Part I: Estimates

No Fiscal Impact

Estimated Cash Receipts to:

NONE

Estimated Operating Expenditures from:

NONE

Estimated Capital Budget Impact:

NONE

The cash receipts and expenditure estimates on this page represent the most likely fiscal impact. Factors impacting the precision of these estimates, and alternate ranges (if appropriate), are explained in Part II.

Check applicable boxes and follow corresponding instructions:

- If fiscal impact is greater than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete entire fiscal note form Parts I-V.
- If fiscal impact is less than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete this page only (Part I).
- Capital budget impact, complete Part IV.
- Requires new rule making, complete Part V.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

The amendment clarifies that one gubernatorial appointee to the Washington Electric Transmission Authority board must have expertise in rural county land-use planning. This change does not affect the Office of the Governor's previous fiscal note assumptions.

Changes in the amendment do not change the Office of the Governor's responsibilities and therefore do not change previous fiscal note assumptions.

Senate Bill 6355 creates the Washington Electric Transmission Authority as a public body to improve the reliability, resilience, capacity, and affordability of the state's electric transmission system. A board of directors must be appointed by January 1, 2027, to provide oversight and advise the authority on policies.

Section 4 states that the Governor must appoint nine (9) members to the Authority's Board of Directors. The members of the board must include:

- A person with experience working at a consumer-owned utility, preferably with expertise in the transmission function;
- A person with experience working at an investor-owned utility, preferably with expertise in the transmission function;
- A person with expertise in land use planning and law and local permitting processes;
- A person with expertise in clean energy development;
- A person with expertise in ratepayer protection;
- A person representing electrical workers with expertise in building electric transmission;
- A person with expertise in financing large infrastructure projects;
- A person with expertise in wildlife conservation and land use policies;
- A person from a federally recognized Indian Tribe, including federally recognized Indian tribes whose reservation or ceded lands lie in Washington state.

One or more members must have experience with the Bonneville Power Administration's transmission service. No member of the board may represent a person who owns or operates electric generating or transmission facilities.

Members of the board appointed by the governor must serve four-year terms. However, the governor must stagger the terms of six of the initial appointees for terms of one, two, and three years. At the end of the term, these members may be reappointed by the governor, or the governor may choose to appoint a new member.

The Governor's Office's responsibilities are limited to appointing members to the Board of Directors of the Washington Electric Transmission Authority and receiving required reports from the authority. These activities can be absorbed within existing staff and resources, and therefore, there is no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

SSB 6355 AMH APP H3826.1 creates

1. the electric transmission operating account, coupled with the general fund as the recipient of the earnings from investments under RCW 43.84.092(4).
2. the electric transmission capital account and allows the account to retain its earnings from investments.

There will be some de-minimis work for OST which can be completed within current practices and resources.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Projected cash flows are currently unavailable; therefore, estimated earnings from investments are indeterminable.

There may be an impact on the debt service limitation calculation. Changes to the earnings credited to the general fund impacts, by an equal amount, general state revenues.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Changes from S SB 6355 to S SB AMH APP H3826.1 include:

Section 2:

Adds a definition for a neighboring landowner to a transmission line.

Section 4:

Deletes subsection (4) authorizing the board to consult with state agencies on wildfire and other natural hazards.

Adds a rural criteria for one of the Authority's board members to specify that the board member who must have expertise in land use planning and law and local permitting processes must have expertise in rural county land use planning.

Section 6:

Most of the deleted language in Section 4 (4) is added at subsection (13) authorizing the Authority to consult with other agencies, SMEs, and neighboring landowners on wildfire and other natural hazards.

S SB AMH APP H3826.1 6355 creates a Washington Electric Transmission Authority (Authority) to facilitate electric transmission development in the state. The Authority is run by an executive director with a ten-member board of directors. The board will meet no less than quarterly. Commerce will provide staff support to the board. Commerce will reimburse travel costs for those advisory board members eligible for reimbursement. Commerce (and subsequently the Authority) will perform or adopt regional or federal transmission planning and work with stakeholders, utilities, and transmission developers to build new transmission lines and upgrade existing transmission lines. It has the authority to develop, own, and act as a developer of last resort.

Sections 1 and 2 establish legislative intent to create a Transmission Authority described in the bill and include relevant definitions for terms used in the bill.

Section 3 establishes the responsibilities for Commerce in the legislation, including identifying high-priority corridors, to be completed by October 30, 2027. Commerce must provide administrative, staff support, and oversight until the executive director is hired.

Section 4 creates a 10-member board of directors to advise the Authority on policies that are consistent with the purposes of this chapter, including land use and local permitting processes. Commerce will provide administrative and staff support to the board of directors prior to the executive director being hired. The board of directors must meet quarterly (remotely before an executive director is hired by June 30, 2027).

Section 5 creates the Washington Electric Transmission Authority as a public body and instrumentality of the state exercising essential government functions related to transmission and sets out the purposes of the Authority. The Authority will collaborate with local jurisdictions, tribes, and electric utilities. This section directs the Authority to employ an executive director, appointed by the board of directors. The executive director will be a WMS3 Director. The authority must update the corridor identification study by October 30, 2032, and no less than every five years thereafter. The Authority must submit a report to the legislature of its activities and operating and financial statements by December 1, 2026, and every July 1 after. The authority must charge and collect an application review fee of \$5,000 from each entity that applies for the use of services provided under a partnership with the authority.

Section 6 allows the Authority to adopt rules to implement the bill, enter into contracts and agreements, lease, purchase, accept donations of, or otherwise own, hold, improve, or use any property, and to own transmission equipment and systems. The Authority may also use eminent domain to acquire right of way. The Authority may utilize services of executive departments of the state under mutually agreeable terms. The Authority may assist the project proponent in following SEPA and may support and facilitate tribal consultation. The Authority must also adopt rules for initial local investment committee fee and annual local investment commitment fee to distribute to counties, cities, towns, and tribes. The Authority would need continued outside counsel and consultants to arrange complex partnerships and financing agreements with utilities and developers.

Section 7 sets labor standards for projects where the Authority selects a qualified transmission builder or operator.

Section 8 creates a tribal clean energy partnership consisting of 8-44 members. The work of this partnership includes pathways for tribal participation in clean energy development, opportunities for financing tribal clean energy development, approaches to expanding the tribal clean energy workforce, and the development of model tribal consultation processes, contracts, defined mitigation options, incentives, and community investment agreements related to the siting and permitting of energy facilities. Commerce may also convene a clean energy advisory committee to provide feedback on work completed by the partnership.

Section 9 creates a new electric transmission operating account in the state treasury.

Section 10 creates a new electric transmission capital account in the state treasury.

Section 11 instructs the authority that all information it obtains that is critical energy infrastructure information or proprietary technical or business information shall be confidential.

Section 12-17 includes requirements for surplus balances in the treasury account.

Section 18 establishes expiration dates for various sections in the bill.

Sections 19 establishes effective dates for various sections in the bill.

Sections 20 establishes effective dates for various sections in the bill.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

Sec. 5(6). – Collect application review fee of \$5,000 from each entity that applies for use of services under a partnership with WETA

FY27 – 0

FY28 - \$15,000

FY29 - \$20,000

FY30 - \$25,000

FY31 - \$25,000

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

To meet the requirements of S SB AMH APP H3826.1 6355, Commerce estimates the following:

Energy and Innovation Expenditures

Section 3 requires Commerce to conduct a corridor identification study by October 30, 2027. Based on current market trends, the cost is anticipated to be \$460,000. The assessment will be completed by an external consultant contracted through Commerce and performed every five years thereafter by the Authority.

Section 4 establishes a board of directors of government, industry, and advocacy representatives. The board of directors' staff are included in the staff required by Section 3.

Section 5 establishes the Authority with an Executive Director who may employ staff as necessary.

0.20 EMS 2 (417 hours) to hire the contractor and support their work in FY 27 and the first six months of FY 28.

0.10 Administrative Assistant 3 (208 hours) to provide administrative support to the board of directors in FY 27-31 (and ongoing).

1.0 FTE WMS3 Director (2088 hours) in FY28-31 (and ongoing) to employ staff for the office and oversee as the primary director.

1.0 FTE Management Analyst 4 (2088 hours) in FY29-31 (and ongoing) for permitting/SEPA lead work, local government/tribal work, and staff the board of directors.

Section 6 requires the Authority to adopt rules to implement the bill, enter into contracts and agreements, lease, purchase, accept donations of, or otherwise own, hold, improve, or use any property, and own transmission equipment and systems. This will require rulemakings on at least six topics (some of which could likely be combined). These rulemakings will be separate but will rely on the same staff outlined below. Outside counsel and consultants would be needed in FY28-31 to develop contractual arrangements and agreements for projects, leases, purchases, and competitive bidding, as an estimated cost of \$400,000 per fiscal year.

Section 8 directs Commerce to establish a tribal clean energy partnership work group consisting of 8-12 members with expertise as defined by the legislation, plus an invitation to all federally recognized Indian tribes in Washington and those with treaty ceded lands in Washington (32 tribes). Thus, the workgroup membership could range from 8-44 (for cost estimates below, we assume 30 workgroup members). Commerce will lead the work group with support from a contractor.

By April 1, 2027, the workgroup will submit an interim report to the appropriate legislative committees that documents its findings to date. The report will be drafted by contractors and will be overseen and reviewed by Commerce staff.

By December 1, 2027, the workgroup will submit a report to the appropriate committees of the legislature providing information as described in the legislation. The report will be drafted by contractors and will be overseen and reviewed by Commerce staff.

By December 1, 2027, the work group will submit a report to the office of equity pursuant to RCW 43.18A.030.17. The report will be drafted by contractors and will be overseen and reviewed by Commerce staff. This section expires June 1, 2028.

Commerce estimates the following staff are needed to complete the work of this section:

0.50 FTE EMS2 (1044 hours) in FY27-28 to provide subject matter expertise and expert policy advice or consultation in coordinating development of the workgroup and advisory committee outputs. This position will oversee the contract with contractor and will be responsible for successful implementation of tasks and completion of reports. The position will represent Commerce during workgroup and advisory group meetings and will work closely with contractor on process design and the development of all written work produced by the workgroup.

0.20 FTE Administrative Assistant 3 (417 hours) in FY 27-28 This position will facilitate all travel and meeting logistics

and reimbursement for workgroup or advisory committee members.

0.10 FTE Management Analyst 4 (208 hours) in FY27-28 to coordinate with, support, and assist with the implementation of workgroup and advisory committee (business and organizational planning, research and analysis, formulating recommendations, and coordinating implementation).

A contractor will be needed to support Commerce with process design, information gathering, facilitation of workgroup and advisory committee, scheduling and logistics, note-taking, report drafting, and other duties as needed. This is estimated to be \$100,000 per year for FY27-28.

For illustrative purposes, Commerce estimates the following costs for travel for the Tribal Partnership Workgroup and the Advisory Committee:

Tribal Partnership Workgroup

Commerce assumes the workgroup will consist of 30 members. In FY27, the workgroup will meet every other month for a total of five meetings. The first meeting will be in-person, and the rest will be virtual.

In-person meeting will be in Seattle at a Commerce location. Costs, including food and travel, are estimated at approximately \$10,657.

Commerce estimates 11 out of the 30 people in the workgroup would receive compensation of \$57 per hour to attend the workgroup meetings. In FY27, the group would meet every other month, totaling five meetings at three hours each, the projected compensation amount would be \$9,405. In FY28, there would be three meetings at similar rates, totaling \$5,643.

Commerce also anticipates 11 out of the 30 people in the workgroup would receive compensation of \$57 per hour for work outside of the scheduled meetings. In FY27, Commerce estimates two hours per month for 11 months totaling \$13,794, and two hours per month for six months in FY28 totaling \$7,524.

Advisory Committee

Commerce assumes two individuals will receive compensation for a similar rate of \$57 per hour for four, three-hour meetings (three in FY27 and one in FY28). This equates to \$1,026 in FY27 and \$342 in FY28.

Section 3, 5, and 6 Expenditures

FY28: \$42,948

Total Costs

FY27: \$317,312
FY28: \$295,939

Local Government Division Expenditures

The Department of Commerce (Department) is responsible for implementation of and technical assistance for the Growth Management Act (GMA), codified as chapter 36.70A RCW. The GMA governs land use decisions, critical area protections, mitigation requirements and protections of agricultural and natural resource lands of long-term commercial

significance to the state.

The Department assumes development of guidance for local governments and tribes on the impacts to critical areas and agricultural and natural resource lands from the siting of energy infrastructure and appropriate mitigation will be necessary and would begin during FY28 with an expected project duration of two years.

The Department assumes land use expertise and local permitting expertise will be necessary to implement this act.

The Department also assumes assistance as the lead agency on SEPA will require knowledge of critical areas mitigation and controls on the conversion of agricultural and natural resource lands.

0.10 FTE Washington Management Services 3 (209 hours) FY27 and 0.20 FTE (418 hours) ongoing thereafter to serve as the subject matter expert on the GMA. This staff member establishes and implements statewide land use policies. This staff is the decision maker over all elements of the program. Staff provide expert policy advice or consultation on a range of issues specific to the Growth Management Act and to areas that have agency wide implications.

0.10 FTE Washington Management Services 1 (209 hours) FY27 and ongoing thereafter to serve as the liaison between tribes and local governments on land use issues. This staff is also the manager of the Tribal Dispute Resolution Program and will provide in-person support to tribes.

0.30 FTE Commerce Specialist 4 (627 hours) FY27 and ongoing thereafter to serve as expert for land use and permitting energy infrastructure in support of local governments. This staff will lead the development of guidance for local governments and tribes on the impacts to critical areas and agricultural and natural resource lands from the siting of energy infrastructure and appropriate mitigation.

Salaries and benefits:

FY27: \$80,145
FY28: \$102,304
FY29: \$102,304
FY30: \$102,304
FY31: \$102,304

Goods and services:

FY27: \$2,500
FY28: \$3,000
FY29: \$3,000
FY30: \$3,000
FY31: \$3,000

Travel:

FY27: \$2,400
FY28: \$2,400
FY29: \$2,400
FY30: \$2,400
FY31: \$2,400

Professional Service Contract: The Department assumes the need for one professional service contract to assist staff in the development of guidance for tribes and local governments regarding the permitting and siting of agrivoltaics and other renewable energy generating projects. The environmental impacts on cultural resources, critical areas, the forest industry and lands of agricultural and commercial long-term significance to the state requires expertise not available within the agency.

FY28: \$100,000

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Sections 1 create the Washington electric transmission authority to: (a) Improve reliability and resilience, including during extreme weather events; (b) Increase access to low-cost renewable energy; (c) Achieve clean electricity requirements and greenhouse gas emissions limits; (d) Support economic growth; and (e) Maintain affordable energy rates. (No NEW Fiscal Impact)

Section 2 creates definitions that apply to the Washington electric transmission authority. Sub. Bill adds definitions including “investor-owned utilities” - adds new definition of “Neighboring landowner” (No NEW Fiscal Impact)

NEW Sec. 3 - creates new responsibilities for Commerce related to planning and supporting electric transmission infrastructure in Washington. It directs the department to identify priority transmission corridors, allows it to hire independent experts to assist with that work, and requires it to provide administrative support for the newly created Washington Electric Transmission Authority until that authority is fully staffed. Identify high-priority transmission corridors by Oct. 30, 2027. (No Fiscal Impact)

Section 4 discusses the 10-member board requirements and that the Board of directors must be appointed by Jan. 1, 2027, and an Exec. Director hired by June 30, 2027. - NEW clarifies that one member will be appointed to authority with expertise in rural county land use planning and law and local permitting processes. Moves ability to consult with other state agencies or subject matter experts on natural hazards when facilitating transmission projects to Section 6. (No NEW fiscal impact)

Sec. 5 – 19 – Creates a state electric transmission authority empowered to plan finance own operate partner on or sell high-voltage transmission projects. It will adopt rules, use eminent domain (new addition related to efforts to acquire property before exercising eminent domain), receive and expend funds, coordinate with utilities, tribes, and finance authorities. It will require qualified Builders, it will form a tribal clean energy partnership workgroup, define and protect confidential critical energy infrastructure information, establish operating and capital transmission accounts, and grant SEP a categorical exemption in tribal consultation procedures for specified upgrades to existing 115 KV transmission lines. (No NEW fiscal impact –changes in section numbers, additional information/clarification on duties including NEW change in language to a more supportive tone related to environmental policy act process and tribal relations and who should perform all construction and maintenance work, removes incentive rate of return impact which removes fiscal impact from previous version.)

Sections 20 through 22 set expiration requirements. (No Fiscal Impact)

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

UTC assumes no cash receipts will go to UTC because of this legislation.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Commission participation in separate Authority rulemaking

Authority is required to adopt new rulemakings, taking about six months and requiring six hybrid meetings to complete. This will require staff participation, including data and policy analysis. Staff anticipates this work to begin July 1, 2026.

FY2026 and FY2027 - \$66,087 per FY

(Section Manager | Energy Rates & Services, 0.07 FTE; Deputy Director | Energy Rates & Services, 0.02 FTE; Policy Advisor, 0.07 FTE; Regulatory Analyst 3, 0.14 FTE; Attorney General, 0.03 FTE; Director | Regulatory Services, 0.02 FTE; Deputy Director | Policy, 0.02 FTE)

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This bill creates a new Washington electric transmission authority to improve transmission reliability, resilience, and affordability. It outlines the priorities and responsibilities for the new Authority and assigns some supporting activities to the Department of Commerce that will assist the new Authority. The amendment adds a definition for neighboring landowner, adds language authorizing consultation with neighboring landowners, and clarifies qualifications required for some Board of Directors members.

The Department of Archaeology and Historic Preservation assumes there will be no direct impact as a result of the activities outlined in the bill, therefore, assumes no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

This bill would create a new Washington Electric Transmission Authority (Authority) to support planning and expansion of new transmission and distributed energy. The Department of Commerce (Commerce) would be required to staff and support the Authority and identify high priority transmission corridors. The bill would also establish a Tribal Clean Energy Partnership Work Group in Commerce to develop pathways for Tribal participation, find opportunities for joint ownership, research barriers to Tribal access, and develop model Tribal consultation processes and various agreements.

Changes between SSB 6355 and AMH APP H3826.1:

Section 2 would be amended to add a definition of “neighboring landowner.”

Section 4 would be amended to specify that a board member with land use planning expertise must also have expertise in rural county land use planning.

Section 6 would be amended to require the Board to consult with neighboring landowners on natural hazards, in addition to state agencies and subject matter experts, when facilitating transmission projects.

Section Summary of AMH APP H3826.1:

Section 1 would lay out legislative findings and intent to create the Washington Electric Transmission Authority (Authority) to improve transmission reliability, resilience, and affordability.

Section 2 would define the Authority, board of directors, and other terms relevant to the bill.

Section 3 would add a new section to chapter 43.21F RCW, on the State Energy Office, that would require Commerce to identify high priority transmission corridors by October 30, 2027, allow Commerce to work with a contractor to do so, and direct Commerce to provide all support for and oversee the Authority until an executive director is hired.

Section 4 would create a board of directors to oversee the Authority. This section would include specific appointment and experience requirements for members of the board, authorize external consultation, and lay out other board procedures.

Section 5 would establish the Authority as a public body. It would lay out the priorities, goals, and duties of the Authority. The Authority would be required to submit a report of its activities to the Governor and Legislature by December 1, 2027, and annually every July 1st thereafter.

Section 6 would list the powers of the Authority, including exercising eminent domain after making efforts to acquire property, entering contracts, applying for funding, entering into partnerships, charging fees for services, and assisting the project proponent with following the State Environmental Policy Act process.

Section 7 would require the Authority to ensure all work be performed by qualified employees of an electric utility or contractors meeting detailed qualifications.

Section 8 would add a new section to chapter 43.31 RCW, regarding the Department of Commerce, establishing a Tribal Clean Energy Partnership Work Group (work group). The section would lay out the required work product, membership, and deadlines. The work group would be required to submit a report to the legislature by December 1, 2027. The report would be required to include identified barriers to participation, recommended changes to law or rules, identified project opportunities, and frameworks for partnership, ownership, and investment. This section would expire on June 1, 2028.

Section 9 would establish the electric transmission operating account in the state treasury.

Section 10 would establish the electric transmission capital account in the state treasury.

Section 11 would define the types of information to be considered confidential and not subject to inspection or disclosure pursuant to chapter 42.56 RCW, the Public Records Act.

Sections 12 - 17 would amend RCW 43.84.092 and various session laws related to the deposit of surplus balance investment earnings to add the electric transmission capital account to the list of accounts that receive their proportionate share of earnings from the state treasurer.

Section 18 would add expiration dates for Sections 12 – 16 of this bill.

Section 19 would add effective dates for Section 13 – 17 of this bill.

Section 20 would add Sections 1, 2, 4 - 7, and 9 -11 as a new chapter in Title 43 RCW, State Government – Executive.

This bill will not impact Ecology. The bill would therefore have no fiscal impact.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

LOCAL GOVERNMENT FISCAL NOTE

Department of Commerce

Bill Number: 6355 S SB AMH APP H3826.1	Title: Electric transmission system
--	--

Part I: Jurisdiction-Location, type or status of political subdivision defines range of fiscal impacts.

Legislation Impacts:

- Cities: All cities. Potential local investment commitment fee revenue for high voltage projects.
- Counties: All counties. Same as above.
- Special Districts:
- Specific jurisdictions only:
- Variance occurs due to:

Part II: Estimates

- No fiscal impacts.
- Expenditures represent one-time costs:
- Legislation provides local option: Local governments have the option to enter into a partnership with the authority for use of services.
- Key variables cannot be estimated with certainty at this time: The number of high voltage projects to be developed by the authority. Local investment commitment fee structure.

Estimated revenue impacts to:

Non-zero but indeterminate cost and/or savings. Please see discussion.

Estimated expenditure impacts to:

None

Part III: Preparation and Approval

Fiscal Note Analyst: Kristine Williams	Phone: (564) 250-5931	Date: 03/11/2026

OFM Review: Marie Davis	Phone: (360) 890-1163	Date: 03/12/2026

Part IV: Analysis

A. SUMMARY OF BILL

Description of the bill with an emphasis on how it impacts local government.

This note is on 6355 SSB AMH APP H3826.1 and compares it to SSB 6355.

CHANGES BETWEEN THIS VERSION AND THE PRIOR VERSION OF THE BILL:

This version of the bill adds the definition of “neighboring landowner” and modifies certain responsibilities of the Washington Electric Transmission Authority (authority) and its board of directors. These changes include:

Sec. 2 is amended to add a definition of “neighboring landowner” to mean a public or private landowner whose property: (a) shares a property line or other physical boundary with a proposed or existing transmission corridor; or (b) includes an easement or other right-of-way for a proposed or existing transmission corridor that crosses a portion of the landowner’s property.

Sec. 4 is amended to clarify that one member of the board of directors must have expertise in rural county land use planning and law and local permitting processes.

Sec. 4 and Sec. 6 are amended to allow the authority to consult with other agencies, subject matter experts, or neighboring landowners on natural hazards and mitigation practices for transmission projects, rather than the board.

These changes do not affect the fiscal impacts discussed below.

SUMMARY OF CURRENT BILL

This bill creates the Washington Electric Transmission Authority (authority) to improve the reliability and capacity of the electric transmission system in Washington state. The authority will provide development transmission services and conduct other related activities in consultation with local and federal jurisdictions, utilities, transmission developers, federally recognized Indian tribes, and affected communities.

B. SUMMARY OF EXPENDITURE IMPACTS

Expenditure impacts of the legislation on local governments with the expenditure provisions identified by section number and when appropriate, the detail of expenditures. Delineated between city, county and special district impacts.

This bill has no impact on local government expenditures.

Local governments may choose to enter into a partnership with the authority to use services provided under a partnership agreement. If a local government chose to adopt the local option, it may incur administrative and legal costs to review the partnership agreement in addition to the \$5,000 fee imposed. The partnership may also require city council or county commissioners' approval depending on the scope of the agreement. However, there is no fiscal impact on local government expenditures due to the local option.

Assumptions released by the Department of Commerce state that the department anticipates eight meetings of the tribal clean energy partnership work group (every other month) for three hours per meeting and one on-line public meeting. One work group meeting will be in-person, the remainder will be online. The work group will hold one public online meeting before June 1, 2028. Commerce will identify and appoint members of the work group to include between four and six representatives of electric utilities, including consumer-owned utilities. For the purposes of this fiscal note, the Local Government Fiscal Note Program assumes that the additional work assigned to work group members will fall within current duties and the travel costs associated with the one required in-person meeting will be de minimus. Therefore, there is no fiscal impact to local governments.

C. SUMMARY OF REVENUE IMPACTS

Revenue impacts of the legislation on local governments, with the revenue provisions identified by section number, and when appropriate, the detail of revenue sources. Delineated between city, county and special district impacts.

This bill has an indeterminate impact on local government revenues.

The initial and/or annual local investment impact fees to be distributed to counties, cities, towns, and tribes will be in proportion to the project's impact and will be transferred with the title if the project is sold. These revenues cannot be estimated until the rulemaking is completed and are therefore indeterminate. The revenue impact of this legislation is indeterminate.
