Bill # 2055 HB

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact on the Courts

This bill would add a new section to Chapter 2.30 RCW creating a gambling treatment diversion court pilot program.

Section 1(1) would require the Administrative Office of the Courts (AOC) to conduct a pilot program which has the purpose of treating persons determined to be affected by an addictive disorder related to gambling and who committed a crime for which they have pled guilty or been convicted in furtherance or as a result of the gambling. The pilot program would be established in three counties to include a county located within each of the three Court of Appeals divisions.

Section 1(2) would set requirements for the treatment program including terms and conditions for successful completion, requirements to pay restitution, provide progress reports, and that it be administered by a qualified mental health or substance use disorder (SUD) professional.

Section 1(3)(a) would require the court to hold a hearing before sentencing to determine whether or not the person committed the crime as a result of problem gambling. The prosecutor may present the court with any evidence and the advisability of permitting the person to enter the program.

Section 1(3)(b) would require the court to advise the person that sentencing will be postponed if the person submits to treatment and is accepted into the program, that the court may impose conditions, and that the person may be placed under supervision or care of a qualified mental health or SUD professional for a period of at least one year and not to exceed three years

Section 1(7) would allow the conviction to be discharged under RCW 9.94A.637 if the person satisfactorily completes the treatment program as determined by the court and would allow the person to apply for vacation.

Section 1(9) would allow the Supreme Court to adopt rules appropriate or necessary to effectuate the purposes of this section.

II. B - Cash Receipts Impact

None

II. C - Expenditures

This bill would have fiscal impact on both the AOC and the courts as they implement the three pilots.

IMPACT TO THE ADMINISTRATIVE OFFICE OF THE COURTS

AOC would require additional staff on its Behavioral Health team to develop the gambling treatment court program and offer training. The bill does not address the length of the pilot program. For the purposes of this judicial impact note, AOC assumes staff will begin in FY 2025 and the program would begin in FY 2026 and continue for three years.

TOTAL ESTIMATED COSTS: \$1,425,500 over four years

Court Program Analyst (1.0 FTE) and Court Program Specialist (1.0 FTE). Beginning July 1, 2024 and ongoing for four years, AOC would require salary, benefits, and associated standard costs for 2.0 FTE. Because these programs are rare, the staff would require additional training and travel costs of \$30,000.

Additionally, case management systems would need to be modified to document when someone is granted into a gambling treatment court.

The estimate included in the judicial impact note is \$22,000 based on 200 staff hours at an average of approximately \$103 per hour across multiple job classifications needed to complete the interface (Business Analyst, System Integrator, Senior System Integrator, IT Supervisor, and Manager).

Explanation of standard costs by object:

Salary estimates are current biennium actual rates at Step L.

Benefits are the agency average of 30.59% of salaries.

192,439.00

Form FN (Rev 1/00)

2

Request # 122-1

Bill # 2055 HB

Goods and Services are the agency average of \$3,600 per direct program FTE.
 Travel is the agency average of \$2,000 per direct program FTE.
 Ongoing Equipment is the agency average of \$1,800 per direct program FTE.
 One-time IT Equipment is \$4,800 for the first fiscal year per direct program FTE.
 Agency Indirect is calculated at a rate of 25.86% of direct program salaries and benefits.

PASS-THROUGH TO PILOT COURTS

TOTAL ESTIMATED COSTS: \$2,700,000 over three years

The cost for each pilot is assumed to be \$300,000 per year beginning in FY 2026 and ongoing for three years. The gambling treatment diversion court would address felony level crimes. The costs are based on superior court drug court costs scaled down anticipating a smaller number of participants and fewer staff.

Provisions of the bill that require the agency to adopt new administrative rules or repeal/revise existing rules.

HB 2055

GAMBLING TREATMENT DIVERSION COURT PILOT PROGRAM

101 – Caseload Forecast Council
January 19, 2024

SUMMARY

A brief description of what the measure does that has fiscal impact.

Section 1 Adds a new section to chapter 2.30 RCW that requires the Administrative Office of the Courts to conduct a gambling treatment diversion pilot program.

Section 1 Additionally states the program shall be established in three counties and outlines the requirements of the program.

Section 1 Additionally states if the court determines that the person is afflicted with a problem or disordered gambling, committed the crime in furtherance or as a result of problem or disordered gambling, is likely to be rehabilitated through treatment, and is a good candidate for treatment, the court may:

- order conditions of probation,
- defer sentencing, and
- place the person under supervision of a qualified mental health or substance use disorder professional for not less than one year or more than three years.

Section 1 Additionally states a person is not eligible for the program if:

- The crime is a crime against a person established in Title 7, 9, 9A, 10, 26, 28A, 46, or 74 RCW;
- The crime is a crime against a child listed in RCW 26A.400.322,
- The crime is an act which constitutes domestic violence as defined in RCW 10.99.020;
- The person has a record of two or more conviction of the above offenses, or a similar crime in another state or other proceedings that allege the commission of a violent offense are pending,
- The person is on probation or parole, or
- The person has previously been assigned by a court to a programs for the treatment of gambling.

Section 1 Additionally states if the person satisfactorily completes the treatment program, as determined by the court, the conviction may be discharged under RCW 9.94A.637. If not, the court may impose a sentence that could, or would, have been imposed originally for the offense for which the person pled guilty or was convicted.

EXPENDITURES

Assumptions.

None.

Impact on the Caseload Forecast Council.

None

Impact Summary

The provisions of this bill establish a pilot program for diversion. The Caseload Forecast Council (CFC) has no information regarding how many individuals would participate in the program or how many would successfully complete the program and have their sentenced discharged.

Prison and Jail Bed Impacts.

While the estimated bed savings cannot be determined, the provision of the bill would allow diversion from a felony, gross misdemeanor, or misdemeanor offense, resulting in reduced need for prison and jail beds.

Impacts on DOC Community Custody population.

A person that successfully completes the diversion pilot program may have a community custody term that would also be discharged, resulting in a reduction to DOC's community corrections caseload.

Impact on local detention and Juvenile Rehabilitation (JR) beds.

No impact to local detention beds. It is assumed that juveniles with adjudications in the juvenile court would not be eligible to participate in this diversion pilot program, as successful completion results in convictions being discharged under RCW 9.94A.637 which applies to adult sentences.

Current statutes require individuals sentenced in adult court for an offense committed before the age of 18 to serve their confinement at a JR facility until age 25, or until release if occurring prior to age 25. As a result of provisions in the bill, it is possible that a juvenile sentenced as an adult may participate and successfully complete the pilot programs and have their sentence discharged. As less than 1% of all sentences in the adult system are committed by those less than age 18, it assumed any potential impacts to JR would be minimal.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1(1) of House Bill (HB) 2055 adds a new section to chapter 2.30 RCW that requires the Administrative Office of the Courts to conduct a gambling treatment diversion pilot program.

Section 1(3)(a-b) indicates that the court may order conditions of probation and defer sentencing.

Section 1(7) declares that if the person satisfactorily completes the treatment program, as determined by the court, the conviction may be discharged under RCW 9.94A.637. If not, the court may impose a sentence that could, or would, have been imposed originally for the offense for which the person pled guilty or was convicted.

Section 4(c)(iii) states that the treatment provider will report to the Department of Corrections or other appropriate agency all significant failures by the person to comply with any court-imposed term or condition.

Effective date is assumed 90 days after adjournment of session in which this bill is passed.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The fiscal impact of this bill is indeterminate, assumed to be less than \$50,000 per Fiscal Year (FY).

The Caseload Forecast Council (CFC) has no information regarding how many individuals would participate in the program or how many would successfully complete the program and have their sentenced discharged.

Prison and Jail Bed Impacts.

While the estimated bed savings cannot be determined, the provision of the bill would allow diversion from a felony, gross misdemeanor, or misdemeanor offense, resulting in reduced need for prison and jail beds.

Impacts on DOC Community Custody population.

A person that successfully completes the diversion pilot program may have a community custody term that would also be discharged, resulting in a reduction to DOC's community corrections caseload.

The DOC assumes this bill would likely result in an Average Daily Population (ADP) decrease, although the impact cannot be reliably estimated. Therefore, the fiscal impact is indeterminate, assumed to be less than \$50,000 per FY.

ASSUMPTIONS

1. The estimated ADP impact to DOC prison facilities/institutions and/or community supervision/violator caseloads is based on projections from CFC.

2. We assume a Direct Variable Cost (DVC) of \$7,630 per incarcerated individual per FY to facilitate cost discussions during legislative session for bills. This cost estimate includes prison and health services' direct variable costs. It does not include staffing or dollars necessary for staffing needed at the facility outside of the living/housing units. The DVC is

calculated by DOC and reviewed and approved with the Office of Financial Management, Senate, and House staff each legislative session.

3. For illustration purposes only, the average annual Community Supervision caseload model is \$6,101 per ADP (not including startup costs), regardless of the supervised risk level based on the workload model. If ADP impacts are applicable to this fiscal note, the calculated rate per community supervision ADP includes direct supervision and ancillary units, such as Hearings, Records, and Training, that are directly affected by supervision population changes. The estimate will vary based on the risk level of the supervised individuals, which requires different staffing levels. The population trend data used is based on the Risk Level Classification tool and provides a risk level of 42.8% high violent, 27.3% high non-violent, 21% moderate, 7.9% low, and 1.0% unclassified. (June – November 2017)

4. The DOC assumes that any increase in community supervision caseload will result in an increased need for violator beds. For illustration, the FY2023 average percentage of supervised individuals who served jail time and were billed by the local jurisdictions for violating their conditions of supervision was a rate of 2.0%. The current average daily cost for jail beds is \$114.43 per day, inclusive of all risk levels and healthcare costs. The rate is an average, and actual rates vary by local correctional facilities.

5. We assume additional impacts will result when ADP caseload changes in either prison or community and resources will be necessary. The DOC will “true up” our fiscal impact in subsequent budget submittals should the legislation be enacted into session law.

Part IV: Analysis

A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

Sec. 1 adds a new section to chapter RCW 2.30. The Administrative Office of the Courts (AOC) shall conduct a gambling treatment diversion court pilot program for the treatment of persons who have committed a crime for which they have pled guilty or been convicted in furtherance or as a result of the gambling. The pilot program shall be established in three counties of this state selected by the office, to include a county located within each of the three court of appeals divisions.

If the court has reason to believe that a person who has pled guilty to or has been convicted of a crime is afflicted with problem gambling or disordered gambling and the person committed the crime in furtherance of or because of problem gambling or disordered gambling, the court shall hold a hearing before it sentences the person. The prosecutor may present the court with any evidence concerning whether the person committed the crime in furtherance or as a result of problem gambling or disordered gambling and the advisability of permitting the person to enter the program.

A person who is placed under the supervision or care of a qualified mental health or substance use disorder professional shall pay the cost of the program of treatment to which the person is assigned and the cost of any additional supervision that may be required, to the extent of the financial resources of the person.

The court may order the person to perform supervised community service in lieu of paying the remainder of the costs relating to the person's treatment and supervision.

B. SUMMARY OF EXPENDITURE IMPACTS

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

The legislation would have indeterminate impacts on the three counties chosen to participate in the gambling treatment diversion court pilot program.

According to the Washington Association of Prosecuting Attorneys, the bill may increase the time a prosecutor would spend on a case, because there would be additional court hearings to determine whether a defendant was eligible for the gambling treatment diversion court. Court-appointed defense attorneys would also be required at these hearings. Additionally, prosecutors and court-appointed defense attorneys might spend time gathering evidence to make a determination about a defendant's problem gambling.

Because the number of defendants referred to the gambling treatment diversion court pilot program is not known, the total impacts are indeterminate.

C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

The legislation would have no revenue impacts for local government.

SOURCES:

Washington Association of Prosecuting Attorneys
