## Part II: Narrative Explanation

### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

*Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.*

Section 2 amends RCW 36.70A.050, of the Growth Management Act (GMA), revising the statutory authority of the Department of Commerce (department) for developing guidance. It adds a new requirement for the department to consult with the Department of Fish and Wildlife (DFW) regarding conservation and protection of anadromous fisheries in critical areas, utilizing guidance developed under RCW 36.70A.172.

Section 3 amends RCW 36.70A.172, of the GMA, to add a new requirement for the DFW to adopt conservation and restoration guidelines in order to assist counties and cities in the preservation and enhancement of anadromous fisheries. The section further outlines the guideline details. The DFW must complete the guidelines by January 1, 2025, to allow counties and cities to update critical areas policies and development regulations as part of their next periodic review or implementation progress report, required under RCW 36.70A.130.

Section 4 amends RCW 36.70A.130, of the GMA, to add new language to the periodic update schedule for local comprehensive plans and development regulations, which requires counties and cities to adopt guidelines under Section 3 of this legislation. The new provision further outlines the timeline for counties and cities to adopt the new guidelines, under the next required implementation progress report or periodic update deadline within this subsection.

Section 5 adds a new section RCW 36.70A, to the GMA, requiring the department and the DFW to review and report to the legislature, by December 30, 2029, on county adoption of critical areas policies and development regulations that implement the guidelines for the preservation and enhancement of anadromous fisheries under section 3 of this legislation.

### II. B - Cash receipts Impact

*Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.*

### II. C - Expenditures

*Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.*

Agency Assumptions:

Sections 2-5 – Local Government Division

- The department assumes for purposes of this fiscal note, that consultation with the Department of Fish and Wildlife (DWF) will require staff time, adding staff 0.5 FTE in FY25 to complete updates to it's GMA technical assistance for counties and cities, including staff coordination for rulemaking to revise existing UGA planning guidance for local governments.
- The department assumes it will coordinate work with DFW for the legislative report due by December 30, 2029, beginning in FY29. This would be a one-time report and staff time on county and city adoption of critical areas policies and development regulations that implement the guidelines for the preservation and enhancement of anadromous fisheries under RCW 36.70A.172.

0.3 FTE Commerce Specialist 3 (626 hours) in FY25, and 0.2 FTE (418 hours) in FY29, to review and provide initial technical assistance and guidance updates, including outreach with stakeholder counties and cities in consultation with DFW, under the GMA technical assistance authority for the department. The FY29 workload will be initial support work

with DFW for the legislative report due December 30, 2029.

0.1 FTE Management Analyst 4 (626 hours) in FY25, to provide coordination and support for rulemaking and guidance updates, outreach and engagement.

Salaries and Benefits:

FY25 \$46,732  
FY29: \$23,112

Goods and Services:

The department assumes Assistant Attorney General consultation for guidance and rulemaking development for the new program of \$10,500 in FY25, will be required to complete rulemaking, based on an estimate of 50 hours at \$210 per hour.

FY25: \$14,336  
FY29: \$1,917

Travel Costs:

Includes outreach to communities across the state to provide technical assistance and outreach for UGA planning for counties and cities impacted statewide. FY25 travel will consist of 10 days of outreach and engagement, with half of them requiring lodging due to outreach and engagement to Eastern Washington, which includes additional travel in support of community consultation.

FY25: \$2,475

Intra-agency Reimbursements:

FY25: \$15,375  
FY29: \$7,604

Note: Standard goods and services costs include supplies and materials, employee development and training, Attorney General costs, central services charges and agency administration. Intra-agency-agency administration costs (e.g. payroll, HR, IT) are funded under a federally approved cost allocation plan.

=====  
Total Local Government Division Costs:

FY25: \$78,918  
FY29: \$32,633

## Part II: Narrative Explanation

### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

*Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.*

Sect. 3(1)(b)(ii) directs WDFW to adopt conservation and restoration guidelines in order to assist counties and cities in the preservation and enhancement of anadromous fisheries.

Sect. 3(1)(c)(iii) directs WDFW to consult with tribal fisheries restoration experts and other interested parties as required under RCW 36.70A.050(2) in developing the guidelines under this subsection.

Sect. 3(1)(c)(v) directs WDFW complete the guidelines by January 1, 2025, in order to allow cities and counties to update critical areas policies and development regulations as part of their next periodic review or implementation progress report as required under RCW 36.70A.130.

Sect. 4 (b)(i) directs cities and counties to review and update critical area policies and development regulations in order to implement the guidelines. As a result, cities and counties will need ongoing technical assistance from WDFW.

Sect. 5 directs WDFW to review and report to the legislature in compliance with RCW 43.01.036 on county and city adoption of critical areas policies and development regulations that implement the guidelines for the preservation and enhancement of anadromous fisheries under RCW 36.70A.172.

### II. B - Cash receipts Impact

*Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.*

### II. C - Expenditures

*Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.*

Sect. 3(1) requires WDFW to develop and adopt, by January 1, 2025, conservation and restoration guidelines that assist counties and cities to preserve or enhance anadromous fisheries. Existing WDFW headquarters resources/staff will oversee development/adoption of guidelines, including tribal/stakeholder engagement; contract management of consultant workforce; and roll-out of guidelines. Anticipated consultant teamwork is as follows:

Professional Services Contracts, Object C, is \$600,000 in FY 2025 for a consultant team to assemble conservation and restoration guidelines that address Section 3(1)(b)(ii)(A)(B)(C) of the bill.

Expedited contract work will be conducted from June 6, 2024 - January 1, 2025 (or preferably, June 30, 2025), to evaluate the existing WDFW and other agency guidance and data, assemble the relevant pieces to present them online in a way that assists local jurisdictions to incorporate the data and guidance, and develop limited additional guidance where there are gaps in existing materials (time permitting). Contract costs could come down if additional time was allowed for WDFW to complete/adopt the new guidelines (i.e., a full year). The consultant will also make recommendations about which aspects of local jurisdictions' plans and ordinances generally are the most relevant places to incorporate the various data and guidance.

Section 4(b) will require WDFW staff to provide technical assistance to local jurisdictions with interpreting and incorporating the new guidelines into updated policies and regulations during their next GMA update and then to assist with implementation of those policies and regulations at the project level. Job classifications and their associated work are as follows:

6.0 FTE Environmental Planner 3s (EP3s, one per region) in FY 2026 and ongoing, responsible for providing dedicated, direct technical assistance to counties and cities as they work to incorporate the new WDFW guidelines into their comprehensive plans and development regulations. These staff will be hired to coincide with the completion of the guidelines (preferably June 30, 2025).

Salaries and benefits total \$707,000 in FY 2026 and ongoing.

Goods and services, Object E, includes \$7,000 per FTE, per year, for WDFW standard costs, which cover an average employee's supplies, communications, training, and subscription costs per year.

An infrastructure and program support rate of 36.03% is included in object T and is calculated based on WDFW's federally approved indirect rate.

**Part III: Expenditure Detail**

**III. A - Operating Budget Expenditures**

# LOCAL GOVERNMENT FISCAL NOTE

Department of Commerce

Bill Number: 6143 SB

Title: Salmon habitat planning

## Part I: Jurisdiction-Location, type or status of political subdivision defines range of fiscal impacts.

### Legislation Impacts:

- Cities: Cities would be required to update their critical areas ordinance with guidelines developed by the Department of Fish and Wildlife, in consultation with the Department of Commerce. Planning, implementation, public hearings, and adoption of the critical areas ordinance are estimated at \$80,000 per city.
- Counties: Same as above for counties. Planning, implementation, public hearings, and adoption of the critical areas ordinance are estimated at \$260,000 per county.
- Special Districts:
- Specific jurisdictions only: Only impacts jurisdictions with anadromous fisheries and critical areas.
- Variance occurs due to:

## Part II: Estimates

- No fiscal impacts.
- Expenditures represent one-time costs:
- Legislation provides local option:
- Key variables cannot be estimated with certainty at this time: The scope and scale of the requirements of the new guidelines would not be known until January 1, 2025. The number of jurisdictions that would not be required to update their critical areas ordinances with the new guidelines.

### Estimated revenue impacts to:

None

### Estimated expenditure impacts to:

Non-zero but indeterminate cost and/or savings. Please see discussion.

## Part III: Preparation and Approval

Fiscal Note Analyst: Jordan Laramie	Phone: 360-725-5044	Date: 01/25/2024
Leg. Committee Contact: Karen Epps	Phone: 360-786-7424	Date: 01/17/2024
Agency Approval: Allan Johnson	Phone: 360-725-5033	Date: 01/25/2024
OFM Review: Cheri Keller	Phone: (360) 584-2207	Date: 01/25/2024

## **Part IV: Analysis**

### **A. SUMMARY OF BILL**

*Description of the bill with an emphasis on how it impacts local government.*

This legislation would require cities and counties that plan under the Growth Management Act to adopt guidelines for the conservation and protection of anadromous fisheries in critical areas. In doing so, these jurisdictions must adopt land use regulations, enact incentives, and establish other measures and policies in order to implement guidelines, and consider acquisition of critical habitat lands.

Updated critical areas ordinances and development regulations with these guidelines would be required of all jurisdictions. Some jurisdictions would complete these updates with their next periodic update of their comprehensive plan between 2025 and 2027, and others with their comprehensive plan implementation progress reports in 2029.

Sec. 2 would amend 36.70A.050 such that the Department of Fish and Wildlife (WDFW) would be required to assist the Department of Commerce in adopting guidelines for the conservation and protection of anadromous fisheries in critical areas using the guidelines in RCW 36.70A.172.

Sec. 3 would amend 36.70A.172 such that the WDFW must develop the guidelines for conservation, enhancement, and restoration of anadromous fisheries by January 1, 2025. Cities and counties must review, update, and adopt these into their critical areas policies and development regulations in the next periodic review or implementation progress report required under RCW 36.70A.130. Jurisdiction with no or limited critical habitat for salmon stocks may be exempted from WDFW's guidelines with permission from WDFW.

Sec. 4 would amend 36.70A.130 such that the guidelines developed by WDFW in Sec. 3 would be a requirement of cities and counties with specific periodic review timelines. Jurisdictions with comprehensive plan review deadlines in December 2024, would have the requirements of Sec. 3 due by the time of their implementation progress report. Jurisdictions with comprehensive plan review deadlines starting June 2025, and after, would have the requirements of Sec. 3 due by the time of comprehensive plan due date.

This act would go into effect 90 days after the adjournment of the session in which it is passed.

### **B. SUMMARY OF EXPENDITURE IMPACTS**

*Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.*

The goals outlined in this legislation require cities and counties fully planning under the Growth Management Act (GMA) to adopt new conservation and restoration guidelines to preserve and enhance anadromous fisheries. Local governments would have to coordinate with the Washington State Department of Fish and Wildlife (WDFW) and the Department of Commerce (Commerce) to review and report on county and city adoption of critical areas policies. Depending on the significance of the new guidelines there could be moderate to significant costs for jurisdictions in the state with critical areas and anadromous fish hatcheries. WDFW currently operates 87 hatchery facilities, the majority dedicated to producing salmon and/or steelhead. There are also 51 tribal hatcheries and 12 federal hatcheries that produce salmon and steelhead for harvest.

The costs associated with this act would not be known until WDFW, in consultation with Commerce, develop the guidelines for the revised a critical areas ordinance and associated development regulations, or incentive programs. The findings from Commerce's Evaluation of Planning Costs Report (2023) (Evaluation Report) found that updates to critical areas ordinances (CAOs) were highly variable, using a high number of public meetings to communicate changes to residents, and are time intensive to complete, often relying on the help of consultants to complete these ordinances. These costs would be incurred from FY25 to the end of FY29

For assessment of this legislation, a scenario is presented using the following assumptions:

Assumptions:

According to WDFW’s salmon and steelhead hatchery information the counties of Adams, Benton, Garfield, Island, Jefferson, Kittitas, Kitsap, Lincoln, Pond Oreille, Walla Walla, and Whitman counties do not have a hatchery present within the county. Using this list, it may eliminate these 11 counties and the 57 cities within them from conducting the CAO update due to the exemption in Sec. 3(1)(b)(iv). However, this is likely not an exhaustive list and there may be additional hatcheries in counties that end up qualifying the jurisdiction to make updates.

If these jurisdictions were eliminated from the requirements of this act the following counties, cities, and towns would be impacts:

39 counties - 11 counties = 28 counties

(281 cities and towns – 57 cities and towns) = 224 cities and towns, although the number of cities with hatcheries is not known at this time. For the purposes of this fiscal note, the Local Government Fiscal Note Program assumes 25% of these cities have a anadromous fishery within its border, for a total of 56 cities. (224 cities and towns \* 25% = 56 cities)

**MAJOR AMENDMENTS TO CRITICAL AREAS AND DEVELOPMENT REGULATIONS:**

WDFW and Commerce would coordinate the new guidelines for the conservation and protection of anadromous fisheries in critical areas for county and city adoption of these policies. An updated to CAO guidelines that could change how to protect fisheries in critical areas may have significant costs, which include: drafting, planning, review, environmental impact studies, potentially five or more public hearings, and would have estimated costs starting at \$80,000 for cities and \$260,000 for counties as determined by Commerce’s Evaluation Report. Jurisdiction with no or limited critical habitat for salmon stocks may be exempted from WDFW’s guidelines, however, the number of such cities and counties is not currently known.

28 counties x \$260,000 = \$7,280,000

56 cities and towns x \$80,000 = \$4,480,000

Estimated total: \$11,760,000, from FY 25 to FY29 to be completed with comprehensive plans and or implementation progress reports.

**C. SUMMARY OF REVENUE IMPACTS**

*Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.*

This legislation is not anticipated to impact local government revenue.

Counties, and cities within them, are eligible to receive planning and implementation grants from the Department of Commerce for costs associated with different types planning work required by the Growth Management Act (GMA). This act does not have a funding provision that would provide for new funding sources. It is assumed that the existing grant programs established under the GMA would help defray costs associated with the new requirements of the critical areas ordinance and associated development regulations.
