Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Engrossed substitute senate bill 5481 allows a provider to establish a relationship with a patient through telehealth and provides circumstances in which an out-of-state health care provider may provide telehealth services to patients in Washington. Additionally, this bill directs the Telemedicine Collaborative to review a Uniform Law Commission proposal for a process for out-of-state providers to register to provide telehealth services to patients in Washington. The Department of Health does not foresee the need for rulemaking, so there is no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.
