Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The engrossed substitute bill authorizes gas and electrical companies to deploy a Thermal Energy Network (TEN) within their service territories.

- Sec. 3 creates a thermal energy network pilot project program.
 - Department of Commerce (Commerce) may award grants for pilot projects.
 - Utilities and Transportation Commission (UTC) must approve proposed pilot projects.
- Sec. 4 states that Commerce shall award grants to gas companies for TEN pilot projects and outlines award criteria.
- Sec. 8 creates a JLARC study in RCW 44.28, with a report due no later than three years after the effective date. (The effective date is not identified in this bill. JLARC staff assume an effective date of June 5, 2024.) JLARC's report must include an evaluation of how all pilot projects, including those in the process of deployment, address the considerations outlined in Sections 3 and 4.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The engrossed substitute bill directs JLARC to conduct an evaluation of how all pilot projects, including those in process of deployment and those that have been deployed, address considerations in Sec. 3 (pilot program) and Sec. 4 (grant funding to gas companies).

JLARC staff will work with staff at the Utilities and Transportation Commission (UTC) and Department of Commerce (Commerce) immediately after passage of the bill to ensure project contacts are established and any necessary data for JLARC staff's future evaluation needs are identified and collected. JLARC staff will check in with agency staff in July 2025 to discuss development and implementation of the pilot and grant programs.

JLARC is directed to issue a report no later than three years after the effective date section 8. JLARC staff assume an effective date of June 5, 2024, since no effective date is provided in the bill. Under this assumption, JLARC staff will begin the evaluation in March 2026. To conduct the review, JLARC staff will review statutory and agency defined criteria, application processes and outcomes, interview agency staff, project personnel, and other stakeholders, and conduct site visits. JLARC staff will issue a report in May 2027.

This audit will require an estimated 24 audit months.

The numbers in the table include staff costs and any applicable consultant costs. JLARC expects that the staff costs can be absorbed in its base budget. If the workload requirements from all assignments passed during the current legislative session exceed our staff capacity, JLARC may need additional staff resources. The staff costs are an estimate of those resources.

JLARC Audit Months: JLARC calculates its staff resources in "Audit Months" to estimate the time and effort to undertake and complete its studies. An "Audit Month" reflects a JLARC analyst's time for a month, together with related administrative, support, and goods/services costs. JLARC's anticipated 2023-25 costs are calculated at approximately \$23,900 per audit month.

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Differences between the house bill and the substitute house bill:

There are no differences between the house bill and the engrossed substitute house bill that affect the fiscal impact to the Department of Commerce (department).

Summary of the engrossed substitute house bill:

This bill would establish a grant program at Department of Commerce (department) to offset the costs necessary to build and operate non-emitting thermal energy network pilot projects.

Section 1 would allow electric and natural gas companies to own, operate, or manage any nonemitting thermal energy network within the state. The bill adds the following definitions to existing law:

"Thermal energy" means piped noncombustible fluids used for transferring heat into and out of buildings for the purpose of either: (a) Eliminating any resultant on-site greenhouse gas emissions of all types of heating and cooling processes including, but not limited to, comfort heating and cooling, domestic hot water, and refrigeration; (b) improving energy efficiency; or (c) both (a) and (b) of this subsection.

"Thermal energy network" means all real estate, fixtures, and personal property operated, owned, used, or to be used for or in connection with or to facilitate a utility-scale distribution infrastructure project that supplies thermal energy.

Section 2 authorizes gas companies and electrical companies, whether investor-owned or consumer-owned, to operate non-emitting thermal energy systems within their service area. Establishes review and approval requirements for the Utilities and Transportation Commission (UTC) or the governing board of the consumer-owned utility. The bill authorizes companies to propose inclusion of network costs in the rates charged for utility services.

Section 3 establishes a pilot program for non-emitting thermal energy network projects, administered by the UTC. Gives priority in proposing pilot programs.

Section 4 directs the department, subject to the availability of amounts appropriated for this specific purpose, to provide grants to any gas company developing a non-emitting thermal energy network pilot project. The bill establishes the following:

- limits on grant amounts and directs the UTC to determine this limit for each project;
- 12 mandatory and five options factors for the department to consider in evaluating grant applications; and
- requirements to coordinate all grants with other grant recipients, the UTC, Commerce, and consultants with expertise.

Section 5 establishes procedures for investor-owned utilities to solicit for non-emitting thermal energy pilot projects, to be overseen by the UTC.

Section 6 modifies the obligation to serve of natural gas companies to allow them to meet this obligation by providing thermal energy services instead.

Section 7 modifies procedures concerning the regulated rate base of gas companies and electric companies.

Section 8 directs JLARC to evaluate the implementation of the non-emitting thermal energy network pilot project program

no later than three years after the effective date of this act. The scope includes the grant program in Section 4 of the bill.

Section 9 authorizes public utility districts to operate non-emitting thermal energy networks anywhere in the state.

Section 10 authorizes municipal electric utilities to operate non-emitting thermal energy networks anywhere in the state.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

None.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Operating Start-up Cost Assumptions:

The bill requires the department to create a grant program within the department to offset the costs necessary to build and operate non-emitting thermal energy network pilot projects.

Section 4 of the bill requires the department, subject to the availability of amounts appropriated for this specific purpose, to provide grants to any gas company developing a non-emitting thermal energy project. The bill does not specify the total number of grants to be provided. The department assumes that \$10 million of grant funding will be appropriated. The department estimates cost based on five gas companies applying for grants. The department also assumes the grant program is not a competitive program. Costs may vary if the number of contracted grants is higher.

Section 8 requires the department to conduct an evaluate implementation of the non-emitting thermal energy. The department assumes JLARC will conduct the evaluation in FY27. The department will provide data and other supporting information as may be required to conduct the evaluation.

To complete the work the department estimates (FY25):

Meetings

The department assumes meetings for environmental justice assessments to develop the grant program. The department assumes there will be three two-hour workshops starting in FY25 and ongoing meetings to support engagement with grantees and stakeholders. The department assumes all meetings will be virtual.

Staffing Costs

0.10 FTE EMS2 Senior Energy Policy Specialist (208 hours) in FY25 to provide subject matter expertise and expert policy advice or consultation in coordinating development of the program, and provide expert policy advice.

Energy Programs in Communities (EPIC) program staff:

0.20 FTE Commerce Specialist 5 (418 hours) in FY25 for staffing, implementation planning, leadership, oversight, supervision, and decision making over all elements of the program.

0.20 FTE Management Analyst 4 (418 hours) in FY25 to lead and monitor the environmental justice assessments, tribal consultation and community engagement process required under the HEAL Act (RCW 70A.02).

0.50 FTE Commerce Specialist 3 (1044 hours) in FY25 to coordinate the grant program with the Utilities and Transportation Commission, conduct for each application the multi-factor assessment required under subsection (5), execute grant agreements, monitor budget and expenditures, conduct detailed analysis, and provide consultative planning for program established in this bill.

0.20 FTE Commerce Specialist 2 (418 hours) in FY25 to provide coordination support, contract management, contract monitoring, invoicing, and data entry.

0.10 Budget Analyst 4 (208 hours) in FY25 to provide or develop the capacity to eventually monitor budget and expenditures, conduct detailed analysis, and provide consultative planning for the grant program established in this bill.

Salaries and Benefits

FY25: \$157,495

Professional Services

Professional Service Contracts for consultant to provide expert analysis required by Section 4(7) - costs \$50,000 in FY25.

Goods and Services and travel

FY25: \$12,478

Intra-agency Reimbursement:

FY25: \$51,816

Note: Standard goods and services costs include supplies and materials, employee development and training, Attorney General costs, central services charges and agency administration. Agency administration costs (e.g., payroll, HR, IT) are funded under a federally approved cost allocation plan.

Commerce Specialist 5	98,040				0.1	
EMS Band 2	126,529				0.1	
Total FTEs					0.6	0.0

Capital Assumptions:

The bill requires the department to create a grant program within the department to offset the costs necessary to build and operate non-emitting thermal energy network pilot projects.

Section 4 of the bill requires the department, subject to the availability of amounts appropriated for this specific purpose, to provide grants to any gas company developing a non-emitting thermal energy project. The bill does not specify the total number of grants to be provided. The department assumes that \$10 million of grant funding will be appropriated. The department estimates cost based on five gas companies applying for grants. The department also assumes the grant program is not a competitive program. Costs may vary if the number of contracted grants is higher.

Section 8 requires the department to conduct an evaluate implementation of the non-emitting thermal energy. The

department assumes JLARC will conduct the evaluation in FY27. The department will provide data and other supporting information as may be required to conduct the evaluation.

To complete the work the department estimates (FY26-FY27):

Meetings

The department assumes meetings for environmental justice assessments to develop the grant program. The department assumes there will be three two-hour workshops starting in FY26 to support engagement with grantees and stakeholders. The department assumes all meetings will be virtual.

Staffing Costs

0.10 FTE EMS2 Senior Energy Policy Specialist (208 hours) in FY26 to provide subject matter expertise and expert policy advice or consultation in coordinating development of the program, and provide expert policy advice.

Energy Programs in Communities (EPIC) program staff:

0.20 FTE Commerce Specialist 5 (418 hours) in FY26 for staffing, implementation planning, leadership, oversight, supervision, and decision making over all elements of the program.

0.50 FTE Commerce Specialist 3 (1044 hours) in FY26 to coordinate the grant program with the Utilities and Transportation Commission, conduct for each application the multi-factor assessment required under subsection (5), execute grant agreements, monitor budget and expenditures, conduct detailed analysis, and provide consultative planning for program established in this bill.

0.10 FTE Commerce Specialist 3 (208 hours) in FY27 to provide data and other supporting information as required for the JLARC evaluation required by Sec. 8.

0.20 FTE Commerce Specialist 2 (418 hours) in FY26 to provide coordination support, contract management, contract monitoring, invoicing, and data entry.

0.10 Budget Analyst 4 (208 hours) in FY26 to provide or develop the capacity to eventually monitor budget and expenditures, conduct detailed analysis, and provide consultative planning for the grant program established in this bill.

Salaries and Benefits

FY26: \$133,364

FY27: \$11,556

Professional Services

Professional Service Contracts for consultant to provide expert analysis required by Section 4(7) - costs \$50,000 in FY26.

Goods and Services and travel

FY26: \$10,559

FY27: \$959

Grants are Indeterminate

The department has assumed staffing estimates in this fiscal note, grants are indeterminate (less administrative costs) for the 2025-2027 biennium.

Intra-agency Reimbursement:

FY26: \$43,877

FY27: \$3,802

Note: Standard goods and services costs include supplies and materials, employee development and training, Attorney General costs, central services charges and agency administration. Agency administration costs (e.g., payroll, HR, IT) are funded under a federally approved cost allocation plan.

=====

Total Costs:

FY26: \$237,800

FY27: \$16,317

Part V: New Rule Making Required

Provisions of the bill that require the agency to adopt new administrative rules or repeal/revise existing rules.

None.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1: allows an electrical company or gas company to own a thermal energy network; adds or modifies definitions related to thermal energy networks, including removing references to “nonemitting” from reference of thermal energy network (TEN), and specifies TENs may not rely on combustion to create thermal energy, except for emergency backups. The UTC assumes no material fiscal impact.

Section 2: requires the Commission to validate cost assessments of TENs thermal energy network projects and company proposal to recover costs in a rate filing before the UTC, clarifying this validation does not constitute a prudency finding or that the resource is used and useful for rate making. The UTC assumes costs related to ongoing technical assistance beginning January 2025, with review of cost assessments, assumed requests for validation of four projects, beginning June 30, 2027, and one project every other year thereafter, and proposal to recover costs in a rate case filing before the UTC. The UTC assumes related fiscal impact.

Section 3: allows department of commerce to award grants; establishes TEN pilot project program and requires the commission to review and consider certain criteria to approve the pilot project. The UTC assumes fiscal impact through technical assistance and review of thermal energy network projects, including review of specific metrics the company proposes to use to evaluate the pilot project.

Section 4: Sets forth grant award criteria for the Department of Commerce for thermal energy network pilot projects, clarifying that Commerce may determine whether to award a grant and how much to provide; it also specifies that Commerce must consider any finding or conclusions of the UTC regarding the pilot project; and allows Commerce to prioritize award funds to projects based on their cost- effectiveness and geographic diversity. Requires the Commission to coordinate with grant awardees, the department of Commerce, and consultants to ensure diversity of projects. The UTC assumes additional coordination work required to implement this section will begin in January 2025 and occur annually thereafter.

Section 5: before the gas company deploys a TEN pilot project, changes the requirement for investor-owned gas companies to seek TEN pilot projects in their requests for proposals; in addition, gas companies must compare the cost of a proposed TEN pilot project to the cost of current business practices and share data with the UTC, with an option to petition the UTC to use an alternative process to estimate the cost difference. UTC assumes fiscal impact related to data review and assumes one petition to use an alternative process.

Section 6: Allows a gas company to meet its obligation to serve through a thermal energy network to customers that have access to the gas company’s thermal energy network; as further modified in the Engrossed Substitute Bill, this is allowed exclusively upon petition of a gas company and subject to commission approval. UTC assumes a simple rulemaking modifying WAC 480-90-148 to reflect the change beginning January 2025. The UTC assumes fiscal impact.

Section 7: Allows a company to propose, and the Commission to approve, the merger of regulated gas operations with its thermal energy network in any multiyear rate plan proposed by a natural gas company or combination utility. Requires the Commission to avoid rate class subsidization. Requires separate accounting for benefits received from federal, state, or other incentives to mitigate rate impacts to customers. Requires Commission direction to use credits for other purposes. UTC assumes incremental fiscal impact for evaluation of merger of into a single rate base in a multi-year rate plan, beginning in June 2027 and recurring every year for the next five years. The UTC assumes four petitions for accounting orders to separate accounting for benefits received from incentives to mitigate rate impact to customers beginning in FY 2027 through FY 2029.

Sections 8 and 9 do not apply to the Commission. UTC assumes no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

None.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Sections 2 & 3: Validation of cost assessments; proposal for rate filing; project review

UTC assumes work related to approval of four projects by the commission, beginning June 30, 2025, and one project every other year thereafter. The UTC assumes technical assistance beginning January 2025, and continuing every year thereafter.

FY2025: \$22,604

FY2026: \$22,604

(Administrative Law Judge, 0.48 FTE; Director | Regulatory Services, 0.16 FTE; Deputy Director | Regulatory Services, 0.16 FTE; Policy Advisor, 0.32 FTE; Deputy Asst. Director | Regulatory Services, 0.21 FTE; Regulatory Analyst 2, 0.37 FTE; Regulatory Analyst 3, 0.51 FTE; Asst. Director, Policy, 0.16 FTE; Commissioner, 0.09 FTE)

Section 6: Simple rulemaking clarifying how a gas company can meet its obligation to serve through a thermal energy network.

UTC assumes a proceeding beginning January 2025 and wrapping up by December 2025.

FY2025 - \$24,730

FY2026 - \$14,838

(Administrative Law Judge, 0.06 FTE; Commissioner, 0.04 FTE; Deputy Director | Regulatory Services, 0.02 FTE; Director, Administrative Law & Policy, 0.02 FTE; Policy Advisor, 0.02 FTE; Deputy Asst. Director | Regulatory Services, 0.02 FTE; Regulatory Analyst 2, 0.03; Regulatory Analyst 3, 0.04 FTE; Asst. Director, Policy, 0.02 FTE)

Section 7: Multiyear rate plan evaluation of merger of rate bases

UTC assumes incremental fiscal impact for evaluation of merger of rate bases in a multi-year rate plan, beginning in June 2027 and recurring every year for the next five years.

FY 2027 – FY 2029: \$22,731 (cost per year)

(Deputy Asst. Director | Regulatory Services, 0.01 FTE; Regulatory Analyst 3

Asst. Director, Policy, 0.11 FTE; Policy Advisor, 0.01 FTE; Regulatory Analyst 2, 0.06 FTE; Deputy Director | Regulatory Services, 0.01 FTE)

Sections 5 & 7: Petitions for alternative process and separate accounting for benefits received from incentives to mitigate rate impact to customers.

UTC assumes four petitions for accounting orders to separate accounting for benefits received from incentives to mitigate rate impact to customers beginning January 2028.

FY 2028: \$19,366

FY 2029: \$19,366

(Commissioner, 0.02 FTE; Deputy Asst. Director | Regulatory Services, 0.03 FTE; Deputy Director | Regulatory Services, 0.01 FTE; Director, Regulatory Services
 Director, Administrative Law & Policy, 0.01 FTE; Regulatory Analyst 3, 0.08 FTE; Regulatory Analyst 2, 0.04 FTE; Policy Advisor, 0.04 FTE)

Section 4: Coordination with grant awardees, the department of Commerce, and consultants to ensure diversity of projects. Section 4 requires the commission to coordinate with the department, grant awardees, and consultants to ensure diversity of projects. UTC assumes that the work required to implement this section will begin in January 2025 and occur regularly.

FY2025 – FY2029: \$15,114 (cost per year)

(Commissioner, 0.01 FTE; Deputy Asst. Director | Regulatory Services, 0.02 FTE; Asst. Director, Policy, 0.02 FT; Policy Advisor, 0.07 FTE; Regulatory Analyst 3, 0.07 FTE)

Part III: Expenditure Detail

III. A - Operating Budget Expenditures

Account	Account Title	Type	FY 2024	FY 2025	2023-25	2025-27	2027-29
111-1	Public Service Revolving Account	State	0	62,448	62,448	90,401	114,422
Total \$			0	62,448	62,448	90,401	114,422

III. B - Expenditures by Object Or Purpose

Total FTEs			0.4	0.2	0.3	0.4

III. D - Expenditures By Program (optional)

NONE

Part IV: Capital Budget Impact

IV. A - Capital Budget Expenditures

NONE

IV. B - Expenditures by Object Or Purpose

NONE

IV. C - Capital Budget Breakout

Acquisition and construction costs not reflected elsewhere on the fiscal note and description of potential financing methods.

NONE

IV. D - Capital FTE Detail: *FTEs listed by classification and corresponding annual compensation. Totals agree with total FTEs in Part IVB.*

NONE

Part V: New Rule Making Required

Provisions of the bill that require the agency to adopt new administrative rules or repeal/revise existing rules.

Simple rulemaking clarifying how a gas company can meet its obligation to serve through a thermal energy network. UTC assumes a proceeding beginning January 2025, concluding by December 2025.

LOCAL GOVERNMENT FISCAL NOTE

Department of Commerce

Bill Number: 2131 E S HB

Title: Thermal energy networks

Part I: Jurisdiction-Location, type or status of political subdivision defines range of fiscal impacts.

Legislation Impacts:

- Cities:
- Counties:
- Special Districts:
- Specific jurisdictions only:
- Variance occurs due to:

Part II: Estimates

- No fiscal impacts.
- Expenditures represent one-time costs:
- Legislation provides local option: Public utility districts and cities that operate an electric utility have the option to own, operate, or manage a nonemitting thermal energy network, as defined.
- Key variables cannot be estimated with certainty at this time: The number of public utility districts or cities that will choose to own, operate or manage a nonemitting thermal energy network.

Estimated revenue impacts to:

None

Estimated expenditure impacts to:

None

Part III: Preparation and Approval

Fiscal Note Analyst: Kristine Williams	Phone: (564) 669-3002	Date: 02/14/2024
Leg. Committee Contact: Kim Cushing	Phone: (360) 786-7421	Date: 02/11/2024
Agency Approval: Alice Zillah	Phone: 360-725-5035	Date: 02/14/2024
OFM Review: Val Terre	Phone: (360) 280-3973	Date: 02/14/2024

Part IV: Analysis

A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

This note is on 2131 ES HB and compares it to 2131 S HB.

CHANGES BETWEEN THIS VERSION AND THE PRIOR VERSION OF THE BILL:

This version of the bill makes a technical change which would allow gas companies to provide thermal energy to gas customers who have access to a thermal energy network, subject to approval from the Utilities and Transportation Commission (UTC).

This change does not affect the fiscal impacts discussed below.

SUMMARY OF CURRENT BILL:

This legislation would allow public utility districts and municipal electric utilities to own, operate or manage a thermal energy network. The bill would also establish the thermal energy network pilot (grant) program to be administered by the Department of Commerce.

This legislation would take effect 90 days after adjournment of the session in which the bill is passed.

B. SUMMARY OF EXPENDITURE IMPACTS

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

This bill would not impact local government expenditures due to the local option.

C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

This bill would not impact local government revenues due to the local option.
