OFM Review: Val Terre	Phone: (360) 280-3973	Date: 02/02/2024

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Proposed Substitute HB 2313 does the following:

- Removes certain duties relating to digital equity from the Statewide Broadband Office (SBO).
- Transfers responsibility for the SBO's outreach efforts to hard-to-reach and low-income communities to the Washington State Office of Equity.
- Requires the Office of Equity to develop and monitor implementation of the state Digital Equity Plan, building upon progress made by the SBO in developing a state Digital Equity Plan.
- Requires the Office of Equity to submit a report to the Governor and the Legislature by December 1, 2024, including an evaluation of existing digital equity initiatives, policies, and public and private investments.
- Requires the Office of Equity to make publicly available, on an ongoing basis, an overview of the progress made in promoting digital equity; and
- Requires the Department of Commerce to consult the Office of Equity in implementing the Digital Equity Planning Grant Program and the Digital Equity Opportunity Program.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

OFM distributes costs incurred in fund 472 Gov Central Service Account through the central service model. Any assumed increase in the account would be matched by an increase in the Gov Central Services fee.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Assumptions:

- The digital equity plan development would be led by the Office of Equity with partnership support from the State Broadband Office in the Department of Commerce.
- Federal Funding and infrastructure development would remain at the State Broadband Office.
- Digital Navigator funding as provisioned in the budget would remain at the State Broadband Office.
- The statutory digital equity planning grant program (RCW 4.330.5393) would remain at Dept of Commerce, subject to appropriation.

The Office of Equity requests funding for professional service contracts at \$150,000 per year for contracted outreach, engagement, and facilitation of the digital equity forum including compensated engagement with stakeholders with lived experience in navigating barriers to digital connectivity and equity.

The Office of Equity assumes the need for additional staffing and resources to implement this bill, however the staffing and resource amount is unknown. The Office of Equity will fund the necessary staffing and resources using an Inter-Agency Agreement (IAA) with the Department of Commerce.

Depending upon the funding in the IAA, The Office of Equity may need to submit a decision package for additional staffing and resources to support this bill.

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

Account	Account Title	Type	FY 2024	FY 2025	2023-25	2025-27	2027-29
462-1	Gov Central Service Account	State	0	150,000	150,000	300,000	300,000
Total \$			0	150,000	150,000	300,000	300,000

In addition to the estimates above, there are additional indeterminate costs and/or savings. Please see discussion.

III. B - Expenditures by Object Or Purpose

OFM Review: Cheri Keller	Phone: (360) 584-2207	Date: 01/24/2024

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The bill modifies the responsibilities of the Governor's Statewide Broadband Office. The purpose of the office is to encourage, foster, develop, and improve affordable, quality broadband in Washington. The bill expands the Office's purpose to include encouraging broadband adoption and digital equity in the state.

Currently the Office has the power and duty to coordinate with local governments, tribes, public and private entities, public housing agencies, nonprofit organizations, and consumer-owned and investor-owned utilities to develop strategies regarding broadband access. Section 3 of this bill expands the partners to include relevant state agencies. The state librarian (in the Office of the Secretary of State) is named as a relevant state agency.

By December 1, 2024, the Office must submit to the governor and appropriate legislative communities a report addressing digital equity, including an evaluation of existing state digital equity initiatives (Section 4.4.(d)).

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The Office of the Secretary of State (OSOS) Washington State Library staff are already involved in efforts by the Statewide Broadband Office to encourage broadband adoption in the state. We believe any additional coordination resulting from this bill can be absorbed within existing resources. Therefore, no fiscal impact to OSOS.

OFM Review: Cheri Keller	Phone: (360) 584-2207	Date: 01/30/2024

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1 amends 43.330.530 to add and modify definitions, including unserved areas, which includes adequate, reliable and affordable broadband service.

Section 2 amends RCW 43.330.532 to add broadband adoption and digital equity to the State Broadband Office's duties.

Section 3 amends RCW 43.330.534 to add broadband adoption and coordination with relevant state agencies as part of the State Broadband Office's powers and duties. Also requires that the State Broadband Office must collaborate with federally recognized tribes and adds additional agencies that it must consult with: Office of Equity, Office of Superintendent of Public Instruction, the Consolidated Technology Services agency. It also removes the State Broadband Office's responsibility to coordinate outreach to hard-to-reach and low-income communities regarding available broadband programs. Makes updates to the state's definition for broadband service speeds from 25 megabits per second download, 3 megabits per second upload to 100 download and 20 upload.

Section 4(2)(a) amends RCW 43.330.539 to require that the Office of Equity will need to build off the progress made by the State Broadband Office in developing a state digital equity plan required to access federal Broadband Equity, Access and Deployment (BEAD) funding, and to develop and monitor a successor state digital equity plan. The legislative report due date is extended from December 1, 2023 to December 1, 2024.

Section 4(2)(d) directs agencies to evaluate existing state digital equity initiatives, policies, and public and private investments to be able to recommend a model for future infrastructure and outreach investments.

Section 5 amends RCW 43.330.5393 to remove authority for the Digital Equity Forum to review grant applications for the digital equity planning program and adds consultation with the Office of Equity to develop program guidelines.

Section 6 amends RCW 43.330.5395 to add recommendations that advance broadband adoption and digital equity to the purpose of the Digital Equity Forum. Adds to the recommendation areas from the Forum to include opportunities for sustainable digital equity funding and to strengthen partnership that promote digital connectivity, broadband adoption and digital equity. Forum members may appoint a chair, or co-chair to lead the Forum.

Section 7 amends RCW 43.330.412 to add collaboration with the Office of Equity to implement the digital equity opportunity program. Removes authority for the Forum to review program grant applications and adds required consideration to leverage additional federal or private investment.

Section 10 recodifies RCW 43.330.539 (Section 4 of the proposed legislation) to Chapter 43.06D RCW and transfers responsibilities to the Office of Equity.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

SBO program assumptions and impacts – Section 3(5) and 4(2)(a)

- The department assumes required collaboration with the 29 federally recognized tribes in Washington will necessitate a 1.0 FTE Commerce Specialist 4 to serve as the state tribal broadband expert. This collaboration is now required where it was previously encouraged, while expanding the agencies within this required collaboration.

- The department assumes required collaboration with all relevant state agencies including, but not limited to, the Utilities and Transportation Commission, Commerce, Community Economic Revitalization Board, Washington State Librarian, Washington State Office of Equity, Office of Superintendent of Public Instruction, and the Consolidated Technology Services Agency will necessitate a 1.0 FTE Commerce Specialist 3 serving as the Broadband State Agency Engagement Lead.

- The department assumes a reduction in its FY25-FY29 operating costs, which are budgeted for outreach to hard-to-reach communities. The department assumes the budget authority for this work would be transferred to the Office of Equity as they will assume responsibility for it. The department does not currently have a contract for this outreach.

- The department assumes that a statewide digital equity plan involves both a state plan that is ongoing and iterative in nature as well as a federal digital equity plan managed through the National Telecommunications and Information Administration (NTIA) that is associated with the federal Broadband Equity, Access and Deployment (BEAD) program over a five-year period. The proposed legislation requires that the Office of Equity would manage the ongoing statewide plan while the department would manage the federal BEAD and Digital Equity grants related to digital equity, as well as to serve as the administering agency for the state Digital Equity Opportunity Program and Digital Equity Planning Program. In addition, the department assumes consultation with the Office of Equity on the Digital Equity Opportunity Program and the Digital Equity Planning Program, within Sections 5 and 7, respectively, would be part of ongoing program operations with minimal additional staff time.

- The department assumes that SBO will collaborate with the Office of Equity to share information about the NTIA state digital equity plan to contribute to the enterprise-wide state digital equity plan under Section 4.

1.0 FTE Commerce Specialist 4 (2,088 hours) in FY25-29, to provide tribal planning and engagement, including tribal relations and consulting expertise, project management, and compiling project details.

1.3 FTE Commerce Specialist 3 (2,714 hours) in FY25-29, to provide broadband planning and engagement project management, developing and coordinating relationships with state partners to ensure collaboration, and compiling project details. Staff would also provide streamlined and accurate transfer of knowledge of state digital equity plan to Office of Equity.

Salaries and benefits:

FY25-FY29: \$270,882 per fiscal year

Professional Service Contracts:

The department assumes contracted support for programs translations in up to nine English alternatives languages for eight program documents estimated to be \$1,725 per document (8 x 9 x \$1,725). The department assumes additional contracted support for community outreach and engagement estimated to be 125 hours at \$200 per billable hour. In addition, the department assumes a \$100,000 reduction in budgeted contracts for outreach to hard-to-reach communities for FY25-FY29.

FY25: \$49,200

FY26-FY29: (\$100,000) per fiscal year

Goods and services:

Assistant Attorney General consultation will be required at \$210 per hour for 50 hours in FY25 and reducing to 20 hours per fiscal year in FY26-FY29.

FY25: \$37,899

FY26-FY29: \$31,899 per fiscal year

Travel:

Community outreach and engagement will require travel time to meet with communities statewide and on an ongoing basis.

FY25-FY29: \$5,378 per fiscal year

Equipment:

FY25: \$10,000

FY29: \$4,800

Intra-agency reimbursements:

FY25-FY29: \$89,120 per fiscal year

Note: Standard goods and services costs include supplies and materials, employee development and training, Attorney General costs, central services charges and agency administration. Intra-agency-administration costs (e.g. payroll, HR, IT) are funded under a federally approved cost allocation plan.

=====

Total State Broadband Office (SBO) Costs:

FY25: \$462,479

FY26-FY28: \$297,279 per fiscal year

FY29: \$302,079

Digital Equity Unit program assumptions and impacts – Section 4(2)(d)

- The department assumes that Digital Equity Unit staff will provide information and participate in meetings to share data to support the evaluation process in Section 4.
- The department assumes that it will share digital equity information and updates on the progress of any federal digital equity planning efforts on an ongoing basis.

0.2 FTE Managing Director WMS 3 (418 hours) in FY25-FY29 to coordinate with the Office of Equity on their evaluation of digital equity efforts on an annual basis, and to support the transition of the department's state digital equity plan.

Salaries and benefits:

FY25-FY29: \$36,939 per fiscal year

Goods and Services:

FY25-FY29: \$1,946 per fiscal year

Intra-agency Reimbursements:

FY25-FY29: \$12,153 per fiscal year

Note: Standard goods and services costs include supplies and materials, employee development and training, Attorney General costs, central services charges and agency administration. Intra-agency-administration costs (e.g. payroll, HR, IT) are funded under a federally approved cost allocation plan.

=====
Total Digital Equity Unit Costs:

FY25-29: \$51,038 per fiscal year

=====
Total Costs:

FY25: \$513,517
 FY26-FY28: \$348,317 per fiscal year
 FY29: \$353,117

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The bill expands the purpose of the Governor's Statewide Broadband Office (SBO) by specifying it shall also service as the central digital equity planning and coordination body for the state. It also requires the SBO, in carrying out its purpose, to collaborate with federally recognized tribes and relevant state agencies including, but limited to the Washington state Office of Equity, the Office of the Superintendent of Public Instruction, and the Consolidated Technology Services (WaTech).

The proposed substitute removes certain duties relating to digital equity from SBO and transfers responsibility for the SBO's outreach efforts to hard-to-reach and low-income communities to the Washington State Office of Equity (Office of Equity). It requires the Office of Equity to develop and monitor implementation of the state Digital Equity Plan, building upon progress made by the SBO in developing a state Digital Equity Plan.

Sec. 3. Removes the requirement for the SBO to coordinate outreach efforts to hard-to-reach and low-income communities.

Sec. 4 Requires the Office of Equity to coordinate outreach efforts to hard-to-reach and low-income communities to provide information about broadband and digital equity programs available to consumers of these communities and assist consumers in enrolling in these programs. Requires the outreach effort to be reviewed annually. Authorizes coordination or contracts with other public or private entities to conduct outreach and assist consumers. Requires the Office of Equity to submit a report to the Governor and the Legislature by December 1, 2024, including an evaluation of existing digital equity initiatives, policies, and public and private investments. Requires the Office of Equity to develop and monitor implementation of the state Digital Equity Plan, building upon progress made by the SBO in developing a state Digital Equity Plan. Specifies the Digital Equity Plan must include an evaluation of existing state digital equity initiatives, policies, and public and private investments, including a recommended model for future infrastructure and outreach investments. Requires the Office of Equity to make publicly available, on an ongoing basis, an overview of the progress made in promoting digital equity.

Sec. 5. Requires the Department of Commerce to consult the Office of Equity in implementing the Digital Equity Planning Grant Program.

Sec. 7. Requires the Department of Commerce to consult the Office of Equity in implementing the Digital Equity Opportunity Program.

Sec. 10. Recodifies the Digital Equity Plan in the Office of Equity statutes.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

There is no cash receipt impact on WaTech.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

There is no fiscal impact to WaTech. PSHB 2313 requires the SBO, in carrying out its purpose, to collaborate with federally recognized tribes and relevant state agencies including, but limited to the Washington state Office of Equity, the Office of the Superintendent of Public Instruction, and WaTech. It is assumed WaTech can absorb the costs for this proposed bill in its base budget if the workload of other enacted legislation does not exceed current staffing levels.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 3 - Increase minimum broadband speed to 100 Mbps download and 20 Mbps upload. Expands outreach and actions to inform and help consumers. The state broadband office “must” (instead of “may”) collaborate with tribes and other relevant state agencies, including the utilities and transportation commission, in carrying out its purpose.

To participate in the collaborative effort, UTC will need necessary resources to conduct extensive research and analysis to make sound recommendations to help the SBO achieve its purpose.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

None.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

To carry out its purpose, the SBO must collaborate with the UTC to encourage, foster, develop, and improve affordable, quality broadband and broadband adoption and digital equity within the state. The UTC will need necessary resources to conduct ongoing research and analysis of broadband deployment, affordability, and adoption to make sound recommendations to the SBO.

\$71,733 for FY 2024 (0.5 FTE) as HB1723 partially funding this work for the 2024 fiscal year.

\$143,467 for each subsequent fiscal year (1.0 FTE) to complete ongoing analysis and recommendations to the SBO. (Regulatory Analyst 3)

OFM Review: Jason Brown	Phone: (360) 742-7277	Date: 01/24/2024

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This bill relates to furthering digital equity and opportunity in Washington State.

Section 2 expands responsibilities of the Statewide Broadband Office (SBO) to develop and improve broadband adoption and digital equity within the state.

Section 3 permits the SBO to coordinate with relevant state agencies to develop strategies and plans promoting deployment of broadband infrastructure and greater broadband access and broadband adoption. This section also requires the office to collaborate with all relevant state agencies in carrying out its purpose.

The Department of Social and Health Services (DSHS) does not anticipate any associated impacts to caseloads, workload, or information technology (IT) systems, and therefore estimates no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

While DSHS is not explicitly mentioned in Section 2, some collaboration with the department is expected, given the expanded responsibilities of the SBO to develop and improve broadband adoption and digital equity. In particular, DSHS may be involved in efforts to provide outreach to hard-to-reach and low-income communities, areas where the department typically has significant engagement and expertise. DSHS estimates that any effort put toward collaboration and coordination would be able to be accomplished within existing resources.

While DSHS is not explicitly mentioned in Section 3, some collaboration with the department is expected, given the SBO's duties to coordinate with relevant state agencies for broadband development and adoption. DSHS may be involved in initiatives targeting underserved communities, given its broad reach in social and health services across the state. DSHS estimates that any effort put toward collaboration and coordination would be able to be accomplished within existing resources.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Summary of PSHB 2313

Section 3(5)

The Office of the Superintendent of Public Instruction (OSPI) is now included in the list of entities with which the governor's statewide broadband office must collaborate.

Section 8 - Amends RCW 28A.650.065 and 2021 c 301 s 4

Section 8(1)(a)

This section amends the requirements of the technology grant program to now attain or maintain a universal 1:1 student learning device ratio.

Section 8(4)

Removed language that required the Office of the Superintendent of Public Instruction (OSPI) to prioritize specific groups of applicants when ranking and selecting them.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

There is no impact to cash receipts.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Section 3(5)

The Office of the Superintendent of Public Instruction (OSPI) is now included in the list of entities with which the governor's statewide broadband office must collaborate. OSPI would require the following positions to execute this work:

- 0.01 FTE Director at a cost of \$3,000 in FY25
- 0.02 FTE Program Supervisor at a cost of \$4,000 in FY25

Section 8(1)(a)

This section is subject to appropriation and amends the requirements of the technology grant program to now attain or maintain a universal 1:1 student learning device ratio. Once all districts have attained the 1:1 ratio, the change in this section would allow districts to continue to apply for grants to support maintaining that ratio. The cost is indeterminate as it is unknown how many districts would apply for grant funds, how much funding would be appropriated to the grant program, or how much each district would be awarded.

Should funding be provided, and should the legislature wish to cover all district needs for maintaining devices, OSPI would estimate the potential costs based on the following assumptions. There are 1,073,833 students in Washington in grades K-12. Using a four-year replacement cycle, the estimated number of devices that would need replacement is 268,458 per year statewide ($1,073,833 \div 4 = 268,458$). OSPI assumes an average cost per device is \$400 based on other technology grant programs. This results in a potential funding need of \$107,383,200 annually ($268,458 \times \$400 = \$107,383,200$).

Part III: Expenditure Detail

III. A - Operating Budget Expenditures
