Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Section 1(3) Legislature intends to authorize parent-designated adults to provide care for students with adrenal insufficiency.
Section 2(1) school districts shall provide individual health plans for students with adrenal insufficiency.

Section 2(1)(a) The board of directions shall adopt and periodically revise policies governing the care of students with adrenal insufficiency.

Section 2(1)(b) the administration of medications under the policies required in 2(1)(a) must comply with conditions outlined in RCW 28A.210.260.

Section 2(1)(c) The policies required by 2(1)(a) may be incorporated into school district policies related broadly to students with health conditions or concerning parent-designated adults.

Section 2(2)(c) To be eligible to be a parent-designated adult for a child with adrenal insufficiency, a school district employee not licensed under chapter 18.79 RCW shall file, without coercion by the employer, a voluntary written, current, and unexpired letter of intent stating the employee's willingness to be a parent-designated adult. If a school district employee who is not licensed under chapter 18.79 RCW chooses not to file a letter under this section, the employee may not be subject to any employer reprisal or disciplinary action for refusing to file a letter.

Section 3 A school district, school district employee, agent, or parent-designed adult acting in good faith and substantial compliance shall not be liable in any criminal action or for civil damages as a result of services provided.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

no impact to cash receipts

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

The Office of the Superintendent of Public Instruction (OSPI) assumes that this bill will provide greater flexibility in staffing for school districts in being potentially able to utilize paraeducators as PDAs instead of a school nurse which could result in potential cost savings. The scope of the savings or cost shifting is indeterminate.

The OSPI assumes there is no fiscal impact for section 2 that creates a requirement for school districts to provide an individualized health plan for students with adrenal insufficiency. There is already an RCW that requires all students with life-threatening health conditions to have a health plan so this bill would not change existing practice.

The OSPI assumes there would be no cost for Section 2(1)(a) for school boards of directors to develop & adopt policies for students with adrenal insufficiency as Washington State School Directors' Association (WSSDA) would develop model policy for school boards to then adapt and adopt locally during their normal course of operations.
