Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

SB 25795 exempts the State of Washington from daylight saving time by implementing year-round Pacific standard time. This act takes effect November 4, 2024. The Office estimates this work can be accomplished within current resources and therefore doesn't have a fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1 – Findings and Intent

Notes the legislature passed SHB 1196 in 2019 authorizing the state to observe daylight savings time year-round if authorized by the United States congress. However, congress has not amended federal law to authorize states to observe daylight savings time year-round. The legislature intends to exercise the rights granted under the uniform time act, and exempt the state of Washington from daylight saving time and remain on standard time year round.

Section 2

The time of the state of Washington and all of its political subdivisions shall be Pacific standard time throughout the calendar year.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The bill does not require any action on the part of the Office of the Secretary of State (OSOS). Therefore no fiscal impact.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1 discusses that US congress has not amended federal law to allow for year-round daylight savings time therefore Washington state is exercising the rights granted under 15 U.S.C. Sec. 260a(a) to remain on standard time year-round.

Section 2 states that all of Washington must be on Pacific Standard Time throughout the calendar year.

Section 3 states that no local entities may adopt provision for the observance of daylight savings time, or anytime other than standard time other than a gubernatorial emergency proclamation during a time of national war.

Section 4 lists the acts that have been repealed.

Nothing in this legislation would create a fiscal impact for the Department of Commerce.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

No fiscal impact; the Department would have no role in implementing this legislation.

Part IV: Analysis

A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

Sec. 2 adds a new section to RCW 1.20 RCW. The time of the state of Washington and all of its political subdivisions shall be Pacific standard time throughout the calendar year, as determined by reference to coordinated universal time.

B. SUMMARY OF EXPENDITURE IMPACTS

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

The legislation would have indeterminate expenditure impacts on local governments.

Assuming that Oregon and Idaho did not adopt year-round Pacific Standard Time, those states would be on a different time zone from Washington for close to nine months of the year. (Currently, daylight saving time starts on the second Sunday in March and concludes on the first Sunday in November. The legislation would result in Washington no longer observing this change.)

According to the Association of Washington Cities (AWC), a possible complication of northwest states being in different time zones would be 911 call routing for residents living close to the borders of Oregon and Idaho. Mobile phones in time zone border areas routinely bounce back and forth based on their cell tower. Local government emergency communications may need to invest in different technology and/or cell towers to ensure that the time shown on a device is accurate for their location, or have some record keeping capability to know what time someone called 911.

In addition, the legislation could impact Washington local government's employee recruitment in border areas. AWC reported that a number of local government employees live just outside of Washington and commute to jobs in the state. Since schedules would be off by an hour, it could impact how commute peak times relate to work and school schedules, creating logistical complications for these employees.

C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

The legislation would have no revenue impacts for local governments.
