Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This bill creates the Magnetic Resonance Imaging Technologist Certification.

Section 1: Amends RCW 18.84.020 (Definitions) adding nonionizing radiation and magnetic resonance imaging technologi

Section 2: Amends RCW 18.84.080 (Certification – Qualifications) to create a certification for magnetic resonance imaging technologists.

Section 3(5): Amends RCW 18.84.030 (Registration or certificate required) adding certified resonance imaging technologist, CMRIT, or CRT, for persons certified as magnetic resonance imaging technologists to the list of persons who may practice and or represent themselves to the public as a certified radiologic technologist.

Section 4: Amends RCW 18.84.130 (Education Material) to add nonionizing radiation and other imaging equipment maintenance to educational materials and trainings for radiologic technology professions.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Current law, RCW 43.70.250 (License fees for professions, occupations, and businesses.), requires that each professional, occupational, or business licensing program be fully self-supporting, and that sufficient revenue collected through fees to fund expenditures. The calculation of specific fees will happen during rulemaking and a fee proposal will be presented as part of the rules package. For the purpose of this fiscal note, a license fee is estimated at \$150 for the application and \$105 for renewals which is consistent with the radiologic technologist fees. During the rulemaking process, a fee study will be prepared with proposed fees and provided for stakeholder input. The department will monitor the fund balance and will adjust fees over a six (6) year period to ensure that fees are sufficient to cover all program expenditures. Revenue collection will start January 1, 2026.

Based on the Bureau of Labor statistics there are currently 720 magnetic resonance imaging technologists who are licensed radiologic technologists, the department assumes 90% (648) will seek magnetic resonance technologist certification upon implementation of this bill. The radiologic technologist fund balance is sufficient to cover costs associated with preexisting radiologic technologist's initial certification. Based on the growth rate of radiologic technologists, the department assumes a 2.5% growth rate for magnetic resonance imaging technologist certification.

Washington Administration Code (WAC) 246-12-020 (3) states the initial credential will expire on the practitioner's birthday, except for faculty or postgraduate education credentials authorized by law. Initial credentials issued within ninety days of the practitioner's birthday do not expire until the practitioner's next birthday. Based on this WAC, the department assumes 25% of first year applications will need to renew their license in the first year as their birthday will fall outside of ninety days from issuance of initial credential. Ongoing renewals are based on the profession's current renewal rate of the previous year's applications and renewals. Based on radiologic technologist's, the department assumes an 88% renewal rate.

FY 2026 – \$15,000 (143 renewals)

FY 2027 – \$74,000 (94 applications and 570 renewals)

FY 2028 – \$76,000 (96 applications and 585 renewals)

FY 2029 – \$78,000 (99 applications and 599 renewals)

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Rulemaking

The department will develop and adopt rules to establish a magnetic resonance imaging technologist certification. The department anticipates utilizing a team of subject matter experts to implement this bill. This team will consist of the program manager and a community engagement specialist to identify underreached communities and engage them in the rulemaking process. Based on the department's experience with radiologic technologists' rulemaking, the department anticipates rulemaking to be complex. Complex rulemaking will require a rules project coordinator to support subject matter experts and ensure timely completion of rulemaking. This rule package is extended to identify specific groups who have previously had access barrier to engagement with the department as well as giving the department the ability to expand community engagement and conduct additional workshops and listening sessions. This process will include six meetings with interested parties as well as one formal rules hearing, all held virtually, and will take approximately 18 months to complete. The department anticipates providing the rules hearing announcement and materials in both English and Spanish and providing ASL and Spanish interpretation services at the rules hearing.

Costs include staff, associated expenses (including goods and services, travel, intra-agency, and indirect charges), and Office of Attorney General support in the amount of \$9,000.

FY 2025 costs will be 0.3 FTE and \$54,000 FY 2026 costs will be 0.2 FTE and \$29,000

Office of Innovation and Technology (OIT)

Section 2 and 3: Implementation of this bill will require the department to modify the Healthcare Enforcement and Modernization System (HELMS). To accomplish this work, the department will require 49 hours of one-time technical consultation from the product vendor at a rate of \$270 per hour for a total of \$13,000.

FY 2025 costs will be 0.2 FTE and \$41,000 FY 2026 and ongoing, costs will be 0.1 FTE and \$12,000

Office of Customer Service (OCS)

Section 2 and 3: The department will develop a new online and paper license type. Starting FY25 there will be costs for gathering requirements, developing forms, and testing in the credentialing section. The department will certify qualified applicants and assumes 720 initial applicants with a 50% renewal rate.

FY2026 cost will be 0.7 FTE and \$88,000 FY2027 cost will be 0.1 FTE and \$15,000 FY2028 and ongoing, cost will be 0.1 FTE and \$17,000

Office of Investigation and Legal Services (OILS)

Section 2: Based on the department's experience with Radiologic technologists, the department is estimating 2 complaints per year or 0.25% of 664 licensees per year.

The complaint response process includes five steps: 1) intake, 2) assessment, 3) investigation, 4) case disposition, and 5)

adjudication. Staff review the complaint, identify the history of the person complained about, and help assess whether an investigation is needed. In more than half the cases, investigation is needed. The investigator obtains information about the complaint and the respondent and prepares a report detailing the findings. After investigation, the disciplining authority decides whether to pursue legal action. Staff attorneys, paralegals, and other staff work to develop the legal documents and charge the violation. Most cases are settled, and the staff attorney manages that process. If the respondent asks for a hearing, staff must schedule the hearing, and the health law judge considers all legal motions, presides over the hearing, and drafts the final order.

Assuming the above, cost estimates for the complaint response process associated with this bill were calculated using the department's Disciplinary Workload Staffing Model.

FY 2026 and ongoing costs will be \$3,000.

TOTAL COST TO IMPLEMENT THIS BILL:

FY 2025: 0.5 FTE and \$95,000 FY 2026: 1.0 FTE and \$132,000 FY 2027: 0.2 FTE and \$30,000

FY 2028 and ongoing: 0.2 FTE and \$32,000

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

Account	Account Title	Type	FY 2024	FY 2025	2023-25	2025-27	2027-29
