Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This bill relates to expanding economic assistance for individuals who are eligible for the Temporary Assistance for Needy Families (TANF) program.

Section 1(4) amends the maximum payment amount of diversion assistance, which provides brief emergency assistance once in a given 12-month period to qualified adult applicants, in order to help some families avoid needing to rely on the payment as an alternative to TANF. The payment amount is increased from \$1,500 to \$2,000 effective January 1, 2025.

The Department of Social and Health Services (DSHS) Economic Services Administration (ESA) Diversion Cash Assistance (DCA) program currently has sufficient funding to support this increase to the DCA payment amount. ESA anticipates associated impacts to caseload, workload, and information technology (IT) to be minor, and able to be absorbed within existing resources. Therefore, ESA estimates no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.
