Title: **Retired employee health**

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1 amends RCW 41.05.085 (Retired state employee and retired or disabled school employee health insurance subsidy) to clarify application of the retiree health insurance subsidy (known as the explicit subsidy) to reduce an eligible retiree's medical and prescription drug premium; currently, this RCW references a prescription drug premium subsidy only. Language also removes a reference to the Legislature establishing a separate subsidy for members who select a Medicare supplement plan option.

II. B - Cash Receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

NONE

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

Public Employees Benefits Board (PEBB) and School Employees Benefits Board (SEBB) programs

No fiscal impact.

Section 1 of this bill clarifies the application of the Medicare explicit subsidy to the medical and prescription drug health care insurance premiums charged to Medicare-eligible retired and disabled employees and school employees. Current statute refers to the explicit subsidy as a "prescription drug subsidy". This clarification would align long-standing implementation of state operating budget language that applies the explicit subsidy in the same manner to all PEBB Medicare plans.

While this legislation clarifies the application of the subsidy, it does not change the value of the subsidy; therefore, there are no expected fiscal impacts as a result of this legislation. Currently, HCA applies the explicit subsidy to all Medicare-eligible retiree premiums, regardless of plan selection. This legislation will not result in a change to current practices.
