Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

SHB 1990 creates the statewide imagery services account, coupled with the general fund as the recipient of the earnings from investments under RCW 43.84.092(4).

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Projected cash flows are currently unavailable; therefore, estimated earnings from investments are indeterminable.

There may be an impact on the debt service limitation calculation. Changes to the earnings credited to the general fund impacts, by an equal amount, general state revenues.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Differences between SHB 1990 and the original bill:

Section 4 is amended regarding the tribal consultation process. WaTech must collaborate with representatives of tribal governments on whether they would opt-in to the collection and distribution of aerial images on tribal lands. WaTech must also identify a timeline and process for tribal government participation, and tribal governments must notify WaTech whether aerial images of tribal lands may be accessed by other units of government.

The proposed substitute would not create additive expenditure impacts on the Department of Commerce (department).

Summary of SHB 1990:

The intent of the proposed legislation is to implement the recommendations of the 2023 aerial imaging study, which provides steps to expand the state's aerial imaging program at WaTech.

Section 2 requires that WaTech establish the Washington State Aerial Imaging Program for state, local and tribal governments. Subject to appropriation, WaTech would establish the program, and may do so in consultation with the department.

Sections 3 through 5 detail requirements, timeline and reporting for the Washington State Aerial Imaging Program.

Section 6 establishes the Statewide Imagery Services Account in the state treasury. Amounts may only be spent after appropriation and for the purposes of implementing Sections 2 through 5 of this act.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

There is no impact to the department. The department assumes the Commerce Research Services team would provide consultation to WaTech, as needed, resultant from their work to produce the 2023 aerial imaging study. The department assumes that the consultation will be de minimis with a few meetings or conference calls and can achieve this work with minimal additional staffing impacts.
