1

## **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact on the Courts

The bill would amend statutes related to speed safety camera systems operated and administered by the Department of Transportation. Section 3(14) would exempt the monetary penalty for violations under the bill (RCW 46.63.200) from assessments or fees related to traffic infractions administered by the courts under RCW 46.63.110.

#### II. B - Cash Receipts Impact

None

```
II. C - Expenditures
```

No fiscal impact to the Administrative Office of the Courts or the courts.

## Part II: Narrative Explanation

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

1. The AGO Transportation and Public Construction Division (TPC) has reviewed this bill and determined it will not significantly increase or decrease the division's workload in representing the Washington State Department of Transportation (WSDOT). Under Section 1(1), of this bill the proposed amendments authorize WSDOT and/or Washington State Patrol (WSP) to forward Department of Licensing (DOL) any outstanding (unpaid) violations. Under Section 4(3)(a) of this bill, WSDOT is to procure contracts and adopt regulations so that speed safety camera systems can be placed into operation in state highway work zones by July 1, 2024. With the exception of creating a public-facing website, WSDOT's obligation under Section 4(3)(a) has not significantly changed from its obligation to do the same under ESSB 5272 (RCW 46.63.300). To that end, since July 1, 2023, TPC has been providing legal services to WSDOT in support of its rulemaking and contract work and TPC will continue to do so until the end of the current fiscal year. Consequently, beginning July 1, 2024, we again estimate a total of 10 hours per year in support of WSDOT's operation and administration of the program. The majority of the proposed changes involve enforcement and adjudication and will be handled by WSP and Office of Administrative Hearings (OAH). New legal services are nominal and costs are not included in this request.

2. The AGO Criminal Justice Division (CRJ) has reviewed this bill and determined it will not increase or decrease the division's workload. This bill makes numerous substantive changes to the work zone speed safety camera law that passed the legislature in 2023 as ESSB 5272. CRJ anticipates that these changes will not result additional work beyond what was anticipated for the enactment of ESSB 5272 during the 2023 legislative session. As such, CRJ does not anticipate any fiscal impact from these changes. Therefore, no costs are included in this request.

3. The AGO Licensing & Administrative Law Division (LAL) has reviewed this bill and determined it will not significantly increase or decrease the division's workload. The enactment of this bill will not impact the provision of legal services to DOL. DOL's responsibilities under this bill are mostly limited to providing drivers 120-day notices of noncompliance with speed camera infractions. DOL currently sends 120-day notices for similar driving infractions, DOL already has systems, processes, and rules in place for these notices. While DOL will likely have more 120-day notices to send under this bill, beyond that, the impact is to the agency and its legal services is low. Legal services can be provided with existing resources. New legal services are nominal and costs are not included in this request.

4. The AGO Government Compliance & Enforcement Division (GCE) has reviewed this bill and determined it will not significantly increase or decrease the division's workload in representing WSP. GCE represents WSP in administrative litigation. This bill makes numerous substantive changes to the work zone speed safety camera law that passed the legislature in 2023 as ESSB 5272. The changes in Section 1 and 2 would enable DOL to impair a vehicle's registration for failure to failure to pay penalties assessed as a result of speed safety camera system infractions. GCE does not anticipate any fiscal impact from these changes, as DOL is responsible for vehicle registrations, not WSP.

Sections 3 and 4 would set a specific fine amount of \$124 for first violations after the expiration of any warning period, and \$248 for all subsequent violations, creates a state-wide warning period at the start of the program and with each new work zone camera placement, and clarifies that the monetary penalty is not subject to any of the other statutorily imposed assessments or fees that are applicable other traffic infractions. The fine amounts are consistent with the penalties assessed for existing speed infractions on state highways and in construction zones, GCE does not anticipate any increased litigation as a result of these changes. Section 4 would clarify that the burden of proof at an administrative hearing is by a preponderance of the evidence. Because this change would simply codify the burden that already exists in case law for cases of this type and in the court rules governing speed infractions litigated in courts of limited jurisdiction, GCE does not anticipate any fiscal impact from this change. Section 4 would also enable a person to request a payment plan at any point following receipt of an infraction. GCE assumes that payment plans would be handled by the Office of Administrative Hearings (OAH).

Finally, Section 4 would make numerous refinements and changes relating to the disposition of speed safety camera system infractions and the options a vehicle owner would have upon receipt of an infraction. The changes would result in a process similar to that already in place for infractions litigated in courts of limited jurisdiction. Specifically, this proposal would give vehicle owners who receive an infraction the choice to pay the infraction, admit to the infraction but seek to mitigate the penalty at a hearing, or challenge the infraction at a hearing. A notice of infraction would represent a determination that an infraction has been committed, so the failure to respond to a notice by choosing to pay the penalty or request a hearing would result in a final judgment. Under the existing law, an owner who fails to respond to a notice of infraction will automatically receive an administrative hearing. GCE previously assumed that mitigation would not result in any workload changes. Also, although failures to respond would no longer receive an administrative hearing as they will under existing law, GCE previously assumed that those hearings would utilize minimal Assistant Attorney General (AAG) resources. GCE assumes that any savings realized by not having to be present at calendars to litigate failures to respond would be offset by the need to respond to a small number of more labor intensive motions for reconsideration and motions to vacate default judgments. New legal services are nominal and costs are not included in this request.

5. The AGO Labor and Industries Division (LNI) has reviewed this bill and determined it will not significantly increase or decrease the division's workload in representing the Washington State Department of Labor & Industries (L&I). The enactment of this bill will not impact the provision of legal services to L&I because it does not appear to create any rights, obligations, duties, or other legal consequences specific to the agency. New legal services are nominal and costs are not included in this request.

6. The AGO Civil Rights Division (CRD) has reviewed this bill and determined it will not increase or decrease the division's workload. Therefore, no costs are included in this request.

7. The AGO Solicitor General's Office (SGO) has reviewed this bill and determined it will not increase or decrease the division's workload. Therefore, no costs are included in this request.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

## Part III: Expenditure Detail

## Part II: Narrative Explanation

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Costs are not identified in this fiscal note as the indeterminate costs cannot be projected at a plausible level.

Section 4 sets out four options for those receiving infractions for speed safety camera violations: (a) ignore the infraction, (b) pay the penalty, (c) contest the infraction, or (d) admit fault and request a mitigation hearing. Option (a) will result in an ALJ issuing a final order against the recipient. Options (c) and (d) will result in administrative proceedings up to and including evidentiary hearing. In addition, OAH will have jurisdiction over authorizing and subsequently modifying payment plans.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Indeterminate cash receipts.

As a central service agency, the Office of Administrative Hearings (OAH) bills referring agencies for its costs and collects the revenue into the Administrative Hearings Revolving Account. Cash receipts are assumed to equal costs. OAH will bill the Washington State Department of Transportation for the costs related to this proposed legislation.

These cash receipts represent the OAH's authority to bill and are not a direct appropriation to OAH. Appropriation authority is necessary in OAH's budget.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Indeterminate expenditure impact.

On average, appeals are assumed to require Administrative Law Judge (ALJ) time including prehearing conferences, hearings, order writings, etc. at:

- A. Orders for those who ignore infractions: 0.25 hour of ALJ time per case.
- B. Mitigation hearings: 1.0 hour of ALJ time per case
- C. Contest hearings: 2.0 hours of ALJ time per case.
- D. Payment plan hearings: 2.0 hours of ALJ time per case.

The Washington State Department of Transportation (WSDOT) assumed in the passage of ESSB 5272 in the 2023 Legislative Session to refer 8,000 hearing referrals per FY to OAH. WSDOT is assuming the same number of infractions to be incurred at 257,125. The fiscal impact of the proposed legislation remains indeterminate when compared to ESSB 5272 (RCW 46.63.200) because there is not relevant data available to forecast how many people would continue to speed through work zones and incur a citation.

OAH Agency Workforce Assumptions:

(1) 1.0 Line ALJ will include cost and FTE for 0.15 Senior ALJ (SALJ), 0.15 Lead ALJ (LALJ), 0.6 Legal Assistant 2 (LA2) (Range 40 step L), and 0.25 administrative support represented as a Management Analyst 5 (MA5) (Range 64 Step L).

(2) ALJ salary is based on the ALJ collective bargaining agreement and assumed to be at step L. (Line ALJ-range 70. Senior ALJ-range 74.)

(3) Benefit rates were analyzed by job class and projected using the latest benefit information available.

(4) Goods and services, travel and on-going capital outlays were projected based on historical data for each of the job classifications.

This bill is assumed effective 90 days after the end of the 2024 legislative session.

### **Part III: Expenditure Detail**

#### III. A - Operating Budget Expenditures

	Non-zero but indeterminate cost and/or savings. Please see discussion.
III.	B - Expenditures by Object Or Purpose

## Part II: Narrative Explanation

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

There is no new fiscal impact to the Washington State Patrol (WSP).

The proposed legislation cleans up language regarding the speed safety camera program that passed legislation in the 2023 legislative session. Specifically, it adds a requirement for the Department of Transportation (WSDOT) to develop and maintain a public-facing educational website, establishes the monetary fines associated with infractions from speed safety cameras, and better outlines the options and processes for individuals who receive a Notice of Infraction from a speed safety camera, among other things.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

NONE

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

NONE

## Part II: Narrative Explanation

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1 amends RCW 46.16A.120 to stipulate that each court and government agency with jurisdiction over the use of a speed safety camera system under RCW 46.63.200 may forward to DOL any outstanding Speed safety camera system infractions issued under RCW 46.63.030(1)(f).

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Please see attached fiscal note.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Please see attached fiscal note.

Request #	1
Bill #	6115 SB

#### Part 2 – Explanation

This bill modifies provisions that authorize the Washington State Department of Transportation (DOT) to operate speed safety camera systems in state highway work zones. The Washington State Patrol (WSP) is responsible for the enforcement and adjudication of violations captured by the speed safety camera systems. Violations are reported to the Department of Licensing (DOL). DOL will send letters 120 days prior to the next vehicle registration date for persons with unresolved violations.

#### 2.A – Brief Description Of What The Measure Does That Has Fiscal Impact

Section 1 amends RCW 46.16A.120 to stipulate that each court and government agency with jurisdiction over the use of a speed safety camera system under RCW 46.63.200 may forward to DOL any outstanding Speed safety camera system infractions issued under RCW 46.63.030(1)(f).

#### 2.B - Cash receipts Impact

There are no DOL cash receipts associated with this bill.

#### <u> 2.C – Expenditures</u>

DOL will incur additional postage costs following implementation of the bill. Under RCW 46.16A.120, DOL will receive notice of speed safety camera violations and add them to the vehicle record. The department will issue a letter 120 days prior to the next vehicle registration date for persons who have not resolved the violation. Failure to resolve the violation may result in DOL withholding the vehicle registration renewal.

DOL used the following assumptions for the fiscal estimate:

- DOT estimates that this bill could result in 257,000 additional violations reported to DOL.
- DOL evaluated available data on similar actions taken and found that 17 percent of registered owners received a 120-day letter due to unresolved violations under RCW 46.16A.120.
- Implementation of the bill will not require additional staff resources.

257,000 reported violations per year x 17% = 43,690 new 120-day letters sent

Provisions of the bill that modify RCW 46.20.270 may add administrative reviews resulting from any vehicle registration holds. DOL expects that it can manage additional reviews within existing resources but will monitor activity following implementation and address resource needs in a future budget cycle as necessary.

#### **Information Services:**

DOL's driver and vehicle information management system (DRIVES) is currently configured to issue letters 120 days prior to vehicle registration to persons with certain outstanding violations. The provisions in section 1 of this bill will be managed within the same configuration, therefore no systems changes are required.

#### **Support Services:**

Agency Administrative Overhead is included at a rate of 23.4 percent of the direct program costs. This funding received covers agency-wide functions such as vendor payments, contract administration, financial management, mail processing, equipment management, help desk support, and technical assistance to DOL employees. These indirect costs are shown under object E.

#### Part 3 – Expenditure Detail

## Part II: Narrative Explanation

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

There is no fiscal impact on expenditures for the Department of Social and Health Services (DSHS). This bill modifies the administration, penalty structure, and enforcement of speed safety camera system violations in state highway work zones. Currently, a fee of \$5 is deposited into the Traumatic Brain Injury (TBI) Account for each traffic infraction. Under this proposal, infractions issued as civil penalties associated with a speed safety camera system in state highway work zones will not result in funds deposited into the TBI account. This will result in an indeterminate impact to cash receipts to the TBI account.

#### II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

This bill will result in an indeterminate impact to cash receipts. Under this proposal, infractions issued as civil penalties associated with a speed safety camera system in state highway work zones will impact in funds deposited into the TBI account.

#### II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

## Part III: Expenditure Detail

<b>Bill Number:</b> 6115 SB	Title: Concerning Speed Safety Camera Systems on State Highways	Agency: 405-Department of Transportation
-----------------------------	--	--

## **Part I: Estimates**

No Fiscal Impact (Explain in section II. A)

If a fiscal note is assigned to our agency, someone believes there might be, and we need to address that, showing why there is no impact to the department.

$\boxtimes$	Indeterminate Cash Receipts Impact (Explain in section II. B)
	Indeterminate Expenditure Impact (Explain in section II. C)
	If fiscal impact is less than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete entire
	fiscal note form Parts I-V
	If fiscal impact is greater than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete
	entire fiscal note form Parts I-V
	Capital budget impact, complete Part IV
	Requires new rule making, complete Part V
	Revised

#### **Agency Assumptions**

The assumptions guiding this fiscal note are expected to change over time and must be reassessed annually as the program expands. There are several indeterminate factors at play. Needs for program expenditures and revenues will change future projections based on successful program expansion.

The department has developed a draft tiered infraction schedule, based off the infractions issued for High Occupancy Vehicle Lane violations.

- 1. <u>\$124 for the first violation</u>.
- 2. <u>\$248 for the second violation, and for each violation thereafter.</u>
- 3. Only a written warning may be issued for a violation of this section during the 30-day period after the first speed safety camera system is placed; and thereafter, during the 17-day period after placement of a speed safety camera system at a new long-term state highway work zone, as defined by the department of transportation.
  - a. <u>A warning period is not tolled if the speed safety camera system is not in operation continuously or is</u> <u>moved from a state highway work zone during the warning period.</u>

The department has developed the following method to arrive at estimated hours for processing potential infractions:

- It is estimated that each infraction will take two minutes to process.
- The time to review estimate is calculated monthly by multiplying the number of **<u>potential violations</u>** by the time to process each infraction (two minutes), calculating the total number of minutes needed to review infractions in a month. This is then divided by 60 minutes / hour to calculate the number of hours per month.
- The FTE number takes that number and divides it by 200 hours / month.

The fiscal impact of the proposed legislation is still indeterminate when compared to ESSB 5272 (RCW 46.63.200) because there is not relevant data available to forecast how many people would continue to speed through work zones and incur a citation.

Washington (7.8 million) / Pennsylvania (12.9 million) = 60.5%

Infractions in Pennsylvania = 425,000 x.605 = 257,125 estimated for Washington

Section 4(3a) directs WSDOT to develop and support a SSCS public facing website – Development costs of \$20,000 are estimated. These funds will cover the costs of buying website domain name, website development, translations services, and equity outreach. The department also estimates an added \$5,000 per year for the life of the program to help with needed

# The cash receipts and expenditure estimates on this fiscal template represent the fiscal impact. Factors impacting the precision of these estimates, and alternate ranges (if appropriate), are explained in Part II.

## **Part II: Narrative Explanation**

#### II. A - Brief description of what the measure does that has fiscal impact.

Briefly describe <u>by section number</u> (sections that will change WSDOT costs or revenue), the significant provisions of the bill, and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency.

**Summary:** RCW 46.63.200 authorizes the Washington State Department of Transportation (WSDOT) to run speed safety camera systems (SSCS) in state highway work zones. Under the law, the Washington State Patrol manages the enforcement and adjudication of violations captured by the speed safety camera systems. Both agencies must work together to implement the law by July 1, 2024.

In this agency request legislation, WSDOT is proposing to amend RCW 46.16A.120, 46.20.270, 46.63.110 and 46.63.200.

#### Section-by-Section Explanation of Proposed Substantive Amendments:

**Section 1 (RCW 46.16A.120):** The proposed amendments authorize WSDOT and/or the Washington State Patrol(WSP) to forward to the Department of Licensing (DOL) any outstanding (unpaid) violations, which enables DOL to impair the vehicle's registration if the registered owner of the vehicle fails to pay any outstanding infraction penalties prior to the date of registration renewal. DOL currently has the authority to impair vehicle registration for outstanding infractions issued for violations of the photo toll system under RCW 46.63.160, as well as violations generated by automated traffic safety cameras and school bus safety camera systems under RCW 46.63.170 and RCW 46.63.180, respectively. The proposed amendments allow DOL to treat a failure to pay the penalty imposed under RCW 46.63.200 in the same manner as other failures to pay penalties generated by automated traffic camera systems.

Section 2 (RCW 46.20.270): The proposed amendments also authorize the Office of Administrative Hearings (OAH) to send to DOL any failures to respond, failures to pay a penalty, or failures to appear at a hearing to contest infractions issued for a violation of RCW 46.63.200. OAH currently has this authority for photo toll system violations under RCW 46.63.160. These proposed amendments work together with the proposed amendment to RCW 46.16A.120 to enable DOL to impair vehicle registrations for outstanding penalties.

Section 3 (RCW 46.63.110): This law requires various assessments and fees to be collected in addition to monetary penalties for violations under Chapter 46.63 RCW. The proposed amendment exempts the collection of these assessments and fees for speed safety camera system violations under RCW 46.63.200. With this change, the registered owner of a vehicle receiving one of these violations will pay the monetary penalty set by statute under RCW 46.63.200, with no added assessments or fees.

#### Section 4 (RCW 46.63.200):

**Subsection (3)(a):** The proposed amendment requires WSDOT to create a website that will educate the traveling public about the operation of speed safety camera systems. It is expected that an increased awareness and understanding of the speed safety camera systems prior to and during their operation will positively condition driver behavior in state highway work zones.

**Subsection (4)(a):** The proposed amendment clarifies the prohibited conduct that will result in a violation of this statute.

**Subsection (5):** The proposed changes in this subsection relate to the penalty structure for a violation of the statue. First, this bill sets up the monetary penalties for speed safety camera system violations. A first violation will result in a \$124 penalty, while every violation thereafter will result in a \$248 penalty.

Second, during the 30-day period following placement of the first camera system in the state, only written warnings may be issued. A statewide warning period has preceded enforcement of other new traffic control laws, such as the hands free (cell phone) law and seatbelt law.

Third, in addition to and after the statewide 30-day warning period at the start of the program, a 17-day warning period will go into effect after the placement of a speed safety camera system in a new "long-term state highway work zone," as defined in rule by WSDOT.

Finally, the 30-day and 17-day warning periods are not tolled whether the camera system is moved or not in continuous operation during the entire warning period. For example, if a camera system is set up in new long-term Work Zone A for 10 days, is moved to existing Work Zone B for 2 days, and is then moved back to Work Zone A, the 17-day warning period for Work Zone A would not stop for the 2 days that the camera system was in Work Zone B.

**Subsection (6):** The proposed changes in subsection 6 relate to the disposition of speed safety camera system infractions and the options a vehicle owner has upon receipt of an infraction.

First, this legislation clarifies that upon receipt of an infraction, the vehicle owner has the choice to pay the infraction, admit to the infraction and continue to a hearing before OAH to explain mitigating circumstances, or challenge the infraction at a hearing before OAH. This new language closely tracks with language in existing speed infraction statues and the Infraction Rules for Courts of Limited Jurisdiction (IRLJ). It also codifies the right of a litigant to seek mitigation, which advances the concepts of equity and fairness.

Second, the proposed amendments clarify that a notice of infraction will represent a determination that an infraction has been committed, and the failure of a vehicle owner to respond to a notice of infraction and elect one of the three identified options for resolution will result in a final judgment without the need for an administrative hearing. This corrects an issue in the existing statute, which provides that if a vehicle owner does not respond to a notice of infraction within 30 days, the infraction will automatically be referred to OAH for a full administrative hearing. The proposed amendments adopt provisions in existing speed infraction statues and the IRLJs to streamline the adjudication process and increase the effectiveness of the program.

Third, the changes clarify that the issuing agency has the burden of proving a violation by a preponderance of the evidence. This mirrors language in existing statues for hearings in courts of limited jurisdiction.

Finally, language has been added that will enable a person to request a payment plan at any point following receipt of an infraction.

### II. B – Cash Receipts Impact

The legislation proposes a draft tiered infraction schedule, based off the infractions issued for High Occupancy Vehicle Lane violations.

- 1. <u>\$124 for the first violation</u>.
- 2. <u>\$248 for the second violation, and for each violation thereafter.</u>
- 3. <u>Only a written warning may be issued for a violation of this section during the 30-day period after the first speed safety camera system is placed; and thereafter, during the 17-day period after placement of a speed safety camera system at a new long-term state highway work zone, as defined by the department of transportation.</u>
  - a. <u>A warning period is not tolled if the speed safety camera system is not in operation continuously or is</u> moved from a state highway work zone during the warning period.

Cash receipts are indeterminate due to several factors including WSP's ability to staff the work and human factors in compliance and recidivism rates. However, revenues generated from the program could be estimated at \$19 million annually based on using six camera systems and approximately 257,000 infractions issued from July 1, 2024, through June 30, 2025. The attached <u>spreadsheet</u> with backup calculations was developed since the original bill passed. Prior to the original bill passing, the fine structure was not decided between WSDOT and WSP. The new revenue assumptions are based on having this fine structure in place as part of the technical update bill.

#### II. C – Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

Section 4(3a) directs WSDOT to develop and support a SSCS public facing website – Development costs of \$20,000 are estimated. These funds will cover the costs of purchasing website domain name, website development, translations services, and equity outreach. The department also estimates an added \$5,000 per year for the life of the program to help with needed website maintenance. Since these costs are minimal, the department will absorb within this program's funding.

#### Washington State Patrol - Infraction Certification Costs

The fiscal impact on WSP will be reflected in WSP's fiscal note.

#### Office of Administrative Hearings – Adjudication costs

The fiscal impact of hearings will be reflected in WSP's and OAH's fiscal notes.

## Part III: Expenditure Detail

#### III. A - Expenditures by Object or Purpose

N/A

## Part IV: Capital Budget Impact

N/A

## Part V: New Rule Making Required

*Identify provisions of the measure that require the agency to adopt new administrative rules or repeal/revise existing rules.* 

Section 3. would require rulemaking in several areas, including around adjudication, when mitigating circumstances are allowed, and other issues.

FNS060 Local Government Fiscal Note

## Part IV: Analysis A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

Section 1 of the proposed legislation would amend RCW 46.16A.120, specifying that any court or government agency having jurisdiction over a speed camera safety system under RCW 46.63.200 may forward infractions detected by that system to the Department of Licensing.

Section 2 of the proposed legislation would amend RCW 46.20.270, specifying that under certain conditions, state agencies or municipalities may forward the record of citations issued under RCW 46.63.200 to the Department of Licensing.

Section 3 of the proposed legislation would amend RCW 46.63.110, specifying that the monetary penalties for a violation of RCW 46.63.200 are not subject to assessments or fees provided under RCW 46.63.110.

Section 4 of the proposed legislation would amend RCW 46.63.200, adding language related to the enforcement and adjudication of infractions detected by speed camera safety systems in state highway work zones, and the administration of such systems.

### **B. SUMMARY OF EXPENDITURE IMPACTS**

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

The proposed legislation would have no impact on local government expenditures.

RCW 46.63.200 specifies that the Department of Transportation is responsible for all actions related to the operation and administration of speed camera safety systems in state highway work zones, and that the Washington State Patrol is responsible for the enforcement and adjudication of speed violations under this section. Accordingly, the Washington Association of Sheriffs and Police Chiefs does not anticipate this bill will have any impact on local law enforcement expenditures.

#### C. SUMMARY OF REVENUE IMPACTS

*Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.* 

The proposed legislation would have no impact on local government revenues.
