Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

NO CHANGE IN FISCAL IMPACT: The substitute bill amends Section 2-3 to include the spouse of an immediate family member of a shrimp pot-Puget Sound or shrimp trawl-Puget Sound license to be designated as the alternate operator; specifically calls out Puget Sound shrimp pot and trawl advisory boards; and allows a licensee to designate any natural person as the alternate operator by requesting designation through the Puget Sound shrimp pot or trawl advisory boards.

Section 1 creates a definition “nonspot shrimp.”

Section 2 adds nonspot shrimp as a species that cannot be taken from Puget Sound without a commercial license.

Section 3 removes language that allows a shrimp trawl Puget Sound licensee to designate an alternate operator if certain requirements are met. Adds a holder of a Puget Sound Shrimp trawl license may harvest members of the nonspot shrimp species within the waters of Puget Sound; no more than one Puget Sound Shrimp trawl or nonspot shrimp pot licenses may be owned by a licensee; and the combined number of Puget Sound shrimp trawl and nonspot shrimp pot licenses issued is limited to five licenses in total.

Section 4 provides additional regulations regarding fishing for nonspot shrimp for commercial purposes and specifies when a nonspot shrimp license holder may designate an alternate operator of the license and upon death license must be treated as personal property for purposes of inheritance. Limits one shrimp trawl or nonspot shrimp pot license per licensee and allows for a Puget Sound shrimp trawl license to be converted to a nonspot shrimp pot license by the holder, however once converted the shrimp trawl license is permanently retired. If all shrimp trawl licenses are converted to nonspot shrimp pot licenses, it specifies that the department shall work with stakeholders to review the allocation of the commercial nonspot shrimp resources and develop recommendations for future allocations.

Section 5 creates a new Nonspot Shrimp Pot-Puget Sound license.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

WDFW assumes that the 5 eligible resident Shrimp Trawl-Puget Sound license holders will convert to the new license. The application and license fees are the same for both license and will be deposited in the same funds, no change in revenue.

Application revenue will be deposited in 24N, Fish, Wildlife, and Conservation Account. License Revenue will be deposited in 001, General Fund.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

All sections will require rulemaking to make corresponding changes to WAC 220-340-520, commercial shrimp pot fishery, and WAC 220-340-530, commercial shrimp trawl fishery. Rulemaking for each WAC will require \$2,500 for a public hearing and \$1,500 for rule adoption, \$8,000 in fiscal year 2025, Object E.

The Department currently uses a web-based application called LiFT (Licensing and Fish Tickets) to process all commercial license applications and renewals. A new commercial license for nonspot shrimp will require WDFW to update the LiFT system. Based on previous updates to the LiFT application, WDFW will require 0.3 FTE IT Application Developer

Senior/Specialist to update the source code, test, and deploy to production. Annual salaries and benefits, Objects A & B, are \$48,000. The Department will also require \$1,000 for a PowerBuilder license.

Goods and services, Object E, includes \$7,000 per FTE, per year, for WDFW standard costs, which cover an average employee's supplies, communications, training, and subscription costs per year. An infrastructure and program support rate of 36.03% is included in object T and is calculated based on WDFW's federally approved indirect rate.

Total costs in fiscal year 2025 are \$81,000.
