Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The department of commerce (department) assumes that there will be no grant activities associated with this act if there is no appropriation.

Differences between ESB 5592 and 5592 E SB AMH HCW H1680.1:
New Section 2 remains the same and adds applicable training requirements.

Summary of 5592 E SB AMH HCW H1680.1:

New Section 2 requires the department to establish a four-year grant program (starting no later than 7.1.2024) that assists fitness centers around Washington to be in compliance with Section 1 of this act by acquiring and maintaining one semiautomatic external defibrillator and applicable training requirements..

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

None.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The department assumes costs are indeterminate as no appropriation amount is stated in the bill.

For Illustrative Purposes Only:

This scenario assumes a total appropriation for FY24-27 of \$200,000 per fiscal year that will provide defibrillators and training. In order to make this service available statewide, the department assumes five regional grants per fiscal year that will go to existing training organizations. Most of those funds would be granted regionally to organizations like fire departments or other defibrillation training providers who will instruct fitness center staff and provide defibrillators. The department assumes that the grants will be targeted to fitness centers that have not previously owned a defibrillator.

For illustrative purposes, the department assumes the cost of a defibrillator and training for up to eight gym staff would cost \$3,000. Over the course of the four-year grant program, this would fund approximately 193 facilities statewide if funded at \$200,000 per fiscal year for fiscal years 2024-2027. Defibrillator costs and training costs could increase or reduce the number of defibrillators and training that could be provided. The agency does not know how many fitness centers that qualify in Section 1 currently lack defibrillators and training. We assume we will work with regional grantees to attempt outreach to facilities to make them aware of the new requirements and grant program.

The level of grant funds needed for grantees to train fitness center staff is based on an interview with the American Red Cross, who currently provides these trainings.

New Section 2 (1):

0.1 FTE WMS Band 2 (300 hours) FY24: Will oversee program development, competitive grant announcements and awards in the first year.

0.3 FTE Commerce Specialist 3 (700 hours) FY24-27: Will manage contracts, data collection, invoice review and payments and ensure contractors are trained on how to use the Contract Management System as well as other program management functions.

Salaries and Benefits

FY24: \$49,251

FY25-27: \$34,454 per fiscal year

Goods and Services, Equipment and Travel

FY24: \$4,545

FY25-27: \$4,211 per fiscal year

Grants, Benefits, Client Services

FY24: \$130,000

FY25-27: \$150,000 per fiscal year

For Illustrative Purposes Only:

In FY24 the department assumes that five regional grants will be distributed in the amount of \$26,000 each for a total amount of \$130,000 (five grants x \$26,000 = \$130,000). For FY25-27 the department assumes that five regional grants will be distributed in the amount of \$30,000 each for a total of \$150,000 per fiscal year. (five grants x \$30,000 = \$150,000)

Intra-agency Reimbursements

FY24: \$1,6204

FY25-27: \$11,335 per fiscal year

*Note: Standard goods and services costs include supplies and materials, employee development and training, Attorney General costs, central services charges and agency administration. Agency administration costs (e.g., payroll, HR, IT) are funded under a federally approved cost allocation plan.

Summary of Total Costs:

FY24-27: \$200,000 per fiscal year

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

There is no change in fiscal impact from the previous version of the bill. This amendment proposes a facility type that is exempt from the requirement until January 1, 2025.

This bill adds a new section to chapter 70.54 RCW (Miscellaneous Health and Safety Provisions), requiring fitness centers to acquire and maintain a semiautomatic external defibrillator on the premises.

This bill does not create any new work for the Department of Health (DOH) and therefore is no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.
