than 100,000 gross square feet, used before substantial completion.

Beginning July 1, 2026, awarding authorities must require the selected bidder for a contract to submit a current environment product declaration (EPD) and other information for covered products, used before substantial completion.

If a specific supply chain specific environmental product declaration is not available, a product and facility specific report may be submitted.

Section 5

The bill requires the Department of Commerce to continue to develop and maintain a public database of environmental product declarations.

Section 6

The bill requires the Department of Commerce to convene a technical workgroup and submit a report to the Legislature that includes a low-carbon materials manufacturing plan that recommends policies to preserve and grow in-state manufacturing of low carbon materials and accelerate industrial decarbonization.

Section 7

Beginning with the Capital Budget Instructions for the 2025-27 biennium, the Office of Financial Management must include information informing awarding authorities of the requirements of this bill.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

No cash receipts impact.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

No expenditure impact.

Section 3

Selected bidders for the type of construction projects listed in the bill would be required to submit certain information to the “awarding authority”. The Department of Enterprise Services (DES), is the “awarding authority” for the type of community college and technical college construction projects specified in the bill and it is expected that any increased staffing cost related to working with bidders and for completing the required reports would be incurred by DES and not the college system.

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

NONE

III. B - Expenditures by Object Or Purpose

NONE

III. C - Operating FTE Detail: *FTEs listed by classification and corresponding annual compensation. Totals agree with total FTEs in Part I and Part IIIA.*

NONE

III. D - Expenditures By Program (optional)

NONE

Part IV: Capital Budget Impact

IV. A - Capital Budget Expenditures

Non-zero but indeterminate cost and/or savings. Please see discussion.

IV. B - Expenditures by Object Or Purpose

Non-zero but indeterminate cost and/or savings. Please see discussion.

IV. C - Capital Budget Breakout

Acquisition and construction costs not reflected elsewhere on the fiscal note and description of potential financing methods.

Non-zero but indeterminate cost and/or savings. Please see discussion.

IV. D - Capital FTE Detail: *FTEs listed by classification and corresponding annual compensation. Totals agree with total FTEs in Part IVB.*

NONE

Indeterminate capital budget impact.

It is assumed there would be an increase in the cost of construction because contractors and suppliers will pass along additional costs associated with analysis, reporting, and materials. There is no way to estimate what future costs from contractors and material suppliers will be to comply with the requirements of this bill, therefore the fiscal impact is indeterminate.

Part V: New Rule Making Required

Provisions of the bill that require the agency to adopt new administrative rules or repeal/revise existing rules.
