Part IV: Analysis

A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

This note is on 5919 S SB and compares it to 5919 SB.

CHANGES BETWEEN THIS VERSION AND THE PREVIOUS VERSION:

This substitute version of the bill allows public utility districts to sell biogenic carbon dioxide and other biogas products to either an end-user or at wholesale. The definition of “biogenic carbon dioxide” is also amended to provide clarification that biogenic carbon dioxide includes carbon dioxide produced as a byproduct from biological processes in an industrial or manufacturing facility rather than as a byproduct from industrial or manufacturing processes.

These changes do not affect the fiscal impacts discussed below.

SUMMARY OF CURRENT BILL VERSION:

This legislation would allow public utility districts to sell biogenic carbon dioxide to an end-user or at wholesale.

This legislation would take effect 90 days after adjournment of the session in which the bill is passed.

B. SUMMARY OF EXPENDITURE IMPACTS

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

This bill would not impact local government expenditures due to the local option.

C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

This legislation would have no impact on local government revenues due to the local option.

It is unknown how many public utility districts will decide to sell these products or the wholesale price for these products.
