Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

1. The Attorney General's Office (AGO) Government Compliance & Enforcement Division (GCE) has reviewed this bill and determined it will not significantly increase or decrease the division's workload in representing the Washington State Patrol (WSP). GCE represents WSP in administrative litigation. This bill makes numerous substantive changes to the work zone speed safety camera law that passed the legislature in 2023 as ESSB 5272.

The changes in Section 1 and 2 would enable Department of Licensing (DOL) to impair a vehicle's registration for failure to failure to pay penalties assessed as a result of speed safety camera system infractions. GCE does not anticipate any fiscal impact from these changes, as DOL is responsible for vehicle registrations, not WSP.

Sections 3 and 4 would set a specific fine amount of \$124 for first violations after the expiration of any warning period, and \$248 for all subsequent violations, creates a 30-day state-wide warning period at the start of the program, and clarifies that the monetary penalty is not subject to any of the other statutorily imposed assessments or fees that are applicable other traffic infractions. The fine amounts are consistent with the penalties assessed for existing speed infractions on state highways and in construction zones, so GCE does not anticipate any increased litigation as a result of these changes.

Section 4 would clarify that the burden of proof at an administrative hearing is by a preponderance of the evidence. Because this change would simply codify the burden that already exists in case law for cases of this type and in the court rules governing speed infractions litigated in courts of limited jurisdiction, GCE does not anticipate any fiscal impact from this change. Section 4 would also enable a person to request a payment plan at any point following receipt of an infraction. GCE assumes that payment plans would be handled by the Office of Administrative Hearings (OAH). GCE does not anticipate needing to appear in such proceedings. Therefore, no fiscal impact is anticipated from this change. Section 4 would make numerous refinements and changes relating to the disposition of speed safety camera system infractions and the options a vehicle owner would have upon receipt of an infraction. The changes would result in a process similar to that already in place for infractions litigated in courts of limited jurisdiction. Specifically, this proposal would give vehicle owners who receive an infraction the choice to pay the infraction, admit to the infraction but seek to mitigate the penalty at a hearing, or challenge the infraction at a hearing. A notice of infraction would represent a determination that an infraction has been committed, so the failure to respond to a notice by choosing to pay the penalty or request a hearing would result in a final judgment. Under the existing law, an owner who fails to respond to a notice of infraction will automatically receive an administrative hearing. GCE previously assumed that mitigation would be presented as a hearing option and that those cases would utilize few resources, so the codification of this option would not result in any workload changes. Also, failures to respond would no longer receive an administrative hearing as they will under existing law. GCE previously assumed that those hearings would utilize minimal Assistant Attorney General (AAG) resources. GCE assumes that any savings realized by not having to be present at calendars to litigate failures to respond would be offset by the need to respond to a small number of more labor intensive motions for reconsideration and motions to vacate default judgments. New legal services are nominal, and costs are not included in this request.

- 2. The AGO Labor and Industries Division (LNI) has reviewed this bill and determined it will not significantly increase or decrease the division's workload in representing the Washington State Department of Labor & Industries (L&I). The enactment of this bill will not impact the provision of legal services to L&I because it does not create any rights, obligations, duties, or other legal consequences specific to the agency. New legal services are nominal, and costs are not included in this request.
- 3. The AGO Solicitor General's Office (SGO) has reviewed this bill and determined it will not increase or decrease the division's workload. Therefore, no costs are included in this request.
- 4. The AGO Licensing & Administrative Law Division (LAL) has reviewed this bill and determined it will not significantly

increase or decrease the division's workload in representing the DOL. The enactment of this bill will not impact the provision of legal services to DOL because its responsibilities under the bill are mostly limited to providing drivers 120 day notices of noncompliance with speed camera infractions. Because DOL currently sends 120 day notices for similar driving infractions, DOL already has systems, processes, and rules in place for these notices. While DOL will likely have more 120 day notices to send under this bill, beyond that, the impact is to the agency and its legal services is likely low. Legal services can be provided with existing resources. New legal services are nominal, and costs are not included in this request.

- 5. The AGO Civil Rights Division (CRD) has reviewed this bill and determined it will not increase or decrease the division's workload in representing the Attorney General's Office (AGO) or the Human Rights Commission (HUM). The enactment of this bill will not impact the provision of legal services to the HUM because the bill imposes no new requirements on the HUM. The enactment of this bill will not impact CRD's provision of legal services to the AGO because the bill assigns no required civil rights enforcement duties to the AGO. Therefore, no costs are included in this request.
- 6. The AGO Transportation and Public Construction Division (TPC) has reviewed this bill and determined it will not significantly increase or decrease the division's workload in representing the Washington State Department of Transportation (WSDOT). WSDOT's primary obligations are reflected in Sections 1(1) regarding the forwarding of outstanding violations to DOL and 4(3)(a) regarding the creation of a public facing website, the procuring of contracts, and the adoption of regulations. Since July 1, 2023, TPC has been providing legal services to WSDOT in support of its rulemaking and contract work, and TPC will continue to do so until the end of the current fiscal year. Consequently, beginning July 1, 2024, TPC estimates a total of 10 hours per year in support of WSDOT's operation and administration of the program. New legal services are nominal, and costs are not included in this request.
- 7. The AGO Criminal Justice Division (CRJ) has reviewed this bill and determined it will not increase or decrease the division's workload. This proposal makes numerous substantive changes to the work zone speed safety camera law that passed the legislature in 2023 as ESSB 5272. CRJ anticipates that these changes will not result any additional work beyond what was anticipated for the enactment of ESSB 5272 during the 2023 legislative session. As such, CRJ does not anticipate any fiscal impact from these changes. Therefore, no costs are included in this request.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 4 sets out four options for those receiving infractions for speed safety camera violations: (a) ignore the infraction, (b) pay the penalty, (c) contest the infraction, or (d) admit fault and request a mitigation hearing. Option (a) will result in an ALJ issuing a final order against the recipient. Options (c) and (d) will result in administrative proceedings up to and including evidentiary hearing.

In addition, OAH will have jurisdiction over authorizing and subsequently modifying payment plans.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Indeterminate cash receipts.

As a central service agency, the Office of Administrative Hearings (OAH) bills referring agencies for its costs and collects the revenue into the Administrative Hearings Revolving Account. Cash receipts are assumed to equal costs. OAH will bill the Washington State Patrol for the costs related to this proposed legislation.

These cash receipts represent the OAH's authority to bill and are not a direct appropriation to OAH. Appropriation authority is necessary in OAH's budget.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Indeterminate expenditure impact.

On average, appeals are assumed to require Administrative Law Judge (ALJ) time including prehearing conferences, hearings, order writings, etc. New work is identified for the Office of Administrative Hearings (OAH) have jurisdiction over authorizing and subsequently modifying payment plans.

OAH Agency Workforce Assumptions:

- (1) 1.0 Line ALJ will include cost and FTE for 0.15 Senior ALJ (SALJ), 0.15 Lead ALJ (LALJ), 0.6 Legal Assistant 2 (LA2) (Range 40 step L), and 0.25 administrative support represented as a Management Analyst 5 (MA5) (Range 64 Step L).
- (2) ALJ salary is based on the ALJ collective bargaining agreement and assumed to be at step L. (Line ALJ-range 70. Senior ALJ-range 74.)
- (3) Benefit rates were analyzed by job class and projected using the latest benefit information available.
- (4) Goods and services, travel and on-going capital outlays were projected based on historical data for each of the job classifications.

The Washington State Department of Transportation (WSDOT) assumes indeterminate fiscal impact because there is not relevant data available to forecast how many people would continue to speed through work zones and incur a citation.

This bill is assumed effective 90 days after the end of the 2024 legislative session. This law is assumed to end June 30, 2030.

Part III: Expenditure Detail

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The substitute version of the proposed legislation does not change our fiscal impact.

There is no new fiscal impact to the Washington State Patrol (WSP).

The proposed legislation cleans up language regarding the speed safety camera program that passed legislation in the 2023 legislative session. Specifically, it adds a requirement for the Department of Transportation (WSDOT) to develop and maintain a public-facing educational website, establishes the monetary fines associated with infractions from speed safety cameras, and better outlines the options and processes for individuals who receive a Notice of Infraction from a speed safety camera, among other things. The substitute version strikes a 17-day warning period that was to occur before infractions were sent on long term work zones with speed safety cameras.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

NONE

II. C - Expenditures

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1 amends RCW 46.16A.120 to stipulate that each court and government agency with jurisdiction over the use of a speed safety camera system under RCW 46.63.200 may forward to DOL any outstanding Speed safety camera system infractions issued under RCW 46.63.030(1)(f).

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

| Request # | 1 |
|-----------|-------------------|
| Bill # | 2356 SHB H-3076.1 |

Part 2 – Explanation

This bill modifies provisions that authorize the Washington State Department of Transportation (DOT) to operate speed safety camera systems in state highway work zones. The Washington State Patrol (WSP) is responsible for the enforcement and adjudication of violations captured by the speed safety camera systems. Violations are reported to the Department of Licensing (DOL). DOL will send letters 120 days prior to the next vehicle registration date for persons with unresolved violations.

Differences between HB 2356 and SHB 2356 do not impact DOL, therefore no changes are made to the fiscal note.

2.A – Brief Description Of What The Measure Does That Has Fiscal Impact

Section 1 amends RCW 46.16A.120 to stipulate that each court and government agency with jurisdiction over the use of a speed safety camera system under RCW 46.63.200 may forward to DOL any outstanding Speed safety camera system infractions issued under RCW 46.63.030(1)(f).

2.B - Cash receipts Impact

There are no DOL cash receipts associated with this bill.

2.C - Expenditures

DOL will incur additional postage costs following implementation of the bill. Under RCW 46.16A.120, DOL will receive notice of speed safety camera violations and add them to the vehicle record. The department will issue a letter 120 days prior to the next vehicle registration date for persons who have not resolved the violation. Failure to resolve the violation may result in DOL withholding the vehicle registration renewal.

DOL used the following assumptions for the fiscal estimate:

- DOT estimates that this bill could result in 257,000 additional violations reported to DOL.
- DOL evaluated available data on similar actions taken and found that 17 percent of registered owners received a 120-day letter due to unresolved violations under RCW 46.16A.120.
- Implementation of the bill will not require additional staff resources.

257,000 reported violations per year x 17% = 43,690 new 120-day letters sent

Provisions of the bill that modify RCW 46.20.270 may add administrative reviews resulting from any vehicle registration holds. DOL expects that it can manage additional reviews within existing resources but will monitor activity following implementation and address resource needs in a future budget cycle as necessary.

No changes to DOL's information technology systems are required.

Part 3 – Expenditure Detail

3.A – Operating Budget Expenditures

| Operating Expenditures | Fund | FY 24 | FY 25 | 23-25 Total | 25-27 Total | 27-29 Total |

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

There is no fiscal impact on expenditures for the Department of Social and Health Services (DSHS). This bill modifies the administration, penalty structure, and enforcement of speed safety camera system violations in state highway work zones. Currently, a fee of \$5 is deposited into the Traumatic Brain Injury (TBI) Account for each traffic infraction. Under this proposal, infractions issued as civil penalties associated with a speed safety camera system in state highway work zones will not result in funds deposited into the TBI account. This will result in an indeterminate impact to cash receipts to the TBI account.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

This bill will result in an indeterminate impact to cash receipts. Under this proposal, infractions issued as civil penalties associated with a speed safety camera system in state highway work zones will impact in funds deposited into the TBI account.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Agency Assumptions

The assumptions guiding this fiscal note are expected to change over time and must be reassessed annually as the program expands. There are several indeterminate factors at play. Needs for program expenditures and revenues will change future projections based on successful program expansion.

The department has developed a draft tiered infraction schedule, based off the infractions issued for High Occupancy Vehicle Lane violations.

- 1. \$124 for the first violation.
- 2. \$248 for the second violation, and for each violation thereafter.
- 3. Only a written warning may be issued for a violation of this section during the 30-day period after the first speed safety camera system is placed; and thereafter, during the 17-day period after placement of a speed safety camera system at a new long-term state highway work zone, as defined by the department of transportation.
 - a. A warning period is not tolled if the speed safety camera system is not in operation continuously or is moved from a state highway work zone during the warning period.

The department has developed the following method to arrive at estimated hours for processing potential infractions:

- It is estimated that each infraction will take two minutes to process.
- The time to review estimate is calculated monthly by multiplying the number of **potential violations** by the time to process each infraction (two minutes), calculating the total number of minutes needed to review infractions in a month. This is then divided by 60 minutes / hour to calculate the number of hours per month.
- The FTE number takes that number and divides it by 200 hours / month.

The fiscal impact of the proposed legislation is still indeterminate when compared to ESSB 5272 (RCW 46.63.200) because there is not relevant data available to forecast how many people would continue to speed through work zones and incur a citation.

Washington (7.8 million) / Pennsylvania (12.9 million) = 60.5%

Infractions in Pennsylvania = $425,000 \times .605 = 257,125$ estimated for Washington

Section 4(3a) directs WSDOT to develop and support a SSCS public facing website – Development costs of \$20,000 are estimated. These funds will cover the costs of buying website domain name, website development, translations services, and equity outreach. The department also estimates an added \$5,000 per year for the life of the program to help with needed website maintenance. Since these costs are minimal, the department will absorb within this program's funding.

Part II: Narrative Explanation

II. A - Brief description of what the measure does that has fiscal impact.

RCW 46.63.200 authorizes the Washington State Department of Transportation (WSDOT) to operate speed safety camera systems (SSCS) in state highway work zones. Under the law, the Washington State Patrol manages the enforcement and adjudication of violations captured by the speed safety camera systems. Both agencies must work together to implement the law by July 1, 2024. In this agency request legislation, WSDOT is proposing to amend RCW 46.16A.120, 46.20.270, 46.63.110 and 46.63.200.

Section-by-Section Explanation of Proposed Substantive Amendments:

Section 1 (RCW 46.16A.120): The proposed amendments authorize WSDOT and/or the Washington State Patrol (WSP) to forward to the Department of Licensing (DOL) any outstanding (unpaid) violations, which enables DOL to impair the vehicle's registration if the registered owner of the vehicle fails to pay any outstanding infraction penalties prior to the date of registration renewal. DOL currently has the authority to impair vehicle registration for outstanding infractions issued for violations of the photo toll system under RCW 46.63.160, as well as violations generated by automated traffic safety cameras and school bus safety camera systems under RCW 46.63.170 and RCW 46.63.180, respectively. The proposed amendments allow DOL to treat a failure to pay the penalty imposed under RCW 46.63.200 in the same manner as other failures to pay penalties generated by automated traffic camera systems.

Section 2 (RCW 46.20.270): The proposed amendments also authorize the Office of Administrative Hearings (OAH) to send to DOL any failures to respond, failures to pay a penalty, or failures to appear at a hearing to contest infractions issued for a violation of RCW 46.63.200. OAH currently has this authority for photo toll system violations under RCW 46.63.160. These proposed amendments work together with the proposed amendment to RCW 46.16A.120 to enable DOL to impair vehicle registrations for outstanding penalties.

Section 3 (RCW 46.63.110): This law requires various assessments and fees to be collected in addition to monetary penalties for violations under Chapter 46.63 RCW. The proposed amendment exempts the collection of these assessments and fees for speed safety camera system violations under RCW 46.63.200. With this change, the registered owner of a vehicle receiving one of these violations will pay the monetary penalty set by statute under RCW 46.63.200, with no added assessments or fees.

Section 4 (RCW 46.63.200):

Subsection (3)(a): The proposed amendment requires WSDOT to create a website that will educate the traveling public about the operation of speed safety camera systems. It is expected that an increased awareness and understanding of the speed safety camera systems prior to and during their operation will positively condition driver behavior in state highway work zones.

Subsection (4)(a): The proposed amendment clarifies the prohibited conduct that will result in a violation of this statute.

Subsection (5): The proposed changes in this subsection relate to the penalty structure for a violation of the statue. First, this bill sets up the monetary penalties for speed safety camera system violations. A first violation will result in a \$124 penalty, while every violation thereafter will result in a \$248 penalty.

Second, during the 30-day period following placement of the first camera system in the state, only written warnings may be issued. A statewide warning period has preceded enforcement of other new traffic control laws, such as the hands free (cell phone) law and seatbelt law. The department is also required to conduct a public awareness campaign to inform the public of the use of speed safety camera systems in state highway work zones. WSDOT intends to leverage existing digital platforms and earned media opportunities for this work. The agency's assumption does not include a broader scope of digital, TV, radio or billboard ads. Additional funding would be needed if a broader more far-reaching scope is required of the public awareness campaign.

Third, in addition to and after the statewide 30-day warning period at the start of the program, a 17-day warning period will go into effect after the placement of a speed safety camera system in a new "long-term state highway work zone," as defined in rule by WSDOT.

Finally, the 30-day and 17-day warning periods are not tolled whether the camera system is moved or not in continuous operation during the entire warning period. For example, if a camera system is set up in new long-term Work Zone A for 10 days, is moved to existing Work Zone B for 2 days, and is then moved back to Work Zone A, the 17-day warning period for Work Zone A would not stop for the 2 days that the camera system was in Work Zone B.

Subsection (6): The proposed changes in subsection 6 relate to the disposition of speed safety camera system infractions and the options a vehicle owner has upon receipt of an infraction.

First, this legislation clarifies that upon receipt of an infraction, the vehicle owner has the choice to pay the infraction, admit to the infraction and continue to a hearing before OAH to explain mitigating circumstances, or challenge the infraction at a hearing before OAH. This new language closely tracks with language in existing speed infraction statues and the Infraction Rules for Courts of Limited Jurisdiction (IRLJ). It also codifies the right of a litigant to seek mitigation, which advances the concepts of equity and fairness.

Second, the proposed amendments clarify that a notice of infraction will represent a determination that an infraction has been committed, and the failure of a vehicle owner to respond to a notice of infraction and elect one of the three identified options for resolution will result in a final judgment without the need for an administrative

hearing. This corrects an issue in the existing statute, which provides that if a vehicle owner does not respond to a notice of infraction within 30 days, the infraction will automatically be referred to OAH for a full administrative hearing. The proposed amendments adopt provisions in existing speed infraction statues and the IRLJs to streamline the adjudication process and increase the effectiveness of the program.

Third, the changes clarify that the issuing agency has the burden of proving a violation by a preponderance of the evidence. This mirrors language in existing statues for hearings in courts of limited jurisdiction.

Finally, language has been added that will enable a person to request a payment plan at any point following receipt of an infraction.

II. B – Cash Receipts Impact

The legislation proposes a draft tiered infraction schedule, based off the infractions issued for High Occupancy Vehicle Lane violations.

- 1. \$124 for the first violation.
- 2. \$248 for the second violation, and for each violation thereafter.
- 3. Only a written warning may be issued for a violation of this section during the 30-day period after the first speed safety camera system is placed; and thereafter, during the 17-day period after placement of a speed safety camera system at a new long-term state highway work zone, as defined by the department of transportation.
 - a. A warning period is not tolled if the speed safety camera system is not in operation continuously or is moved from a state highway work zone during the warning period.

Cash receipts are indeterminate due to several factors including WSP's ability to staff the work and human factors in compliance and recidivism rates. However, revenues generated from the program could be estimated at \$19 million annually based on using six camera systems and approximately 257,000 infractions issued from July 1, 2024, through June 30, 2025. The attached document with backup calculations was developed since the original bill passed. Prior to the original bill passing, the fine structure was not decided between WSDOT and WSP. The new revenue assumptions are based on having this fine structure in place as part of the technical update bill.

• See attached document – WSDOT Financial Modal.pdf

II. C – Expenditures

Section 4(3a) directs WSDOT to develop and support a SSCS public facing website – Development costs of \$20,000 are estimated. These funds will cover the costs of purchasing website domain name, website development, translations services, and equity outreach. The department also estimates an added \$5,000 per year for the life of the program to help with needed website maintenance. The department assumes these costs can be provided within existing resources and appropriation.

Section 4(5b) directs the department to conduct a public awareness campaign to inform the public of the use of speed safety camera systems in state highway work zones. WSDOT intends to leverage existing digital platforms and earned media opportunities for this work. The cost for communications support would be \$175,000 for the 30-day public awareness campaign and would utilize a professional service contract.

If a broader and more far-reaching campaign is required like digital, TV, radio or billboard ads, the agency would need additional funding. A paid media campaign with collateral development and associated media buys is estimated to cost between \$1.5 to \$2 million.

Washington State Patrol - Infraction Certification Costs

The fiscal impact on WSP will be reflected in WSP's fiscal note.

Office of Administrative Hearings – Adjudication costs

The fiscal impact of hearings will be reflected in WSP's and OAH's fiscal notes.

Part III: Expenditure Detail

III. A - Expenditures by Object or Purpose

Object C – Professional Service Contract \$175,000

Part IV: Capital Budget Impact

N/A

Part V: New Rule Making Required

Section 3. would require rulemaking in several areas, including around adjudication, when mitigating circumstances are allowed, and other issues.

FNS060 Local Government Fiscal Note

Part IV: Analysis

A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

This fiscal note analyzes the local government impact of SHB 2356 H-3076.1, comparing it to the impact of HB 2356.

CHANGES BETWEEN THIS VERSION AND PREVIOUS BILL VERSION:

The proposed substitute bill would add a requirement to section 4 for the Department of Transportation to conduct a public awareness campaign to inform the public of the use of speed safety cameras in state highway work zones during the 30-day period following the placement of the first such system. The proposed substitute would also remove two requirements regarding the warning period for speed safety cameras in state highway work zones that would have been included in the original bill.

These changes would not affect the local government expenditure or revenue impacts below.

SUMMARY OF CURRENT BILL:

Section 1 of the proposed legislation would amend RCW 46.16A.120, specifying that any court or government agency having jurisdiction over a speed camera safety system under RCW 46.63.200 may forward infractions detected by that system to the Department of Licensing.

Section 2 of the proposed legislation would amend RCW 46.20.270, specifying that under certain conditions, state agencies or municipalities may forward the record of citations issued under RCW 46.63.200 to the Department of Licensing.

Section 3 of the proposed legislation would amend RCW 46.63.110, specifying that the monetary penalties for a violation of RCW 46.63.200 are not subject to assessments or fees provided under RCW 46.63.110.

Section 4 of the proposed legislation would amend RCW 46.63.200, adding language related to the enforcement and adjudication of infractions detected by speed camera safety systems in state highway work zones, and the administration of such systems. This section would expire on June 30, 2030.

B. SUMMARY OF EXPENDITURE IMPACTS

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

The proposed legislation would have no impact on local government expenditures.

RCW 46.63.200 specifies that the Department of Transportation is responsible for all actions related to the operation and administration of speed camera safety systems in state highway work zones, and that the Washington State Patrol is responsible for the enforcement and adjudication of speed violations under this section. Accordingly, the Washington Association of Sheriffs and Police Chiefs does not anticipate this bill will have any impact on local law enforcement expenditures.

C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

The proposed legislation would have no impact on local government revenues.
